Gasoline Prices in the State of Vermont Committee on Energy and Natural Resources United States Senate, 2013-01-26 The issue that we are going to explore today is one that concerns many Vermonters, and that is how gas prices at the local level are determined, and why it is that, with few exceptions, gas prices at the pump in northwest Vermont-Chittenden, Franklin, and Grand Isle Counties, have been significantly higher over the last several years than gas prices in other

parts of Vermont, in New England, and throughout the country. When gas prices go up, that is money coming right out of their pockets, and that it is especially taking place at a time when many workers are seeing stagnant or, in fact, declining paychecks.

Subcommittee on Small Business: Family Farm,1984

Fuel Prices Great Britain: Parliament: House of Commons: Trade and Industry Committee,2005-06 The Committee's report examines the recent price increases in gas supply and the resulting rises in electricity prices (as about 40 per cent of electricity generation in England and Wales is gas-fired), focusing on the effects of the price increases on all types of energy customers. The report seeks to assess whether the rises are a temporary response to short-term supply problems or the start of a long-term increase in UK energy prices, and to consider possible responses by Ofgem, the regulator of the gas and electricity markets, and the DTI to the problem. Topics discussed include: Ofgem's report into wholesale gas prices and reactions to it; the decline in production from the UK Continental Shelf (UKCS); gas storage and supply issues; the behaviour and transparency of the gas market and regulation issues; oil indexation in gas contracts; competition within European markets; vertical integration; the electricity market; new infrastructure projects; and the future of gas prices.
