Aircraft Performance Maido Saarlus,2006-12-05 Aircraft PERFORMANCE STRAIGHTFORWARD METHODS TO DESIGN AND OPERATE AIRCRAFT TO MEET PERFORMANCE SPECIFICATIONS Aircraft Performance sets forth a group of tested and proven methods needed to determine the performance of an aircraft. The central theme of this book is the energy method, which enhances understanding of the standard methods and provides accessibility to advanced topics. As a result, readers gain a thorough understanding of the performance issues involved in operating an aircraft in an efficient and economic manner. While covering all the standard topics—level and climbing flight, range and endurance, take-off and landing, and maneuvering flight—the book focuses on the energy methods applied to path performance analysis. Throughout the text, numerous examples from both the commercial and military sectors show readers how the concepts and calculations are applied to real-life situations. Problems, ranging from basic to complex, test the readers' understanding and provide an opportunity for essential practice. To help focus the readers' attention on core issues, this text assumes that aerodynamics and propulsion are known inputs. Special appendices are provided to present some aerodynamic and propulsive equations and data. In general, topics are separated into horizontal and vertical plane approaches. Following an introduction and overview, basic energy concepts are employed to obtain a fundamental performance equation. This text, with its extensive use of examples and problem sets, is ideal for upper- level undergraduate and graduate students in engineering. It also serves as a reference for design engineers in both military and industrial sectors who want a set of clear and reliable methods to calculate aircraft performance.

"One Minute to Ditch!" Cornelius Ryan,2016-01-18 Prize-winning True Stories of the Supreme Moment—When Men Suddenly Face Death Some of these true stories are already famous because they have been dramatized on television. All of them take you straight to the heart of great moments of crisis. You'll know what it's like to look down at the wide Pacific and realize that your plane is going to ditch there. You'll twist the wheel of your racing car as it takes a narrow turn at Indianapolis. You'll struggle in cabin 56 of the S.S. Andrèa Doria during its five last frantic hours. In these and other stories, Cornelius Ryan, ace journalist, has caught the essence of that split-second that may be a man's last. Two of these pieces have won Benjamin Franklin Magazine awards. *"One Minute To Ditch!"*—Thirty-one men, women and children high over the mid-Pacific in a failing plane. (Dramatized on TV.) *Five Desperate Hours in Cabin 56*—A story of the sinking of the S.S. Andrèa Doria told in gripping minute-by-minute detail. (Dramatized on TV.) *The Major of St. Lô*—A classic of the Normandy invasion, an unforgettable true story of quiet heroism. (Dramatized on TV.) These and other factual accounts are moving documents of crisis: of courage against the sudden fact of very possible death.

Pepouza and Tymion William Tabbernee,Peter Lampe,2008-09-25 Early Christianity varied in appearance as much as the geography and terrain of the ancient Middle East. Often variety became pitted against orthodoxy. Montanism, or the New Prophecy, was founded by a Phrygian named Montanus along with two ecstatic prophetesses, Maximilla and Priscilla. Even the North African Church Father Tertullian was a supporter of the New Prophecy movement. The Montanist variety of Christianity, however, soon fell into disfavor by those later deemed orthodox, also because women played an influential role in this movement. Today we know about Montanism only partially and that mainly from the writings of its Christian rivals. One tenet of Montanism was the belief that the New Jerusalem would descend from heaven at a remote location in Phrygia near Tymion and Pepouza, Montanism's most holy city. In 2000, an international team of archaeologists and historians discovered in the Ulubey Canyon the centuries-lost site of Pepouza as well as an inscription mentioning Tymion. The discovery team was led by William Tabbernee (Phillips Theological Seminary, Tulsa, USA).

Peter Lampe (University of Heidelberg, Germany) designed and directed the archaeological field campaigns held in the following years, in the course of which Tymion (at Sükraniye) and other settlements were discovered. Compelling archaeological, epigraphic, and historical evidence is recorded in this extraordinary volume. The chapters are in English, German, and Turkish and contain illustrations, maps, photographs, an extensive bibliography, and an index.

Thunder Run David Zucchino,2007-12-01 "A Pulitzer Prize-winning reporter provides a brilliant account of the harrowing drive into Baghdad by an American armor brigade." —Seattle Post-Intelligencer Based on reporting that was a finalist for the Pulitzer Prize, Thunder Run chronicles one of the boldest gambles in modern military history: the surprise assault on Baghdad by the Spartan Brigade, the Second Brigade of the Third Infantry Division (Mechanized). Three battalions and fewer than a thousand men launched a violent thrust of tanks and Bradley Fighting Vehicles into the heart of a city of five million people—and in three days of bloody combat ended the Iraqi war. More than just a rendering of a single battle, Thunder Run candidly recounts how soldiers respond under fire and stress and how human frailties are magnified in a war zone. The product of over a hundred interviews with commanders and men from the Second Brigade, it is a riveting firsthand account of how a single armored brigade was able to capture an Arab capital defended by one of the world's largest armies.
