Mac OS X Panther Hacks brings together the perfect combination of tips, tricks, and tools to help serious Mac users--regardless of their background--get the most from their machines. This revised collection reflects the real-world know how of those well-steeped in Unix history and expertise, sharing their no-nonsense, sometimes quick-and-dirty solutions to administering and taking full advantage of everything a Unix desktop has to offer: Web, Mail, and FTP serving, security services, SSH, Perl and shell scripting, compiling, configuring, scheduling, networking, and hacking. Add to that the experience of die-hard Macintosh users, customizing and modifying their hardware and software to meet their needs. The end result is cool stuff no power user should be without. Everyday Information Practices Reijo

Savolainen,2008 In general, information practices are viewed as tools that people use to further their everyday projects. Essentially, people's information practices draw on their stocks of knowledge that form the habitual starting point of information seeking, use, and sharing. To judge the value of information available in external sources like newspapers and the Internet, people construct information source horizons. They set information sources in order of preference and suggest information seeking paths, such as first check the net, then visit the library. Everyday Information Practices draws on interviews with environmental activists and unemployed people during 2005 and 2006, exploring the practices of information seeking by focusing on the ways in which the participants monitored everyday events and sought information to solve specific problems. The book shows that everyday information seeking practices tend to be oriented by the principle of good enough. Overall, the role of routines and habits is more significant than has earlier been assumed. Thus, everyday information seeking practices tend to change quite slowly.
