Information Trapping Tara Calishain,2006-12-07 How many times have you run a Google search that resulted in thousands of results? With over 8 billion pages online and more posted every day, the Web more than likely contains the information you're looking for — if only you could find it. In Information Trapping: Real-Time Research on the Web, Internet-search-engine expert Tara Calishain makes researching more efficient and rewarding for anyone for whom the Web is an indispensable tool — academics, journalists, scientists, and professionals, as well as bloggers, genealogists, and hobbyists. She does so by teaching the latest techniques for building automated information-gathering systems. As an alternative to the typical one-time search for information, Tara demonstrates how readers can use RSS feeds, page monitoring tools, and other software to set up information streams of many different data types — from text to multimedia to conversations — for capture and review.

IssueWeb Karen R. Diaz, Nancy O'Hanlon, 2004-03-30 Finding reputable sources can be tricky when researching controversial topics, particularly when using the World Wide Web. This invaluable sourcebook helps you sift through the mountains of information in cyberspace and take full advantage of all the Web has to offer. Valuable instruction on researching hot topics, as well as techniques for evaluating Web information sources, is provided through 40 Issue Briefs. Each brief includes background on the topic, an outline of key controversies, suggested search terms for use in search engines and other databases, and lists of relevant websites divided into five categories—reference, law/legislation, news, data, and advocacy. Appendices of think-tank and opinion magazine sites provide additional sources for extending research. Students can browse the Issue Briefs to find interesting research topics and use the sites listed in the guide to locate information for projects. Instructors teaching research skills, critical thinking, and source evaluation can use IssueWeb to direct their students to high quality information sources on the Web. Additionally, librarians working in school, public, and college libraries can use it as a reference source to assist their clientele. This tremendously useful sourcebook will prove valuable to high school students, undergraduates, instructors, and the librarians who serve them.

The Everyday Internet All-in-One Desk Reference For Dummies Peter Weverka, 2005-04-29 The Internet made its way into everyday life as a tool people used occasionally to keep in touch with friends and gather information for personal or business needs. Now, thanks to high-speed connections, wireless access, and safe and powerful Web sites, the Internet has become the main means for handling personal finance, shopping for big-ticket items, and communicating with people around the world. It's to the point where many people can't get through the day without turning to the Internet to get things accomplished. The Everyday Internet All-in-One Desk Reference For Dummies is the complete resource for casual Internet users who are looking to make the jump to becoming experienced navigators of the wired world. Written by Internet guru Peter Weverka, this book walks readers through the basics of going online before heading into the realms of online bargain shopping, bill paying, personal finance, keeping up with hobbies, and even setting up an online business. * The material is broken into mini-books that make it easier to find an answer and keep moving along the online highway * This book clarifies all the mysteries of how to use the Internet to make everyday life simpler * Covers key Internet properties like eBay, Google, and Yahoo! as well as favorite tasks like playing games, tracing family roots, and keeping a diary online

Information Modelling and Knowledge Bases XXIII J. Henno, Y. Kiyoki, T. Tokuda, 2012-01-18 Information modelling and knowledge bases have become hot topics, not only in academic communities concerned with information systems and computer science, but also wherever information technology is applied in the world of business. This book presents the proceedings of the 21st European-Japanese Conference on Information Modelling and Knowledge Bases (EJC 2011), held in Tallinn, Estonia, in June 2011. The EJC conferences provide a worldwide forum for researchers and practitioners in the field to exchange results and experiences achieved in computer science and related disciplines such as conceptual analysis, design and specification of information systems, multimedia information modelling, multimedia systems, software engineering, knowledge and process management, cross cultural communication and context modelling. Attention is also paid to theoretical disciplines including cognitive science, artificial intelligence, logic, linguistics and analytical philosophy. The selected papers (16 full papers, 9 short papers, 2 papers based on panel sessions and 2 on invited presentations), cover a wide range of topics, including database semantics, knowledge representation, software engineering, www information management, context-based information retrieval, ontology, image databases, temporal and spatial databases, document data management, process management, cultural modelling and many others. Covering many aspects of system modelling and optimization, this book will be of interest to all those working in the field of information modelling and knowledge bases.
