Earning Money Online through Crypto Currency Airdrops, Mining, Faucets and Trading Dr. Hedaya Mahmood Alasooly, 2020-09-21 A crypto faucet is a website that will give you satoshis in exchange for viewing ads or

completing simple tasks. Crypto currency mining is the process in which transactions between users are verified and added into the block chain. The process of mining is also responsible for introducing new coins into the existing circulating supply and is one of the key elements that allow cryptocurrencies to work as a peer-to-peer decentralized network, without the need for a third party central authority. Cloud mining happens in the cloud. That basically means that the hardware used for mining is not physically located at your premises, but it is accessed remotely through the internet. Methods to Overcome the Financial and Money Transfer Blockade against Palestine and any Country Suffering from Financial Blockade Dr. Hidaia Mahmood Alassouli, 2021-09-06 Online shopping and online money transfer have become an urgent necessity for all citizens of the world. One of the difficulties I encountered in electronic money transfer and online shopping is the financial blockade against the Palestinians. It is surprising although the electronic currency transfer has become the trend of the century with the developments of crypto currency block chain technology, central and decentralized platforms, and unlimited digital currency wallets, which reflects the extent of progress in currency conversion in this era. Most cryptocurrency platforms do not discriminate people on the basis of location or nationality. Everyone has the right to open account with them, and every person is responsible for securing his account. On the contrary, you find large websites that operate with a sterile racist mentality, such as PayPal, Skrill and others that ban residents of the Palestinian Authority areas just because they are Palestinians. For example, PayPal is the most important electronic wallet for electronic payment, is prohibited only for the residents of the Palestinian territories. And if we open accounts outside Palestine, the account will be closed immediately. And there are also other large sites that follow the same policy as Skrill and eBay. I also surprised that most of the electronic banks or electronic wallets that deal in the fiat currencies such as USD and EURO refuse to activate the accounts of the Palestinians. With the exception of cryptocurrency

platforms so far, they do not put obstacles against the Palestinians. And even the banks and wallets that agree to open accounts to Palestinian people, they do not support withdrawals to a Palestinian bank, whether in euros, dollars, or any other currency. Other difficulty I encountered that the electronic banks and wallets that deal only with fiat currencies such as USD and EURO require that you not don't deposit, withdraw, or deal through the account with any digital crypto currency platforms. In the event of making money transfer with any digital crypto currency platform, the account will be suspended. So, the electronic banks and wallets that only support the fiat currencies for withdrawal and deposit consider digital currencies as suspicious and prohibited currencies. Also, most websites don't accept ordering Visa/Master Card to Palestine region. Hence, I ask all concerned parties around the world to work to stop the discrimination and siege against the Palestinians by banks and electronic wallets. In this report I will provide Summary of the difficulties I encountered in electronic money transfer and online shopping due to the financial blockade against the Palestinians. And I will present some methods to overcome the financial and money transfer blockade against Palestine and similar countries facing from same issue. This report consists from the following parts: 1. Summary of the difficulties I encountered in electronic money transfer and online shopping due to the financial blockade against the Palestinians. 2. The problem of Google banning the residents of Palestine from Google Payment Service GPAY. 3. Scandals of some websites for publishing books such as Ingramspark.com and other publishing websites that arbitrarily closed my accounts without reasons. 4. My detailed complaint about Ingramspark.com that closed four accounts for publishing for me without the slightest reason: 5. Summary of best bank transfer methods I realized during my evaluations. 6. Transferwise.com. 7. Payoneer.com. 8. Paysera.com. 9. Webmoney.com 10. Paytiz.com - eCurrency Money Exchanger. 11. Airtm.com. 12. Skrill.com. 13. Using WesternUnion.com for money transfer. 14. Using MoneyGram.com for money transfer. 15. Using WorldRemit.com for money transfer. 16. Using Xoom.com for money transfer. 17. Using ACEMoneytransfer.com for money transfer. 18. Examples of some successful tested bank money transfers. 19. Examples of some failed tested bank money transfers. 20. Some of my Arabic articles about the financial blockade against the Palestinians.

Digital Currency Fouad Sabry, 2021-11-25 What Is Digital Currency While all cryptocurrencies can be termed as digital currencies, the reverse is not true. Cryptocurrencies are managed by a computer algorithm, while digital currencies are backed by an authority Now, digital currencies exhibit properties like other currencies, but do not have a physical form like that of banknotes and coins. You can receive, transfer and / or exchange digital currency for another currency. For example, it can be used to pay for goods and services, in an online store. Cryptocurrencies like Bitcoin and Ethereum are pieces of computer code that are not managed by any authority. Creation, as well as use, is maintained through a distributed ledger, typically a blockchain, that serves as a public financial transaction database. So, cryptocurrencies typically use decentralized control where there is no presence of a third party to have authority over the investor. One of the most significant differences between digital currency and cryptocurrency is the underlying technology. Digital currency is a digital format of fiat money whereas cryptocurrencies are built on the blockchain. Cryptocurrencies are not under the control of any

single entity. Digital currency, however, is under the direct control of the central bank. When it comes to digital currency, the issuing authority is of prime importance. Macroeconomics Sammy Gentry & Tanner Wilkerson, 2018-08-18 Macroeconomics is a branch of economics dealing with the performance, structure, behavior, and decision-making of an economy as a whole. This includes national, regional, and global economies. Macroeconomics and microeconomics, a pair of terms coined by Ragnar Frisch, are the two most general fields in economics. In contrast to macroeconomics, microeconomics is the branch of economics that studies the behavior of individuals and firms in making decisions and the interactions among these individuals and firms in narrowly-defined markets. Macroeconomics is the economics subfield of study that considers aggregate behaviour, i.e., the study of the sum of individual economic decisions. In other words, it is the study of the entire economy in terms of the total amount of goods and services produced, total income earned, the level of employment of productive resources, and the general behaviour of prices. Macroeconomics can be used to analyse how best to influence government policy goals. The present book provides all primary aspects of macroeconomics, elaborately. It explains the relationships between macroeconomic variables and their implications for macroeconomic policy. It also aims to develop a broad coherent framework for thinking about the fundamental

problems in macroeconomics. The book has been supplemented with figures, tables and equations wherever required and presented in a lucid manner for easy understanding by the readers. The book will be found highly useful by students and teachers of economics.
