Internet Video Culture in China Marc L Moskowitz, 2019-05-08 Examining Internet culture in the People's Republic of China, Taiwan, Hong Kong, and the US, this book analyzes videos which entertain both English and Chinese-speaking viewers to gain a better understanding of cultural similarities and differences. Each of the chapters in the volume studies streaming videos from YouTube and its Chinese counterparts, Todou and Youku, with the book using a combination of interpretative analysis of content, commentary, and ethnographic interviews. Employing a diverse range of examples, from Michael Jackson musical mash-ups of Cultural Revolution visuals, to short clips of Hitler ranting about twenty-first century issues with Chinese subtitles, this book goes on to explore the ways in which traditional beliefs regarding gender, romance, religion, and politics intersect. Looking at how these issues have changed over the years in response to new technologies and political economies, it also demonstrates how they engage in regional, transnational, and global dialogues. Comparing and incorporating the production of videos with traditional media, such as television and cinema, *Internet Video Culture in China* will be useful to students and scholars of Internet and digital anthropology, as well as Cultural Studies and Chinese Studies more generally.

Online Film Production in China Using Blockchain and Smart Contracts Patrice Poujol, 2019-03-04 This book explores the use of Blockchain and smart contract technologies to develop new ways to finance independent films and digital media worldwide. Using case studies of Alibaba and in-depth, on-set observation of a Sino-US coproduction, as well as research collected from urban China, Hong Kong, Europe, and the USA, *Online Film Production in China Using Blockchain and Smart Contracts* explores new digital platforms and what this means for the international production of creative works. This research assesses the change in media consciousness from young urban audiences, their emergence as a potential participative and creative community within dis-intermediated, decentralised and distributed crowdfunding and crowdsourcing models. This research proposes solutions on how these young emerging local creative talents can be identified and nurtured early on, particularly those who now produce creative and artistic audiovisual content whether these works are related to film, Virtual Reality (VR), video game, graphic novels, or music. Ultimately, a new media content finance and production platform implementing blockchain is proposed to bring transparency in the film sector and open doors to emerging artists in digital media. Appropriate for both professionals and academics in the film industry as well as computer science.

China's Disruptors Edward Tse, 2015 Over the past two decades, an unprecedented burst of entrepreneurialism has transformed China's economy from a closed, impoverished, state-run system into a major power in global business. As products in China become more and more sophisticated, and as its companies embrace domestically developed technology, we will increasingly see Chinese goods setting global standards. Meanwhile, companies in the rest of the world wonder how they can access the fast-rising incomes of China's 1.3 billion consumers. Now Edward Tse, a leading global strategy consultant, reveals how China got to this point, and what the country's rise means for the United States and the rest of the world--

Internet Video Data Streaming Ye Tian, Min Zhao, Xinming Zhang, 2017-10-20 This book investigates the problem of reducing operating cost for a video streaming content delivery network (CDN), including both the CDN's energy and traffic costs. It first introduces the key issues and design choices of representative real-world CDNs, and discusses the energy saving techniques for data centers and CDNs. Then, based on a measurement study on a large video streaming CDN, it reveals an inherent conflict between improving a video streaming CDN's energy efficiency for energy saving, and maintaining the CDN's ISP-friendly server selection policy. Further, it discusses a cost-aware capacity provisioning algorithm that not only allows the service capacity of a CDN's server clusters in numerous ISPs to be dynamically planned, but also means that the overall operating cost, including both the energy consumptions and the cross-ISP traffics, can be further optimized. In addition it uses the workload derived from real-world measurement and also implements real values of the actual power and bandwidth prices to evaluate the capacity provisioning algorithm, showing that it can significantly reduce the overall operating cost of a video streaming CDN, and effectively avoid frequent server switches. Lastly, the book outlines a number of potential research directions regarding cost-aware content delivery. The measurement, analysis, and optimization methodologies and results presented in this book are of particular interest to researchers in the Internet and networking area.

Change of Paradigms – New Paradoxes Jocelyne Daems, Eline Zenner, Kris Heylen, Dirk Speelman, Hubert Cuyckens, 2015-10-16 In Paradigm and Paradox, Dirk Geeraerts formulated many of the basic tenets that were to form what Cognitive Linguistics is today. paradoxes need to be addressed. It thus reveals how Cognitive Linguistics has developed and diversified over the past decades.

Online around the World Laura M. Steckman, Marilyn J. Andrews, 2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

Digital Media Distribution Paul McDonald, Courtney Brannon Donoghue, Timothy Havens, 2021-09-07 A deep dive into the new era of digital content production and distribution In the twenty-first century, the platforms that both create and host content have become nearly as important as media itself. Companies such as Netflix, Spotify, and YouTube have attained a massive hold on the public imagination and have become an almost ineluctable part of people's everyday lives. While the workings of media distribution had until very recently remained inconsequential to the average consumer, the recent popularization of various online platforms has made the question of distribution immediate to everyone. *Digital Media Distribution: Portals, Platforms, Pipelines* provides a timely examination of the multifaceted distribution landscape in a moment of transformation and conceptualizes media distribution as a complex site of power, privilege, and gatekeeping. These tensions have local, national, and global consequences on the autonomy of creative workers, as well as on how we gain access to, engage with, and understand cultural products. Drawing on original research into distribution practices in industries as diverse as television, film, videogames, literature, and adult entertainment, each chapter explores how digitization has changed media distribution and its broader economic, industrial, social, and cultural implications. Bringing together experts from around the world

and across the media industries, Digital Media Distribution: Portals, Platforms, Pipelines presents a vast array of critical approaches and illustrative case studies for understanding the factors that have an impact on the way media travels and moves throughout our digital lives.

Modern China's Copyright Law and Practice Yimeei Guo,2017-07-25 This book presents selective case studies concerning China's Copyright Law, especially the typical cases chosen by China's Supreme People's Court and the Beijing, Shanghai and Guangzhou IP courts in recent years as the local court's guiding reference cases, the goal is to help readers familiarize themselves with China's dispute and resolution system from a practical point of view. The major aspects covered include copyright object, copyright subject, copyright content, copyright limitations, neighboring rights, copyright infringement and enforcement, software copyright protection, collective management societies, and online copyright protection. Generally speaking, the book highlights selected typical cases involving various categories of current China's Copyright Law. In addition, it introduces readers to relevant laws and regulations and discusses some hot issues in the academic field, including the extended collective license (ECL) implementation problem and the definition of "know" of Internet Service Providers (ISPs) in China. As such, the book successfully combines legal theory and realities, offering readers, especially graduate students and researchers, a clear and sensible overview of modern China's Copyright Law and practice, as well as the chance to better understand China's judicial and administrative efforts to protect copyright while also satisfying the requirement of transparency ever since China's entry to the WTO in 2001.

Wanghong as Social Media Entertainment in China David Craig,Jian Lin,Stuart Cunningham,2021-02-25 In Chinese, the term wanghong refers to creators, social media entrepreneurs alternatively known as KOLs (key opinion leaders) and zhubo (showroom hosts), influencers and micro-celebrities. Wanghong also refers to an emerging media ecology in which these creators cultivate online communities for cultural and commercial value by harnessing Chinese social media platforms, like Weibo, WeChat, Douyu, Huya, Bilibili, Douyin, and Kuaishuo. Framed by the concepts of cultural, creative, and social industries, the book maps the development of wanghong policies and platforms, labor and management, content and culture, as they operate in contrast to its non-Chinese counterpart, social media entertainment, driven by platforms like YouTube, Facebook, Instagram, and Twitch. As evidenced by the backlash to TikTok, the threat of competition from global wanghong signals advancing platform nationalism.

Fortunes have been made, but more importantly, society and business are being transformed along the unique lines of Chinese Internet development. This will substantially affect the business and political character of the fastest growing economic power in the world. Red Wired takes a fascinating inside

look at how China has adopted the Internet at rapid pace. Zoning China Luzhou Li, 2024-02-06 An examination of "cultural zoning" in China considers why government regulation of online video is so much more lenient than regulation of broadcast television. In *Zoning China*, Luzhou Li investigates why the Chinese government regulates online video relatively leniently while tightly controlling what appears on broadcast television. Li argues that television has largely been the province of the state, even as the market has dominated the development of online video. Thus online video became a space where people could question state media and the state's preferred ideological narratives about the nation, history, and society. Li connects this relatively unregulated arena to the "second channel" that opened up in the early days of economic reform—piracy in all its permutations. She compares the dual cultural sphere to China's economic zoning; the marketized domain of online video is the cultural equivalent of the Special Economic Zones, which were developed according to market principles in China's coastal cities. Li explains that although the relaxed oversight of online video may seem to represent a loosening of the party-state's grip on media, the practice of cultural zoning in fact demonstrates the state's strategic control of the media environment. She describes how China's online video industry developed into an original, creative force of production and distribution that connected domestic private production companies, transnational corporations, and a vast network of creative labor from amateurs to professional content creators. Li notes that China has increased state management of the internet since 2014, signaling that online and offline censorship standards may be unified. Cultural zoning as a technique of cultural governance, however, will likely remain.

Willing Collaborators Michael Keane, Brian Yecies, Dr. Terry Flew, 2018-04-16 As China looks to reinvigorate its soft power by drawing on the creative inputs of foreign media producers and technical expertise, this book explores how and why creative workers are moving to the Mainland from East Asia, and how they are navigating the challenges of producing creative and critical content in a politically constrained environment.

Digital China's Informal Circuits Elaine Jing Zhao, 2019-02-11 From open source cultures, piracy, to amateur media and on-demand labour, informal media activities are vibrant in circuits of cultural production, distribution, consumption and labour utilisation in China. They come in different sizes and shapes, involve multiple actors, often with transnational ties and tensions, and challenge polemic views. Why do these informal activities occur, and how do they evolve? What cultural and social consequences do they have? In what ways do they pose challenges to governance and provoke us to rethink the notion? This book engages with diverse forms of the informal and their equally diverse interactions with the formal in the broader context of the rise of digital platforms, the contingent and complicated state-market interactions, and evolving roles of users. The book provides a vivid and original account of how digital platforms navigate formal and informal boundaries at both operational and discursive levels; how enthusiastic fans, aspiring amateurs, 'ordinary' users and necessity-driven labourers become integral to the formal/informal interface; and how state and non-state actors intervene in governing the formal/informal dynamics. In doing so, the book opens up new insights into the ongoing digital transformation in China.
