Confessions of a Recovering Environmentalist and Other Essays

Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live.

The Xbox 360 Uncloaked Dean Takahashi, 2006 The Xbox 360 Uncloaked is the result of more than a hundred interviews, many at

the highest levels of Microsoft, as well as countless months of independent investigative reporting. With unprecedented access, San Jose Mercury News Technology and Gaming Writer Dean Takahashi goes beyond the official story to reveal a true insider's look at the creation of the XBox 360 and Microsoft's multi-billion dollar gamble to become a leading force in the global video game industry. Sony, Nintendo, Electronic Arts, the entire Microsoft Xbox 360 team, and the industry's most celebrated game developers -- all of the major players are included in this captivating book.

What Will I Do Differently and Similarities when I Am in the Business Industry in the Different Sectors of the Industries? Abraham Babajide Sote, 2020-12-30 I am a big favourite of Japanese special effects series like Ultraman, Kamen Rider & super sentai, not power rangers, and other Japanese tokusatsu franchise not toei company ltd & Tsuburaya production. My novel content contains spoilers for my streaming platform and my version of PSP & PS vita handheld console. MY novels contain how the video content of my streaming service is created by 90 per cent of special effects like Japanese famous series and 10 per cent VFX with motion capture for 3D anime and western animation series. My novels contain how my content on my streaming is done during pre-production, pre-production, and post-production for my streaming services and video game production. Some of the content on the streaming service will not be for children like some comic books, visual novels, Manga, and Novels that are for teenagers, young adults, and adults from different backgrounds, countries, and cultures. My streaming platform will use movie and television rating systems from different rating associations. My streaming services server will be Intel, AMD and other servers for my server brand for better video experience. My video game console

will use AMD/ Intel, IBM dedicated gaming server and cloud gaming for a better gameplay distribution to my gaming console and other devices. My companies will have AMD or Intel server for the AI development, smart cities, smart vehicles, data centre for my device, and my company space satellite, game development with MY in-house developed semiconductor, GPU, CPU, Memory RAM, SSD hard disk and APU for a better game experience, for my aerospace, technology but for my movie and television production studios I will use AMD & Intel server & Workstation. My streaming service and gaming console will be content based on African, Japanese, Korean, European, Britain folks, Egyptian, Greek, and American mythology history games, anime, western animation, a live-action movie, and TV show different from Hollywood versions of mythology series. All of the hardware for my server that is going to be used for my streaming platform will be made by my team with the in-house developed software for the streaming services similar to Netflix, HBO Max, Disney plus, Funimation, Crunchyroll and HULU. My corporation will design and manufacture smartphones, gaming smart devices, smart TV, smart glasses, virtual reality headset, technology, aerospace, electronics, home appliances, and other projects for consumer goods. I will be using only an AMD processor for movie and television for GPU rendering speed, for Artificial intelligence research for my personal project and data centre but with my personal service and security system. I will use the AMD server for the cloud gaming server and their other server for my enterprise and personal projects. I will be patenting a game console inspired like PlaystationPortable. PlayStation vita, Gamecube, PlayStation 3, Wii / Wii u, Xbox 360, Xbox One, Playstation 5, Xbox series X/S & Nintendo switch & lite for template and dimensions but with different hardware, software better

security.

What Video Games Have to Teach Us About Learning and Literacy. Second Edition James Paul Gee, 2014-12-02 James Paul Gee begins his classic book with I want to talk about video games--yes, even violent video games--and say some positive things about them. With this simple but explosive statement, one of America's most well-respected educators looks seriously at the good that can come from playing video games. In this revised edition of *What Video Games Have to Teach Us About Learning and Literacy*, new games like *World of Warcraft* and *Half Life 2* are evaluated and theories of cognitive development are expanded. Gee looks at major cognitive activities including how individuals develop a sense of identity, how we grasp meaning, how we evaluate and follow a command, pick a role model, and perceive the world.

Hacker, Hoaxer, Whistleblower, Spy Gabriella

Coleman, 2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside–outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious

subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

The Third Industrial Revolution Jeremy Rifkin, 2011-10-04 The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful Third Industrial Revolution. He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an energy internet, just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The

European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

Consumers in Europe Statistical Office of the European Communities, 2009 This publication brings together the most relevant and useful information for the evaluation and development of consumer policy. The material includes data from various sources including EUROSTAT, other Commission services as well as other surveys and studies. This edition focuses on services of general interest. Although the prime objective of this publication is to help policy-makers at the European level to better understand the needs of consumers in general, the publication should also be of use to other stakeholders interested in consumer affairs, such as consumer organisations, other public authorities and even suppliers of goods and services. This is the third edition of a series of publications. Data cover the period 1999-2006.
