Methods to Overcome the Financial and Money Transfer Blockade Against Palestine and Any Country Suffering from Financia Hidaia Mahmood Alassouli,2023-01-06 It is surprising although the electronic currency transfer has become the trend of the century with the developments of crypto currency block chain technology, central and decentralized platforms, and currency wallets, which reflects the extent of progress in money transfer in this era, you find large websites that operate with a sterile racist mentality, such as PayPal, Skrill and others that ban residents of the Palestinian Authority areas just because they are Palestinians. Methods to Overcome the Financial and Money Transfer Blockade against Palestine and any Country Suffering from Financial Blockade Dr. Hidaia Mahmood

Alassouli,2021-09-06 Online shopping and online money transfer have become an urgent necessity for all citizens of the world. One of the difficulties I encountered in electronic money transfer and online shopping is the financial blockade against the Palestinians. It is surprising although the electronic currency transfer has become the trend of the century with the developments of crypto currency block chain technology, central and decentralized platforms, and unlimited digital currency wallets, which reflects the extent of progress in currency conversion in this era. Most cryptocurrency platforms do not discriminate people on the basis of location or nationality. Everyone has the right to open account with them, and every person is responsible for securing his account. On the contrary, you find large websites that operate with a sterile racist mentality, such as PayPal, Skrill and others that ban residents of the Palestinian Authority areas just because they are Palestinians. For example, PayPal is the most important electronic wallet for electronic payment, is prohibited only for the residents of the Palestinian territories. And if we open accounts outside Palestine, the account will be closed immediately. And there are also other large sites that follow the same policy as Skrill and eBay. I also surprised that most of the electronic banks or electronic wallets that deal in the fiat currencies such as USD and EURO refuse to activate the accounts of the Palestinians. With the exception of cryptocurrency platforms so far, they do not put obstacles against the Palestinians. And even the banks and wallets that agree to open accounts to Palestinian people, they do not support withdrawals to a Palestinian bank, whether in euros, dollars, or any other currency. Other difficulty I encountered that the electronic banks and wallets that deal only with fiat currencies such as USD and EURO require that you not don't deposit, withdraw, or deal through the account with any digital crypto currency platforms. In the event of making money transfer with any digital crypto currency platform, the account will be suspended. So, the electronic banks and wallets that only support the fiat currencies for withdrawal and deposit consider digital currencies as suspicious and prohibited currencies. Also, most websites don't accept ordering Visa/Master Card to Palestine region. Hence, I ask all concerned parties around the world to work to stop the discrimination and siege against the Palestinians by banks and electronic wallets. In this report I will provide Summary of the difficulties I encountered in electronic money transfer and online shopping due to the financial blockade against the Palestinians. And I will present some methods to overcome the financial and money transfer blockade against Palestine and similar countries facing from same issue. This report consists from the following parts: 1. Curb Your Enthusiasm: The Fintech Hype Meets Reality in the Remittances Market Tito Nícias Teixeira da Silva Filho,2022-12-02 Fintech has become one of the most popular topics among policymakers and experts. It usually comes with the qualifier "disruptive". Thus, the hype is easy to understand: fintech would upend the financial system due to its disruptive nature, as it would allow financial services to be completed faster, cheaper, and more efficiently. Indeed, many have predicted that the remittances market was on the verge of being disrupted as remittances are considered too costly while remittance service providers inefficient, opaque, and outdated. Therefore, there seems to be no better setting for assessing the allegedly disruptive effects of fintech. Against that background, this paper investigates how those predictions have fared so far. Contrary to expectations, it found that instead of disrupting incumbents fintechs have increasingly been entangled with them. Therefore, not only there is no evidence of disruption, but it is unlikely to occur in the foreseeable future. Even so, the paper argues that fintechs play an important role in the remittances market.

Virtual Homelands Madhavi Mallapragada,2013-10-15 The internet has transformed the idea of home for Indians and Indian Americans. In Virtual Homelands: Indian Immigrants and Online Cultures in the United States, Madhavi Mallapragada analyzes home pages and other online communities organized by diasporic and immigrant Indians from the late 1990s through the social media period. Engaging the shifting aspects of belonging, immigrant politics, and cultural citizenship by linking the home page, household, and homeland as key sites, Mallapragada illuminates the contours of belonging and reveals how Indian American struggles over it trace back to the web's active mediation in representing, negotiating, and reimagining home. As Mallapragada shows, ideologies around family and citizenship shift to fit the transnational contexts of the online world and immigration. At the same time, the tactical use of the home page to make gender, racial, and class struggles visible and create new modes for belonging implicates the web within complex political and cultural terrain. On e-commerce, community, and activist sites, the recasting of

home and homeland online points to intrusion by public agents such as the state, the law, and immigration systems in the domestic, the private, and the familial. Mallapragada reveals that the home page may mobilize to reproduce conservative narratives of Indian immigrants' familial and citizenship cultures, but the reach of a website extends beyond the textual and discursive to encompass the institutions shaping it, as the web unmakes and remakes ideas of India and America.

Digital Defense Joseph Pelton,Indu B. Singh,2015-10-16 Drs. Pelton and Singh warn of the increasing risks of cybercrime and lay out a series of commonsense precautions to guard against individual security breaches. This guide clearly explains the technology at issue, the points of weakness and the best ways to proactively monitor and maintain the integrity of individual networks. Covering both the most common personal attacks of identity fraud, phishing, malware and breach of access as well as the larger threats against companies and governmental systems, the authors explain the vulnerabilities of the internet age. As more and more of life's transactions take place online, the average computer user and society at large have a lot to lose. All users can take steps to secure their information. Cybercrime is so subtle and hidden, people can ignore the threat until it is too late. Yet today about every three seconds a person is hit by some form of cyber attack out of the blue. Locking the "cyber-barn door" after a hacker has struck is way too late. Cyber security, cyber crime and cyber terrorism may seem to be intellectual crimes that don't really touch the average person, but the threat is real. Demystifying them is the most important step and this accessible explanation covers all the bases.
