**Motivation and Second Language Acquisition** Robert C. Gardner,2010 Offering a historical and empirical account, this book provides a comprehensive overview of the socio-educational model of second language acquisition. This approach to understanding motivational variables that promote success in the learning of a second or foreign language - distinguishing between language classroom motivation and language learning motivation - is a major one in the history of this field of research. Chapters include a discussion of the definition and measurement of motivation; historical foundations of the model; recent studies with the International Attitude Motivation Test Battery for English as a foreign language in different countries; the implications of the model to the classroom context; and a discussion of criticisms and misconceptions of the model. The book provides graduate students and researchers with unique coverage of this research-oriented approach as well as serving as a source book for the area. It is ideal for courses on motivation in second language learning, or as a supplemental text for research-oriented courses in applied linguistics, educational psychology, or language research in general.

**Motivation and Second Language Acquisition** Zoltán Dörnyei,Richard Schmidt,Richard W. Schmidt,2001 This volume - the second in this series concerned with motivation and foreign language learning - includes papers presented at a colloquium on second language motivation at the American Association for Applied Linguistics as well as a number of specially commissioned surveys.

**Contemporary Language Motivation Theory** Ali H. Al-Hoorie,Peter D. MacIntyre,2019-11-18 This book brings together contributions from the leaders of the language learning motivation field. The varied chapters demonstrate how Gardner’s work remains integral to a diverse range of contemporary theoretical issues underlying the psychology of language, even today, 60 years after the publication of Gardner and Lambert’s seminal 1959 paper. The chapters cover a wide selection of topics related to applied linguistics, second language acquisition, social psychology, sociology, methodology and historical issues. The book advances thinking on cutting-edge topics in these diverse areas, providing a wealth of information for both students and established scholars that show the continuing and future importance of Gardner and Lambert’s ideas.

**The Psychology of the Language Learner** Zoltán Dörnyei,2014-04-04 Research results over the past decades have consistently demonstrated that a key reason why many second language learners fail--while some learners do better with less effort--lies in various learner attributes such as personality traits, motivation, or language aptitude. In psychology, these attributes have traditionally been called individual differences. The scope of individual learner differences is broad--ranging from creativity to learner styles and anxiety--yet there is no current, comprehensive, and unified volume that provides an overview of the considerable amount of research conducted on various language learner differences, until now. Each chapter in this new volume focuses on a different individual difference variable. Besides a review of the relevant second language literature, Zoltán Dörnyei presents a concise overview of the psychological research involving each topic. A key concern for the author has been to define the various learner factors as measurable constructs and therefore the discussion includes a summary of the most famous tests and questionnaires in each domain. A wide range of readers will benefit from this book--students in linguistics, applied linguistics, modern languages, and psychology programs; second language teachers participating in in-service training courses; and researchers in second language acquisition and psychology.

**Second Language Learning and Language Teaching** Vivian Cook,2016-05-05 Second Language Learning and Language Teaching provides an introduction to the application of second language acquisition research to language teaching. Assuming no previous background in second language acquisition or language teaching methods, this text starts by introducing readers to the basic issues of second language acquisition research. It then examines how people learn particular aspects of the second language, such as grammar, vocabulary, pronunciation and the writing system, and at the strategies they adopt in their learning and the differences between individuals. Final chapters look at second language learning in a broader context - the goals of language teaching and how teaching methods relate to SLA research. This newly updated fifth edition builds on the comprehensive scope of earlier editions while also addressing more recent developments in the field, particularly multilingual approaches to language teaching.

Motivation, Language Identity and the L2 Self Zoltán Dörnyei,Ema Ushioda,2009-01-12 Due to its theoretical and educational significance within the language learning process, the study of L2 motivation has been an important area of second language acquisition research for several decades. Over the last few years L2 motivation research has taken an exciting new turn by focusing increasingly on the language learner’s situated identity and various self-perceptions. As a result, the concept of L2 motivation is currently in the process of being radically reconceptualised and re-theorised in the context of contemporary notions of self and identity. With contributions by leading European, North American and Asian scholars, this volume brings together the first comprehensive anthology of key conceptual and empirical papers that mark this important paradigmatic shift.
