**Sustainable and Clean Energy Production Technologies**

Dan Bahadur Pal,Jay Mant Jha,2022-06-30 This edited book is a comprehensive collection of chapters on various clean energy technology such as solar energy, waste biomass as energy, hydro-electricity generation, biodiesel production from biomass and strategies to cater the demand of clean renewable energy. Clean energy technologies also enhance economic growth by increasing the supply of energy demand and tackling environmental challenges and their impacts due to the use of other conventional sources of energy. The conventional/non-conventional energy production methods are efficient but it has adverse effects on

environment and human health. As environmental concerns are not avoidable therefore the necessity of clean energy production comes in to the picture. The clean energy can be produced by different wastes which are caused for the environmental pollution. This book covers various aspects of new and renewable clean energy production technology and its utilization in different fields. This is a useful reading material for students and researchers involved in clean energy study.

Chinese Politics in the Hu Jintao Era: New Leaders, New Challenges Willy Lam, 2016-07-01 Drawing on hundreds of interviews with top Chinese officials, parliamentarians, scholars, and businessmen, Willy Lam, a renowned journalist and writer on Chinese affairs, presents a first-hand, multi-dimensional account of twenty-first century China and the impact of fourth generation leaders, including President Hu Jintao and Premier Wen Jiabao. Lam goes behind the glitzy facade of nouveau-riche Beijing and Shanghai to examine how the Hu leadership has tried to extend the Communist Party's mandate of heaven by tackling an array of daunting problems: the weakening legitimacy of the Party's leadership; restive peasants; angry workers; political stagnation over the lack of reform; foreign relations difficulties; unreliable energy supplies; resurgent nationalism; and the increasingly dubious Chinese model of development. The author assesses possible contributions that the new classes of private businessmen, professionals, and intellectuals - as well as new ideas such as nationalism, globalization, and federalism - will make to economic prosperity and political liberalization. The book also includes a chapter on foreign policy, which contains an insightful account of Beijing's evolving and sometimes difficult relations with the United States, Europe, Japan, and other major countries and blocs, as well as the role of the People's Liberation Army.

Cleaner Treatment Technologies and Productions in The Energy Industry, 2nd edition Jiang Bian,Xuewen Cao,Chuang Wen,Lin Teng,Zheng Li,2023-04-29 s the rapid development of the world's economy brought serious environmental problems, the economy must accelerate industrial structure adjustment and development mode transformation to achieve sustainable development. A cleaner production mode based on cleaner technology is a crucial way to solve the conflict between economic growth and environmental protection effectively. In essence, cleaner production is a kind of production mode in which the environmental strategy of overall prevention is adopted for the production process to reduce or eliminate their possible harm to human beings and the environment while fully meeting human needs and maximizing social and economic benefits. Fossil energy and renewable energy have promoted the development of many emerging industries, such as the automobile industry, aerospace technology, modern production and processing, and modern transportation industry, and preventing waste production while increasing efficiencies in the uses of energy is a crucial issue. Specific measures include: • Using clean energy and raw materials; • Adopting advanced technology and equipment; • Comprehensive utilization; • Reducing pollution from the source; • Improving utilization efficiency; • Reducing or avoiding the generation and emission of pollutants in the process of production. This Research Topic aims to report the most important and latest technological advances in cleaner treatment technologies of fossil energy (such as oil and natural gas) and renewable energy (such as hydrogen energy and geothermal

energy) and serves as a platform for addressing and discussing theoretical and practical cleaner production.

*Digitizing Production Systems* Numan M. Durakbasa, M. Güneş Gençyılmaz, 2021-11-10 This book contains selected papers from International Symposium for Production Research 2021, held on October 7-9, 2021, online, Turkey. The book reports recent advances in production engineering and operations. It explores topics including production research; production management; operations management; industry 4.0; industrial engineering; mechanical engineering; engineering management; and operational research. Presenting real-life applications, case studies, and mathematical models, this book is of interest to researchers, academics, and practitioners in the field of production and operation engineering. It provides both the results of recent research and practical solutions to real-world problems.

*Big Data Mining for Climate Change* Zhihua Zhang, 2019-12 Big Data Mining for Climate Change addresses how to manage the vast amount of information available for analysis. Climate change and its environmental, economic and social consequences are widely recognized as the biggest, most interconnected problem facing humanity. There is a huge amount of potential information currently available...and it is growing exponentially. This book walks through the latest research and how to navigate the resources available using big data applications. It is appropriate for scientists and advanced students studying climate change from a number of disciplines, including the atmospheric sciences, oceanic sciences, geography, environment sciences, ecology, energy, economics, engineering and public policy. Provides a step-by-step guide for applying big data mining tools to climate and environmental research Presents a comprehensive review of theory and algorithms of big data mining for climate change Includes current research in climate and environmental science as it relates to using big data algorithms
