Social Media Security Michael Cross,2013-11-01 Social networks, particularly public ones, have become part of the fabric of how we communicate and collaborate as a society. With value from micro-level personal networking to macro-level outreach, social networking has become pervasive in people's lives and is now becoming a significant driving force in business. These new platforms have provided new approaches to many critical enterprise functions, including identifying, communicating, and gathering feedback with customers (e.g., Facebook, Ning); locating expertise (e.g., LinkedIn); providing new communication platforms (e.g., Twitter); and collaborating with a community, small or large (e.g., wikis). However, many organizations have stayed away from potential benefits of social networks because of the significant risks associated with them. This book will help an organization understand the risks present in social networks and provide a framework covering policy, training and technology to address those concerns and mitigate the risks presented to leverage social media in their organization. The book also acknowledges that many organizations have already exposed

themselves to more risk than they think from social networking and offers strategies for dialing it back to retake control. Defines an organization's goals for social networking Presents the risks present in social networking and how to mitigate them Explains how to maintain continuous social networking security

The Cambridge Handbook of Social Enterprise Law Benjamin Means, Joseph W. Yockey, 2018-10-31
Growing numbers of employees, consumers, and investors want companies to be truly good; these stakeholders will accept lower economic returns in order to support companies that prioritize sustainability, fair wages, and fair trade. Unlike charities or non-profit organizations, such companies - or social enterprises - are not only permitted but also expected to produce an economic return for investors. Yet, unlike traditional business ventures, social enterprises have no obligation to maximize profits, even on a long-term basis. In this comprehensive volume, Benjamin Means and Joseph W. Yockey bring together leading legal scholars and practitioners to offer an authoritative guide to social enterprise law and policy. The Cambridge Handbook of Social Enterprise Law takes stock of the field and charts a course for its future development. It should be read by entrepreneurs, investors, practitioners, academics, students and anyone else interested in how companies are evolving to address new demands for capitalism with a conscience.

European Social Policy and the COVID-19 Pandemic Stefanie Börner,Martin Seeleib-Kaiser,2023-08-08 This is an open access title available under the terms of a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 International license (CC BY-NC-ND 4.0). It is free to read at Oxford Academic and offered as a free PDF download from OUP and select open access locations. During the first two years of the COVID-19 pandemic, social policy was one of the most important strategies used by governments to help mitigate the crisis. European Social Policy and the COVID-19 Pandemic: Challenges to National Welfare and EU Policy provides an encompassing and longer-term analysis of the social policy responses of European countries, as well as the European Union (EU), to the challenges of the pandemic. The book asks in which direction the European welfare states, on the one hand, and EU social policy, on the other, are developing as a result of the pandemic with respect to polity, politics, and policy instruments. European Social Policy and the COVID-19 Pandemic addresses several questions, such as what medium- and long-term effects will the current social policy crisis responses have on the different welfare states? Will the partly improvised, partly only temporary but in every respect diverse and often unprecedented measures lead to novel reform trajectories or even a new welfare state model? What new forms of international cooperation and conflict resolution mechanisms may arise within the social policy domain of the EU? The questions raised not only concern the future of welfare states in Europe but also EU-level social-policy making and European integration in general. The chapters--written by experts on law, political science, social policy, and sociology--build on various methodological backgrounds and encompass single case studies, comparative policy analyses, and discourse-analytical perspectives.

The Social and Cognitive Aspects of Normal and Atypical Language Development Stephen v. Tetzchner,Linda S. Siegel,Lars Smith,2012-12-06 For some time now, the study of cognitive development has been far and away the most active discipline within developmental psychology. Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive, 50% seems like a conservative estimate. Hence, a series of scholarly books devoted to work in cognitive development is especially appropriate at this time. The Springer Series in Cognitive Development contains two basic types of books, namely, edited collections of original chapters by several authors, and original volumes written by one author or a small group of authors. The flagship for the Springer Series is a serial publication of the advances type, carrying the subtitle Progress in Cognitive Development Research. Each volume in the Progress sequence is strongly thematic, in that it is limited to some well-defined domain of cognitive developmental research (e. g., logical and mathematical development, development of learning). All Progress volumes will be edited collections. Editors of such collections, upon consultation with the Series Editor, may elect to have their books published either as contributions to the Progress sequence or as separate volumes. All books written by one author or a small group of authors are being published as separate volumes within the series.

Weaving the Social Networks of Women Migrants in Sudan Awatif Ata Elmannah Elageed, 2008 The Gezira Scheme (GS) area in the central Sudan is considered a melting pot for migrants of different origins and whose lives are intertwined with the Scheme land. This book offers a qualitative analysis of social networks of women migrants of different origins and age groups who are engaged in the agricultural labour force of the GS. It looks at the social interactions, the diversity of social processes and the functions and functioning of social networks of women that shape their everyday life. Special emphasis is given to the means by which women get work opportunities and undertake work negotiations. Strategies that women apply to solve problems arising at work and in their private sphere are explored. The differential responses concerning ethnicity-based differences are analysed. A combination of social networks theory and an actor-oriented perspective, both framed in constructivist terms, guided the analysis. To illustrate the complete picture of gendered social realities additional notions such as social security and social capital are introduced. Evidence shows that women are actors and acquire agency and their social networks serve multiple purposes and facilitate a wide range of settings. Examining the social networks by drawing upon a sociological approach provides new insights into the social networks theory and postulates additions to the actor-oriented approach and proposes new contributions to both theories.

Critical Inquiries for Social Justice in Mental Health Marina Morrow, Lorraine Halinka Malcoe, 2017-01-01 An exceptional showcase of interdisciplinary research, Critical Inquiries for Social Justice in Mental Health presents various critical theories, methodologies, and methods for transforming mental health research and fostering socially-just mental health practices. Marina Morrow and Lorraine Halinka Malcoe have assembled an array of international scholars, activists, and practitioners whose work exposes and disrupts the dominant neoliberal and individualist practices found in contemporary mental research, policy, and practice. The contributors employ a variety of

methodologies including intersectional, decolonizing, indigenous, feminist, post-structural, transgender, queer, and critical realist approaches in order to interrogate the manifestation of power relations in mental health systems and its impact on people with mental distress. Additionally, the contributors enable the reader to reimagine systems and supports designed from the bottom up, in which the people most affected have decision-making authority over their formations. Critical Inquiries for Social Justice in Mental Health demonstrates why and how theory matters for knowledge production, policy, and practice in mental health, and it creates new imaginings of decolonized and democratized mental health systems, of abundant community-centred supports, and of a world where human differences are affirmed.

Leading and Managing in the Social Sector S. Aqeel Tirmizi, John D. Vogelsang, 2016-12-22

This book explores leadership and management in social sector organizations, which include, NGOs, non-profits, social enterprises, social businesses, and cross-sector collaborations focusing on advancing human dignity and social justice. It provides social sector leaders with an overview of current trends, issues, and challenges in the field as well as best practices to foster effective programs, sustain organizations and meet the growing demands of the sector. The enclosed chapters cover topics such as cross-sector organizational design, innovation for client services, gender management dynamics, policy advocacy, and the growing social entrepreneurship movement. The social sector is currently in a vibrant, dynamic, and exciting stage. The sector's role and relevance to advancing human dignity and social justice is greater than ever. The number and types of social sector organizations have increased exponentially around the world and are offering extraordinary and much needed contributions toward an array of social issues. The traditional NGOs and non-profit organizations continue to be an integral part of the global civil society. At the same time, the emerging organizational forms under the social entrepreneurship umbrella are providing new momentum and excitement within and outside of the social sector. The interest in social entrepreneurship is encouraging existing social sector entities to actively embrace and encourage innovation. This interest is also inspiring a new breed of professionals and organizations to contribute to the social sector. This trend falls under the larger social sector dynamic promoting the creation of "hybrid" and emergent organizational forms, which cross and combine the traditional non-profit and for-profit domains. Despite the increased interest, the social sector still faces challenges around the world. CIVICUS - an international group promoting civil society organizations and groups-- recently reported a rise in the restrictions on civil society activities in a number of countries through worsening policy and legal environments. Funding challenges for the social sector are thus becoming more significant. At the same time, the calls for social sector accountability and emphasis on results and impact are growing. This book aims to offer approaches and tools which allow for the bridging of demands between creativity and accountability, between inspiration and results, and between gaining individual commitment and shared ownership of agendas and achievements, all of which are needed to effectively operate in the changing social sector.
