**New Orleans Television** Dominic Massa,2008 A sentimental journey through early TV in 1950s and 1960s New Orleans.

Weather Modification and Early-warning Systems United States. Congress. House. Committee on Interstate and Foreign Commerce. Subcommittee on Communications and Power,1974

**Weather Modification and Early-warning Systems, Hearing Before the Subcommittee on Communications and Power of ...**, 93-2, July 2, 1974 United States. Congress. House. Interstate and Foreign Commerce Committee,1974

**Oil and Water** Andrea Miller,Shearon Roberts,Victoria LaPoe,2014-04-18 Along the Gulf Coast, history is often referenced as pre-Katrina or post-Katrina. However, the natural disaster that appalled the world in 2005 has been joined by another catastrophe, this one man-made—the greatest environmental and maritime accident of all time, the Deepwater Horizon Oil Spill. In less than five years, the Gulf Coast has experienced two colossal disasters, very different, yet very similar. And these two equally complex crises have resulted in a steep learning curve for all, but especially the journalists covering these enduring stories. In *Oil and Water*, the authors show how Katrina journalists have reluctantly had to transform into oil spill journalists. The authors look at this process from the viewpoints not only of the journalists, but also of the public and of the scientific community. This book assesses the quality of journalism and the effects that quality may have on the public. The authors argue that regardless of the type of journalism involved or the immensity of the events covered, successful reportage still depends on the fundamentals of journalism and the importance of following these tenets consistently in a crisis atmosphere, especially when confronted with enduring crises that are just years apart.

**New Orleans in the Sixties** Mary Lou Widmer,2008-05-09 In this, her fifth book in the series describing past decades in New Orleans' history, local author and historian Mary Lou Widmer offers readers unique glimpses into the turbulent and triumphal 1960s. The decade of the sixties was one that confounded America like no period before. It ushered in a time of social change and tension. In New Orleans, this period was visible in the city's skyline as the face of New Orleans began to change. Tourism became a major concern, construction on the Superdome began, some of the biggest

buildings were built, and the Saints came marching in. Packed with photographs and reminiscences of an important decade in the evolution of this American metropolis, New Orleans in the Sixties is a unique accomplishment that will interest both residents and lovers of the Crescent City.

**Cultural Citizenship** Toby Miller, 2007 A lively, incisive view of what citizenship means today.

New Orleans Television Dominic Massa, 2008-08-11 More than 50 years ago, with the flip of a switch and the turn of a dial, local television became an unforgettable part of New Orleans culture. For many viewers, the memories remain vivid, even if much of what they saw was in black and white. This collection of vintage photographs highlights the history of popular programs and personalities, beginning with the city's first station, WDSU-TV. After signing on the air in 1948, Channel 6 introduced favorites like Mrs. Muffin, The Great MacNutt, and Midday while building a news team that included local icons Mel Leavitt, Nash Roberts, and Alec Gifford. In 1957, WWL-TV took to the airwaves, developing a reputation for quality local programming and dominant news coverage. Channel 4 made household names out of Morgus the Magnificent, Hap Glaudi, John Pela, Phil Johnson, Bill Elder, and Angela Hill.

**Television Weathercasting** Robert Henson, 1990 Will it rain tomorrow? That perennial question has made weather the most popular segment of local television news for years. Yet weathercasters do far more than simply convey the latest outlook. Depending on the circumstances, they may inject humor into the forecast (having a Lhasa apso pant and wag its tail during the forecast, for instance), warn of a life-threatening tornado or hurricane, or instruct viewers on the science behind weather. This book, the first critically to examine weathercasters and their craft, is based on years of research and covers both the lighthearted and serious aspects of television weather. Chapters include pioneer weathercasters of the 1940s and 1950s, technical advances, interaction with the National Weather Service, severe weather coverage, celebrities who began with television weather, and the status of women and minorities in weathercasting.

**Television/radio Age**, 1986-04

*Cultural Meanings of News* Daniel A. Berkowitz, 2010-03-30 What is news? Why does news turn out like it does? What factors influence the creation, production, and dissemination of news? *Cultural Meanings of News* takes on these deceptively simple questions through an essential collection of seminal and contemporary studies by leaders in the fields of mass communication and media studies. Similar in format and purpose to editor Dan Berkowitz's award-winning *Social Meanings of News*, this new volume represents a conceptual update, a continuation of the discourse about the nature of news

and how it comes to be, moving ideas ahead from the earlier tradition of sociological approaches to the more pervasive cultural perspectives that inform understandings about news. *Cultural Meanings of News* provides a carefully selected set of readings, organized into thematic areas that each probe a dimension of the literature: from sociological roots to cultural perspectives; news as narrative and cultural text; newswork as cultural ritual; news as cultural myth; news and its interpretive communities; news as a source and reflection of collective memory; toward the future of news research. This text-reader provides students and scholars with first-hand exposure to cultural approaches to the study of news, while also providing an organizing framework for understanding the commonalties and differences between threads in the research. The goals are to engage readers through guided immersion in the material.

Managing Television News B. William Silcock, Don Heider, Mary T. Rogus, 2009-03-04 *Managing Television News* provides a practical introduction to the television news producer, one of the most significant and influential roles in a newscast. Recognizing the need for formal training in this key role, authors B. William Silcock, Don Heider, and Mary T. Rogus have combined their expertise and experience to shape this essential resource on the responsibilities, demands, and rewards of the news producer position. Their book provides a strategic approach to producing newscasts and serves as an in-depth guide to creating quality, audience-friendly newscasts working within the realistic limitations of most newsrooms. It helps the student and the professional producer sort through the various deadline-driven challenges of creating a 30-minute newscast. Filled with real-world examples and advice from news directors, producers, and anchors currently in the business, and photographs illustrating the varied perspectives in the position, *Managing Television News* provides critical skill sets to help resolve ethical dilemmas, as well as keen and fresh insights on how to win the ratings without compromising news quality. Career concerns are also addressed. This resource is a pioneering book for the professional television newsroom and the individual reader interested in starting or expanding a producing career. It is an excellent text for the college classroom, as its structure fits neatly into a semester schedule, and it is a must-have resource for both seasoned and novice producers, as well as students in broadcast news.

Words Whispered in Water Sandy Rosenthal, 2020-08-11 “Anyone who is interested in Hurricane Katrina, and in America’s failing infrastructure, will want to read this book . . . a fast-paced narrative.” —Scott G. Knowles, Drexel University 2020 Nautilus Silver Winner In the aftermath of one of the worst disasters in US history, *Words Whispered in Water* tells the story of one woman’s fight, against all

odds, to expose a mammoth federal agency—and win. In 2005, the entire world watched as a major US city was nearly wiped off the map. The levees ruptured and New Orleans drowned. But while newscasters attributed the New Orleans flood to “natural catastrophes” and other types of disasters, citizen investigator Sandy Rosenthal set out to expose the true culprit and compel the media and government to tell the truth. This is her story. When the protective steel flood-walls broke, the Army Corps of Engineers—with cooperation from big media—turned the blame elsewhere. In the chaotic aftermath, Rosenthal heroically exposes the federal agency’s egregious design errors and changes the narrative surrounding the New Orleans flood. This engaging and revealing tale of man versus nature and man versus man is a horror story, a mystery, and David and Goliath story all in one. “Reveals what it takes to hold the powerful to account.” —Publishers Weekly “There are only a few civilians that fight like real warriors. Sandy Rosenthal is one of them.” —Russel L. Honoré, Lieutenant General, United States Army (Ret.)

**Public Response to Alerts and Warnings Using Social Media** National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Public Response to Alerts and Warnings Using Social Media: Current Knowledge and Research Gaps, 2013-02-04 Following an earlier NRC workshop on public response to alerts and warnings delivered to mobile devices, a related workshop was held on February 28 and 29, 2012 to look at the role of social media in disaster response. This was one of the first workshops convened to look systematically at the use of social media for alerts and warnings—an event that brought together social science researchers, technologists, emergency management professionals, and other experts on how the public and emergency managers use social media in disasters. In addition to exploring how officials monitor social media, as well as the resulting privacy considerations, the workshop focused on such topics as: what is known about how the public responds to alerts and warnings; the implications of what is known about such public responses for the use of social media to provide alerts and warnings to the public; and approaches to enhancing the situational awareness of emergency managers. **Public Response to Alerts and Warnings Using Social Media: Report of a Workshop on Current Knowledge and Research Gaps** summarizes presentations made by invited speakers, other remarks by workshop participants, and discussions during parallel breakout sessions. It also points to potential topics for future research, as well as possible areas for future research investment, and it describes some of the challenges facing disaster managers who are seeking to incorporate social media into regular practice.

**The Working Press of the Nation**, 2001

**Nine Lives** Dan Baum, 2009-02-10 The hidden history of the haunted and beloved city of New Orleans, told through the intersecting lives of nine remarkable characters. “Nine Lives is stunning work. Dan Baum has immersed himself in New Orleans, the most fascinating city in the United States, and illuminated it in a way that is as innovative as Tom Wolfe on hot rods and Truman Capote on a pair of murderers. Full of stylistic brilliance and deep insight and an overriding compassion, Nine Lives is an instant classic of creative nonfiction.” —Robert Olen Butler, Pulitzer Prize-winning author of *A Good Scent from a Strange Mountain* Nine Lives is a multivoiced biography of a dazzling, surreal, and imperiled city, told through the lives of nine unforgettable characters and bracketed by two epic storms: Hurricane Betsy, which transformed New Orleans in the 1960s, and Hurricane Katrina, which nearly destroyed it. Dan Baum brings the kaleidoscopic portrait to life, showing us what was lost in the storm and what remains to be saved. BONUS: This edition contains a Nine Lives discussion guide.

NBC and ABC ,

*The Government UFO Files* Kevin D Randle, 2014-04-21 Secrets and Suppressed Evidence. Coincidences or Lies? Sifting through hundreds of historical and government documents, interviewing multitudes of participants, and tracking countless number of leads, a former army officer, trained as an intelligence officer, presents a case for government incompetence and, potentially, malfeasance. Shining a harsh light on the government and its secrets, *The Government UFO Files: The Conspiracy of Cover-Up* investigates what the government knows about encounters with UFOs, alien life, and mysterious activities. The government has long collected information and assembled files on unidentified objects, extraterrestrial encounters, and strange convergences in the skies, but with new government secrets constantly being revealed (including finally admitting the existence of Area 51) is it too much to believe that it is hiding important information on close encounters, UFOs, and alien life? Nearly 100 sightings and other occurrences are thoroughly examined. Suppressed evidence, hidden plots, cover-ups, misleading statements, and documented connections to government intrigue are all addressed. It sorts through the information, sources, and it lets you decide whether the government is being deliberately misleading or whether the conspiracy theories have gotten out of control.

This is likewise one of the factors by obtaining the soft documents of this **Wwl Tv Weather** by online. You might not require more epoch to spend to go to the book establishment as without difficulty as search for them. In some cases, you likewise reach not discover the notice **Wwl Tv Weather** that you are looking for. It will unquestionably squander the time.

However below, in imitation of you visit this web page, it will be therefore utterly easy to get as competently as download lead Wwl Tv Weather

It will not consent many period as we tell before. You can complete it even if play something else at home and even in your workplace. so easy! So, are you question? Just exercise just what we provide below as without difficulty as evaluation **Wwl Tv Weather** what you considering to read!
