The Procrastination Economy Ethan Tussey, 2020-04-01 2018 Outstanding Academic Title, given by Choice Magazine How mobile devices make our in-between moments valuable to media companies while also providing a sense of control and connection In moments of downtime – waiting for a friend to arrive or commuting to work – we pull out our phones for a few minutes of distraction. Just as television reoriented the way we think about living rooms, mobile devices have taken over the interstitial spaces of our everyday lives. Ethan Tussey argues that these in-between moments have created a procrastination economy, an opportunity for entertainment companies to create products, apps, platforms, subscription services, micropayments, and interactive opportunities that can colonize our everyday lives. But as businesses commoditize our free time, and mobile devices become essential tools for promotion, branding and distribution, consumers are using these devices as a means of navigating public and private space. These devices are not just changing the way we spend and value our time, but also how we interact with others and transform our sense of the politics of space. By examining the four main locations of the procrastination economy—the

workplace, the commute, the waiting room, and the “connected” living room—Ethan Tussey illuminates the relationship between the entertainment industry and the digitally empowered public.

Net Neutrality and the Battle for the Open Internet Danny Kimball, 2022-08-24 “Net neutrality,” a dry but crucial standard of openness in network access, began as a technical principle informing obscure policy debates but became the flashpoint for an all-out political battle for the future of communications and culture. Net Neutrality and the Battle for the Open Internet is a critical cultural history of net neutrality that reveals how this intentionally “boring” world of internet infrastructure and regulation hides a fascinating and pivotal sphere of power, with lessons for communication and media scholars, activists, and anyone interested in technology and politics. While previous studies and academic discussions of net neutrality have been dominated by legal, economic, and technical perspectives, Net Neutrality and the Battle for the Open Internet offers a humanities-based critical theoretical approach, telling the story of how activists and millions of everyday people, online and in the streets, were able to challenge the power of the phone and cable corporations that historically dominated communications policy-making to advance equality and justice in media and technology.

**Social TV** Mike Proulx, Stacey Shepatin, 2012-01-26 The Internet didn’t kill TV! It has become its best friend. Americans are watching more television

Mobile and tablet devices allow us to watch and experience television whenever and wherever we want. And "connected TVs" blend web and television content into a unified big screen experience bringing us back into our living rooms. Social TV examines the changing (and complex) television landscape and helps brands navigate its many emerging and exciting marketing and advertising opportunities. Social TV topics include: Leveraging the "second screen" to drive synched and deeper brand engagement Using social ratings analytics tools to find and target lean-forward audiences Aligning brand messaging to content as it travels time-shifted across devices Determining the best strategy to approach marketing via connected TVs Employing addressable TV advertising to maximize content relevancy Testing and learning from the most cutting-edge emerging TV innovations The rise of one technology doesn't always mean the end of another. Discover how this convergence has created new marketing opportunities for your brand.

At a Tipping Point United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2015

Captive Audience Susan Crawford, 2013-01-08 Ten years ago, the United States stood at the forefront of the Internet revolution. With some of the fastest speeds and lowest prices in the world for high-speed Internet access, the nation was poised to be the global leader in the new knowledge-based economy. Today that global competitive advantage has all but vanished because of a series of government decisions and resulting monopolies that have allowed

dozens of countries, including Japan and South Korea, to pass us in both speed and price of broadband. This steady slide backward not only deprives consumers of vital services needed in a competitive employment and business market—it also threatens the economic future of the nation. This important book by leading telecommunications policy expert Susan Crawford explores why Americans are now paying much more but getting much less when it comes to high-speed Internet access. Using the 2011 merger between Comcast and NBC Universal as a lens, Crawford examines how we have created the biggest monopoly since the breakup of Standard Oil a century ago. In the clearest terms, this book explores how telecommunications monopolies have affected the daily lives of consumers and America's global economic standing.

Binge TV Emil Steiner,2023-03-24 For the first 70 years of television, broadcasters dictated the terms of the viewing experience, deciding not only when but how much of a program an audience could watch. Binge-watching destroyed that model by placing control of the experience in the hands of the viewer. In this book, media scholar Emil Steiner chronicles the technological and cultural struggle between broadcasters and viewers, which reached a climax in the early 2010s with the emergence of streaming video platforms. Through extensive interviews and archival research, this groundbreaking project traces the history of binge-watching from its idiot box roots to the new normal of Peak TV. Along the way, Steiner exposes the news campaigns waged by disruptive technology companies that exploited a long-simmering, revolutionary narrative of viewer empowerment to take over the broadcast industry. Binge-watching, an individual's act of gaining control and losing control through the remote control, exposed a debate that had been raging since the first TV set was turned on--one that asks, Who controls the story?
