Kids on Bikes Jonathan Gilmour,Doug Levandowski,2018 The door to the old house creaks open, the rust on the hinges groaning as you see the dust floating like spores in the air inside. By the faint light of your cheap flashlights, you see the stairs to the upper floor, its railings gnarled and broken like crooked teeth. Their curve makes the stairs seem almost like a hungry grin, and you wonder if their age will support your weight. Still, you must go in. The only question is who will go first? In Kids on Bikes, you'll take on the roles of everyday people grappling with strange, terrifying, and very, very powerful forces that they cannot defeat, control, or even fully understand. The only way to face them is to work together, use your strengths, and know when you just have to run as fast as you can. --

Influence Robert B. Cialdini,1988 Influence: Science and Practice is an examination of the psychology of compliance (i.e. uncovering which factors cause a person to say yes to another's request) and is written in a narrative style combined with scholarly research. Cialdini combines evidence from experimental work with the techniques and strategies he gathered while working as a salesperson, fundraiser, advertiser, and other positions, inside organizations that commonly use compliance tactics to get us to say yes. Widely used in graduate and undergraduate psychology and management classes, as well as sold to people operating successfully in

the business world, the eagerly awaited revision of Influence reminds the reader of the power of persuasion. Cialdini organizes compliance techniques into six categories based on psychological principles that direct human behavior: reciprocity, consistency, social proof, liking, authority, and scarcity.
