**An Ounce of Prevention** Johanna G. Wellheiser, Jude Scott, Canadian Archives Foundation, 2002 Fire, flood, earthquake, vandalism, a terrorist attack--the issues of safety measures, emergency response, and disaster recovery have now become an important part of the planning strategies for most organizations. For the information organization, such as a library, archives, or record center, this responsibility has taken on new dimensions with the proliferation of various forms of electronic media. The authors take the approach that disaster recovery planning must touch every department of an organization and that emergency response must be a carefully mapped strategy. This broad-based approach to integrated disaster planning explains each phase of disaster planning, with

chapters covering prevention planning, protection planning, preparedness planning, response planning, and recovery planning. The authors consider collections, records, facilities, and systems and include a chapter on post-disaster planning as well. The authors also cover federal and local assistance programs and list other sources for financial assistance. Although the main thrust of the book is the protection of documents, human safety in case of disaster is stressed explicitly and implicitly throughout. Indispensable for every information organization.

McCormack, 2010-10-01 This treatise on Canadian intellectual property law, written by members of the I.P. practice group of Stikeman, Elliott, is a comprehensive source for answering many of the I.P. questions that arise for both lawyers and corporate counsel. With technologies and new ideas driving today's economy as never before, intellectual property is a key factor in business success. To meet this challenge, Stikeman, Elliott takes a multi-disciplinary approach to the practice. Their team comprises dynamic and highly creative professionals, including intellectual property, corporate and international trade lawyers, who bring a wide range of training and experience to every transaction. This expertise has been critical to businesses throughout Canada and around the world who want to preserve, protect and exploit their intellectual property to the fullest while reducing the risks of jeopardizing their intellectual property assets.
