*Big Seven Study (2016): 7 open source Crypto-Messengers to be compared (English/Deutsch)* David Adams,Ann-Kathrin Maier,2019-10-23 Provided with two columns in German & English Language / Zweispaltig in deutscher & englischer Sprache. BIG SEVEN STUDY about 7 open source Crypto-Messengers for Encryption at the Desktop: A contribution in the cryptographic-discussion - The two security researchers David Adams (Tokyo) and Ann-Kathrin Maier (Munich), who examined in their BIG SEVEN study seven well-known encryption applications for e-mail and instant messaging out of the open source area, performed then a deeper IT-audit for the acquainted software solution GoldBug.sf.net. The audit took into account the essential criteria, study fields and methods on the basis of eight international IT-audit manuals and was carried out in 20 dimensions. It identifies Ten Trends in the Crypto-Messaging. Security researcher David Adams from Tokyo about the published BIG SEVEN CRYPTO-study: We looked at the seven major open source programs for encrypted online-communication and identified ten trends in the Crypto-Messaging area. One of the important trends is the feature, that the users should be able to define a so-called end-to-end encrypting password by themselves manually. The software GoldBug - email client and instant messenger here was ahead with excellent results and is not only very trustworthy and compliant to international IT-audit manuals and safety standards, GoldBug also scores in comparison and in the evaluation of the single functions in much greater detail than the other comparable open source crypto messenger. Co-author of the study Ann-Kathrin Maier from Munich confirms: We have then our Messenger study deepened with a detailed audit of the crypto-program GoldBug, which received excellent results for encrypted email and secure online chat. By our code-reviews we can confirm the trustworthiness of this open source encryption in GoldBug. Numerous details have been analyzed by various

methods, compared and also strategically evaluated by the two authors regarding the current encryption discussions. The comparatively studied applications include CryptoCat, GoldBug, OTR-XMPP clients such as Pidgin with the OTR-plugin, RetroShare and Signal, Surespot and Tox.

**Sicherheitsaspekte von Mobiltelefonen** Peter Gewald,2016-02-11 Das primäre Ziel von Peter Gewald ist die Erkennung und Visualisierung diverser Angriffsszenarien im Mobilfunkbereich, wie z. B. die Kontrolle über den Datenverkehr, Man-in-the-Middle-Angriffe sowie die Ausführung von Programmcodes über SMS. Die Ergebnisse seiner Forschung geben einen Einblick in die Handlungsmöglichkeiten potenzieller Akteure und fungieren gleichzeitig als erste präventive Schutzmaßnahme. Frühzeitige Bildung und der Einsatz offener Standards und Software bilden die Grundsteine transparenter Technologien. Die Nachvollziehbarkeit komplexer technischer Funktionen und Abläufe gelingt jedoch nur mit einem

umfassenden Angebot von Informatikunterricht an Schulen.

ICTs for Inclusive Communities in Developing Societies
Darelle van Greunen,Jacques Steyn,2015-11-25 Several decades of international aid, predominantly granted by the highly developed world (the haves), for the use of ICT in developing regions (known by several labels, such as the have-nots, bottom of the pyramid, the south, or, some time ago, the third world) have passed, but the holy grail of turning these societies into the ideals defined by the donors is still elusive. Previously the emphasis was on top-down approaches in this endeavour. Now priority is increasingly given to bottom-up approaches, putting the targeted communities first, using methods such as co-creation and living labs. Information and Communication Technologies for Development (ICT4D) is still a domain in search of a common ground. The many different perspectives from diverse ideologies, paradigms and theoretical perspectives here lead to an interesting debate, but, meanwhile, agents of social change are doing their best to change communities – ostensibly for the better. An ongoing endeavour, this discussion requires further investigation of the complexities of techno-societies. The contributions to this volume range from explorations of theory, models and methods to investigations into the practical implementation of ICT in communities, covering the characteristics of social groups and different generations and gender issues, as well as its applications in education and health. As such, the contributions in this book will inform continuing debates concerning the role of ICT in developing communities on the wrong side of all the technical and social divides in human societies.

**Helpful Hackers** Chris van 't Hof,2016-02-16 'Hospital leaks patient records', 'Public transport smartcard has more holes than a sieve', 'Mobile banking app unsafe' – it seems that everything can be hacked these days. Fortunately, the person who discovers a flaw is not necessarily a cybercriminal but is often someone who wants to help improve cyber security. He or she immediately contacts the system owner so that the problem can be solved. A well-coordinated approach allows everyone to learn from the exercise we call 'responsible disclosure'. The Netherlands is a world leader in responsible disclosure. The Dutch like to resolve conflicts through a process of general consultation: the famous 'polder model'. This seems a particularly appropriate approach in the realm of IT and cyber security, since there is no central authority with overall responsibility but many diverse players, each responsible for their own tiny part of a vast and complex system. In this book, we hear from the hackers, system owners, IT specialists, managers, journalists, politicians and lawyers who have been key players in a number of prominent disclosures. Their stories offer a glimpse into the mysterious world of cyber security, revealing how hackers can help us all. www.helpfulhackers.nl Chris van 't Hof is an internet researcher and presenter with a background in sociology and electrical engineering. This is his eighth book. While a researcher at the Rathenau Institute, he authored a number of titles including Check in / Check out: the Public Space as an Internet of Things and RFID and Identity Management in Everyday Life. With his company Tek Tok, he now organizes various information technology events. Chris van 't Hof also has his own talkshow, Tek Tok Late Night. www.tektok.nl

Elle propose également un regard nouveau sur les révélations faites par l'ex-agent de la NSA Edward Snowden.

**Dictionnaire arabe algérien-français** Jihane Madouni-La Peyre,2003 Ce dictionnaire a été élaboré à partir d'un dialecte de Sidi-Bel-Abbès, parler de l'Ouest algérien. La région oranaise a connu un développement économique important, notamment depuis l'Indépendance. Cet essor explique les différents transferts vers Sidi-Bel-Abbès de populations urbaines, comme celles de Tlemcen, et rurales, comme celles de villages agricoles avoisinants. D'où le caractère mixte de la langue des Bel-Abbésiens, où se retrouvent à la fois des traits bédouins et citadins. Jihane Madouni-La Peyre s'est fixé un double objectif : contribuer à enrichir les travaux lexicographiques peu nombreux consacrés à l'arabe algérien ; réaliser un dictionnaire comportant de multiples informations complémentaires (catégories grammaticales, emplois particuliers, indications d'ordre socio-linguistique, notation sur les niveaux et les registres de langue). L'ouvrage présente 1875 entrées : 1505 entrées-racines et 370 entrées-mots. Il est noté en transcription phonétique et phonologique. [Source : quatrième de couverture]
