**The Platform Economy** Maxim I. Inozemtsev, Elina L. Sidorenko, Zarina I. Khisamova, 2022-09-27 Digital ecosystems formed on the basis of digital platforms are significantly transforming modern reality. Today it is difficult to imagine life without LinkedIn, Facebook, or Amazon. The total income generated by them is estimated at trillions of dollars. Digital platforms are the main driving force of the digital economy. The impact and growth of digital platforms on social and economic processes today is difficult to overestimate. The pandemic has further deepened their influence on society, as almost all social communication and economic activity has moved to online format on digital platforms. The growth of the share of digital platforms in various segments of the economy was so rapid that regulators around the world were not ready for such large-scale transformations. All this has caused a number of crisis phenomena, when IT giants have grown into an independent branch of "power", which has direct access to the personal and financial data of millions of citizens, and moreover, have the opportunity to directly influence them. This monograph is a unique publication in which, for the first time, a large-scale and sufficiently deep team of experts and scientists from various countries of the world studied in detail the multidimensional phenomenon of the "platform economy" and the measures taken by states to regulate these processes. The book will be interesting to a wide range of readers interested in the problems of the development of digital platforms and the developing branch of law and science – the law of digital platforms.

reluctant to invest in them. This book presents a comprehensive overview of Russian multinationals. It discusses the rise of Russian multinationals, examines Russian multinationals' activities in key sectors, analyses the relationship between Russian multinationals and the Russian government and between Russian multinationals and international investors, and concludes by assessing how Russian multinationals are likely to develop in future.

As important as it is ubiquitous, SEO is needed for the development of a brands website and online reputation. When a website is live, one of its priorities is to drive organic traffic towards it, in order to attract visibility. In order to achieve such an aim, many proactive measures must be put in place, advice followed and tips implemented. There should also be an understanding of the holistic connection between a websites HTML sources, content management system and its relationship with external websites too (SEO off-site). There are many different search engines in the world and depending on the international boundary, one web browser usually dominates the landscape. Google features prominently in SEO Management, but this book also goes into detail regarding Baidu SEO (China), Yandex SEO (Russia) and Naver SEO (South Korea).
