The Frackers Gregory Zuckerman, 2013 Meet the Frackers. George Mitchell, the son of a Greek goatherder, who tried to extract gas from rock that experts deemed worthless. He faced an unexpected obstacle in his quest to change history. Aubrey McClendon, the charismatic descendant of an Oklahoma energy dynasty, who scored billions leading a land grab. He wasn't prepared for the shocking fallout of his discoveries. Tom Ward, who overcame a troubled childhood to become one of the nation's wealthiest men. He could handle natural-gas fields but had more trouble with a Wall Street power broker. Harold Hamm, the son of poor farmer, who believed America had more oil than anyone imagined. Hamm was determined to find the crude before others caught on. Charif Souki, the dashing Lebanese immigrant who saw his career crumble and his fortune disintegrate, leaving one last, unlikely chance for success. Mark Papa, the Enron castoff who panicked when he realized a resurgence of American natural gas was at hand: one that his company wasn't prepared for. Dirshuni Tamar Biala, 2022-04-05 A unique compilation of contemporary women's midrashim. Dirshuni: Contemporary Women's Midrash, is the first-ever English edition of a historic collection of midrashim composed by Israeli women, which has been long-anticipated by multiple American audiences, including synagogues, rabbinical seminaries, adult learning programs, Jewish educators, and scholars of gender and religion. Using the classical forms developed by the ancient rabbis, the contributors express their religious and moral thought and experience through

innovative interpretations of scripture. The women writers, from all denominations and beyond, of all political stripes and ethnic backgrounds, contribute their Torah to fill the missing half of the sacred Jewish bookshelf. This book reflects dramatic changes in the agency of women in the world of religious writings. The volume features a comprehensive introduction to Midrash for the uninitiated reader by the distinguished scholar Tamar Kadari and extensive annotation and commentary by Tamar Biala.

Disciples' Literal New Testament Michael Magill, 2011 If You Love God's Word You Will Love This New Testament! The Disciples' Literal New Testament sets you free from our artificial 460 year old chapter and verse structure, replacing it with paragraphing that reflects the flow of thought in the original Greek writings. Paragraph headings make that flow of thought explicit to you, speeding your understanding of the NT books. This translation retains the writing style of the apostles themselves, rather than transforming their Greek ways of writing into an elegant or contemporary English writing style, as has been beautifully done so many times. It is the same translation as the author's New Testament TransLine, first published by Zondervan in 2002. Now you can read the New Testament as the original writers intended it, and see it with a clarity formerly available only to those who could carefully study their Greek New Testament. You can even see the difference in writing style between Matthew, Mark and Luke! Used along with your standard Bible version, you will profit from both methods of translation. *Easily grasp the relationship of the whole and the parts of each book with the big-picture overview outlines that use the words of the original author. *Gain quick insight into the flow of thought from descriptive paragraph headings that summarize the main point of each paragraph in its

context. *You can visually follow the apostles' thinking because the 'Intelligent Paragraphing' visually displays their main and subordinate thoughts. *The hindrance to your understanding caused by our artificial chapter and verse structure is eliminated by paragraphing based on the Greek writings. *You will more fully appreciate the minds and thinking patterns and intent of the original writers because the translation corresponds more closely to their words and their grammar and their sentence structure. *Deepen and expand your understanding of the New Testament by meditating on the notes containing alternative renderings, explanations of what is being said, and different views of the meaning.

Understanding Securitisation Theory Thierry

Balzacq,2010-09-13 This volume aims to provide a new framework for the analysis of securitization processes, increasing our understanding of how security issues emerge, evolve and dissolve. Securitisation theory has become one of the key components of security studies and IR courses in recent years, and this book represents the first attempt to provide an integrated and rigorous overview of securitization practices within a coherent framework. To do so, it organizes securitization around three core assumptions which make the theory applicable to empirical studies: the centrality of audience, the co-dependency of agency and context and the structuring

force of the dispositif. These assumptions are then investigated through discourse analysis, process-tracing, ethnographic research, and content analysis and discussed in relation to extensive case studies. This innovative new book will be of much interest to students of securitisation and critical security studies, as well as IR theory and sociology. Thierry Balzacq is holder of the Tocqueville Chair on Security Policies and Professor at the University of Namur. He is Research Director at the University of Louvain and Associate Researcher at the Centre for European Studies at Sciences Po Paris.

The Greatest Trade Ever Gregory

Zuckerman,2009-11-03 In 2006, hedge fund manager John Paulson realized something few others suspected--that the housing market and the value of subprime mortgages were grossly inflated and headed for a major fall. Paulson's background was in mergers and acquisitions, however, and he knew little about real estate or how to wager against

housing. He had spent a career as an also-ran on Wall Street. But Paulson was convinced this was his chance to make his mark. He just wasn't sure how to do it. Colleagues at investment banks scoffed at him and investors dismissed him. Even pros skeptical about housing shied away from the complicated derivative investments that Paulson was just learning about. But Paulson and a handful of renegade investors such as Jeffrey Greene and Michael Burry began to bet heavily against risky mortgages and precarious financial companies. Timing is everything, though. Initially, Paulson and the others lost tens of millions of dollars as real estate and stocks continued to soar. Rather than back down, however, Paulson redoubled his bets, putting his hedge fund and his reputation on the line. In the summer of 2007, the markets began to implode, bringing Paulson early profits, but also sparking efforts to rescue real estate and derail him. By year's end, though, John Paulson had pulled off the greatest trade in financial history, earning more than \$15 billion for his firm--a figure that dwarfed George Soros's billion-dollar currency trade in 1992. Paulson made billions more in 2008 by transforming his gutsy move. Some of the underdog investors who attempted the daring trade also reaped fortunes. But others who got the timing wrong met devastating failure, discovering that being early and right wasn't nearly enough. Written by the prizewinning reporter who broke the story in *The Wall Street Journal*, *The Greatest Trade Ever* is a superbly written, fast-paced, behind-the-scenes narrative of how a contrarian foresaw an escalating financial crisis--that outwitted Chuck Prince, Stanley O'Neal, Richard Fuld, and Wall Street's titans--to make financial history.

The Case for Israel Alan Dershowitz, 2011-01-06 The Case for Israel is an ardent defense of Israel's rights,

supported by indisputable evidence. Presents a passionate look at what Israel's accusers and detractors are saying about this war-torn country. Dershowitz accuses those who attack Israel of international bigotry and backs up his argument with hard facts. Widely respected as a civil libertarian, legal educator, and defense attorney extraordinaire, Alan Dershowitz has also been a passionate though not uncritical supporter of Israel.

Social and Political Foundations of Constitutions Denis James Galligan, Mila Versteeg, 2013 This volume analyses the social and political forces that influence constitutions and the process of constitution making. It combines theoretical perspectives on the social and political foundations of constitutions with a range of detailed case studies of constitution making in nineteen different countries. In the first part of the volume, leading scholars analyse and develop a range of theoretical perspectives, including constitutions as coordination devices, mission statements, contracts, products of domestic power play, transnational documents, and as reflection of the will of the people. In the second part of the volume, these theories are examined through in-depth case studies of the social and political foundations of constitutions in countries such as Egypt, Nigeria, Japan, Romania, Bulgaria, New Zealand, Israel, Argentina, and others. The result is a multidimensional study of constitutions as social phenomena and their interaction with other social phenomena. The approach combines social science analysis of the nature of constitutions with case studies of selected constitutions--

The Autism Matrix Gil Eyal, 2013-08-26 Today autism has become highly visible. Once you begin to look for it, you realize it is everywhere. Why? We all know the answer or think we do: there is an autism epidemic. And if it is an epidemic, then we know what must be done: lots of money must be thrown at it, detection centers must be established and explanations sought, so that the number of new cases can be brought down and the epidemic brought under control. But can it really be so simple? This major new book offers a very different interpretation. The authors argue that the recent rise in autism should be understood as an “aftershock” of the real earthquake, which was the deinstitutionalization of mental retardation in the mid-1970s. This entailed a radical transformation not only of the institutional matrix for dealing with developmental disorders of childhood, but also of the cultural lens through which we view them. It opened up a space for viewing and treating childhood disorders as neither mental illness nor mental retardation, neither curable nor incurable, but somewhere in-between. The authors show that where deinstitutionalization went the furthest, as in Scandinavia, UK and the “blue” states of the US, autism rates are also highest. Where it was absent or delayed, as in France, autism rates are low. Combining a historical narrative with international comparison, *The Autism Matrix* offers a fresh and powerful analysis of a condition that affects many parents and children today.

Necessity, Proportionality and the Use of Force by States Judith Gardam, 2004-11-18 There has been considerable debate in the international community as to the legality of the forceful actions in Kosovo in 1999, Afghanistan in 2002 and Iraq in 2003 under the United Nations Charter. There has been consensus, however, that the use of force in all these situations had to be both

proportional and necessary. Against the background of these recent armed conflicts, this 2004 book offers the first comprehensive assessment of the twin requirements of proportionality and necessity as legal restraints on the forceful actions of States. It also provides a much-needed examination of the relationship between proportionality in the law on the use of force and international humanitarian law.

The New Map Daniel Yergin, 2020-09-15 A Wall Street Journal bestseller and a USA Today Best Book of 2020 Named Energy Writer of the Year for The New Map by the American Energy Society “A master class on how the world works.” —NPR Pulitzer Prize-winning author and global energy expert, Daniel Yergin offers a revelatory new account of how energy revolutions, climate battles, and geopolitics are mapping our future The world is being shaken by the collision of energy, climate change, and the clashing power of nations in a time of global crisis. Out of this tumult is emerging a new map of energy and geopolitics. The “shale revolution” in oil and gas has transformed the American economy, ending the “era of shortage” but introducing a turbulent new era. Almost overnight, the United States has become the world’s number one energy powerhouse. Yet concern about energy’s role in climate change is challenging the global economy and way of life, accelerating a second energy revolution in the search for a low-carbon future. All of this has been made starker and more urgent by the coronavirus pandemic and the economic dark age that it has wrought. World politics is being upended, as a new cold war develops between the United States and China, and the rivalry grows more dangerous with Russia, which is pivoting east toward Beijing. Vladimir Putin and China’s Xi Jinping are converging both on energy and on challenging

American leadership, as China projects its power and influence in all directions. The South China Sea, claimed by China and the world's most critical trade route, could become the arena where the United States and China directly collide. The map of the Middle East, which was laid down after World War I, is being challenged by jihadists, revolutionary Iran, ethnic and religious clashes, and restive populations. But the region has also been shocked by the two recent oil price collapses--and by the very question of oil's future in the rest of this century. A master storyteller and global energy expert, Daniel Yergin takes the reader on an utterly riveting and timely journey across the world's new map. He illuminates the great energy and geopolitical questions in an era of rising political turbulence and points to the profound challenges that lie ahead.

This book discusses how this categorisation operates, identifying the legal questions raised. Case studies show how this impacts on issues like detention in armed conflict and the relationship between human rights and humanitarian law.

Developing Reading Comprehension Paula J. Clarke, Emma Truelove, Charles Hulme, Margaret J.

Snowling, 2013-12-04 Developing Reading Comprehension

"In recent years the debate about teaching young children to read has tended to focus upon equipping them with the crucially important knowledge and skills they need to read words accurately in and out of context, that is to say, teaching them how the alphabet works for reading and spelling. While such knowledge and skills are essential, more is required for children to become literate, fluent readers who understand what they read. In short, the goal of reading is comprehension. This book scrupulously examines the obstacles to reading comprehension and exemplifies what can be done to help children overcome them. It is an important and timely contribution to securing high-quality teaching of the range of attributes children need to become fully-fledged readers." Sir Jim Rose, CBE

"The studies by Professors Charles Hulme and Maggie Snowling and their team over two decades based around the Reading Intervention Programme are the most sustained, comprehensive and rigorous research series on reading yet conducted in the UK. Their increasing focus on children who experience the most difficulty in reading is exactly where attention should be directed. This volume summarises the team's achievements to date, and is most eagerly awaited." Greg Brooks, Emeritus Professor of Education, University of Sheffield, Member of European High Level Group of Experts on Literacy

"Developing Reading Comprehension presents a landmark study from the top research team in the UK on how to improve reading comprehension. It's an exemplary masters-level textbook written with undergraduate-level lucidity and approachability." Colin Harrison, Emeritus Professor of Literacy Studies in Education, University of Nottingham

A significant minority of children aged 7-11, despite being able to read fluently and accurately, have difficulty

extracting meaning from text. This detailed guide offers three evidence-based intervention programmes, drawn from the cutting edge of educational psychology, for improving the reading skills of children in this group. It includes a definitive introduction to the characteristics of the ‘poor comprehender profile’, and explains how to monitor and assess students’ experiences and learning outcomes. With invaluable strategies for teachers, psychologists and special educational needs coordinators, the book will help professionals to support learners in their efforts to explore the full richness of language and to read with real understanding.
