What is Quality in Higher Education? Diana M. Green,1994 For higher education in the UK, the Government is committed to an overt link between quality assessment and funding decisions. However, there is no current agreed definition of quality; and if there is no consensus about what quality is in higher education, how can it be assessed? This book was stimulated by, and reflects some of the debate following the publications of the 1991 Further and Higher Education Bill and its subsequent enactment. It also draws on the preliminary findings of a major national research project funded by a partnership of government, business and higher education, designed to develop and test methods for systematically assessing quality. The focus here is on the quality of teaching and learning. The book illustrates the extent to which quality has overtaken efficiency as the key challenge facing higher education in the 1990s. It underlines the growing awareness that institutions are accountable not only to the government which funds them but also , in an increasingly competitive higher education market, to the customers - the students. The book therefore signals the early stages of what threatens to be cultural revolution as profound as that which has transformed the behaviour of organizations in the manufacturing and commercial sectors.

Outside Insight Jorn Lyseggen,2017-10-12 Is your business looking out? The world today is drowning in data. There is a treasure trove of valuable and underutilized insights that can be gleaned from information companies and people leave behind on the internet - our 'digital breadcrumbs' - from job postings, to online news, social media, online ad spend, patent applications and more. As a result, we're at the cusp of a major shift in the way businesses are managed and governed - moving from a focus solely on lagging, internal data, toward analyses that also encompass industry-wide, external data to paint a more complete picture of a brand's opportunities and threats and uncover forward-looking insights, in real time. Tomorrow's most successful brands are already embracing Outside Insight, benefitting from an information advantage while their competition is left behind. Drawing on practical examples of transformative, data-led decisions made by brands like Apple, Facebook, Barack Obama and many more, in Outside Insight, Meltwater CEO Jorn Lyseggen illustrates the future of corporate decision-making and offers a detailed plan for business leaders to implement Outside Insight thinking into their company mindset and processes.

The Nordic future of work: Jon Erik Dølvik,Johan Røed Steen,2018-11-27 The Nordic future of workHow will work and working life in the Nordic countries change in the future? This is the question to be addressed in the project The Future of Work: Opportunities and Challenges for the Nordic Models. This initial report describes the main drivers and trends expected to shape the future of work. It also reviews the main distinctions of the Nordic model and recent developments in Nordic working lives, pointing towards the kind of challenges the future of work may pose to the Nordic models. Too often, debates about the future narrowly focus on changes in technology. This report draws attention to the broader drivers and political-institutional frameworks influencing working life developments, aiming to spur debate about how the interaction of changes in demography, climate, globalization and digital technologies may influence Nordic working lives in the coming decades.

A Lifelong Interest Ernst Hans Gombrich,Didier Eribon,1993 A series of probing conversations held by Didier Eribon with Sir Ernst Gombrich, OM, CBE, FBA, seeking to discover how his intellect and tastes had been nurtured during his early years in Vienna, and how they developed after he emigrated to England, wrote The Story of Art and became Director of the Warburg Institute.

Rescue at 2100 Hours Tom Trumble,2013-05-22 February 1942. The Japanese invasion of Timor has begun and attempts to evacuate a group of

29 Australian airmen, charged with keeping an airfield operational until the last moment, are thwarted. Under the leadership of Bryan Rofe, a 24-year-old meteorological officer, the airmen make for remote jungle along the northwest coast. All attempts to rescue the group fail. Malaria-ravaged and starving, these men are taken to the limits of their endurance for 58 days. When a 300-strong Japanese patrol is sent to hunt them down all hope seems lost, until they receive a strange signal from sea – an American submarine has been dispatched to their position. With the Japanese closing in, only courage will keep them alive. Using diaries of the airmen and wartime records, Rofe's grandson Tom Trumble brings to life one of the greatest stories of survival and escape of the Second World War. From the young man who stepped up to bring his men home and the Japanese soldier sent to hunt down the Australians, to the American submarine captain and the Timorese fisherman who saved them, this is an insight into the extraordinary things that happen to ordinary men in war. 'Fascinating ... Intimate passages exploring passion, separation and loneliness bring the protagonists to life in a way rarely achieved in narratives dealing with events now 70 years in the past ... Trumble, a master of his material, builds the suspense without running aground on the rocky shallows of melodrama. His characters appear true to life and the events he describes are related with what appears to be unflinching historical accuracy. This is one of the few recent works of military history that can be read as a thriller. There should be more like it.' Canberra Times 'Gripping from the get-go ... Vivid images inflame the pages and the book smoulders with intensity ... Driven by love and respect [for the airmen], Tom Trumble recounts their journey into hell with journalistic flair, empathy and restraint ... This book resonates.' Sunday Tasmanian 'a gripping tale ... which has you glued to the page'. Steven Carroll, Sydney Morning Herald 'A ripping yarn of courage against the odds, great resourcefulness and a daring night rescue by submarine.' Courier-Mail 'Trumble gives a gripping account of one of those many little-known stories worthy of a big-budget Australian film.' Daily Telegraph
