How to Make an IMPACT Jon Moon,2010-04-08 Clear information shows clear thinking, and clear thinking informs, influences and impresses. How often do you stare at uninviting and confusing presentations, notes, reports and information packs and get nothing out of them? It doesn't have to be like this. We could all produce amazingly clear work that has incredible impact – if only we knew how. This book shows you how. It is full of ideas, tips and principles that are simple and easy to implement, yet brilliantly effective.You will never look at a business document in the same way again. And your work will impress the people that matter and get the results you want. It guides you through the most effective ways of using all forms of presenting information - tables, charts, slides, flowcharts, etc. Moon also introduces the new WiT (Words in Tables) approach to give impact to your message on all documents and slides. "I love Jon's work. His tips are hugely useful, his WiT fantastic and ground-breaking, and his book essential reading. If you want to enhance your sales tenders, pitches and slides – if you want to win more business – get into Jon's stuff. It's really, really good." Gavin Duffy, a Dragon on Ireland's "Dragons' Den", top media coach and economics columnist with the Irish Sunday Independent Every once in a while, simple ideas change business forever - this book is full of such ideas. A must-read if you want to do something about all those impenetrable reports, slides and information packs. This book has all the answers and will redefine how you think about business

documents. Dominic Burke, Chief Executive, Jardine Lloyd Thompson Group plc. This is a vital topic that has been sorely neglected. Jon's book changes that. It is crammed with new ideas that are creative, thoughtful, yet practical and relevant for all disciplines of business. Essential reading for everyone in business! Dr Jikyeong Kang, Professor of Marketing and Director of MBA Programmes, Manchester Business School. I've seen Jon's talk and his ideas are full of originality and wisdom. Many ideas are stunningly simple, others are mould breaking. He takes preconceived thinking and turns it on his head. Your business reporting will never be the same again. Michael Izza, Chief Executive ICAEA.

Graph Drawing Walter Didimo,Maurizio Patrignani,2013-02-20 This book constitutes the thoroughly refereed post-conference proceedings of the 20th International Symposium on Graph Drawing, GD 2012, held in Redmond, WA, USA, in September 2012. The 42 revised full papers presented together with 4 revised short papers and 8 poster descriptions were carefully reviewed and selected from 92 submissions. They cover a wide range of topics in two main tracks: combinatorial and algorithmic aspects, and visualization systems and interfaces. In addition, reports of the 19th Annual Graph Drawing Contest, which was held during the conference, and of a workshop on theory and practice of graph drawing to celebrate Professor Peter Eades' 60th birthday are included in the volume.

Certified Cost Professional (CCP) Certification Study Guide Makarand Hastak,2016-06-10 The AACE International CCP Certification Study Guide, 2nd Edition is designed as a companion workbook to the Skills and Knowledge of Cost Engineering, 6th Edition (S&K 6). In conjunction with S&K 6, this study guide will assist individuals in their preparation for the CCP Certification examination as well as develop the general knowledge a cost engineering professional is expected to have. This study guide offers insight into the key topics found in each chapter of S&K 6 and provides practice questions and exercises to better develop knowledge in individual areas.

The Driver in the Driverless Car Vivek Wadhwa,Alex Salkever,2017-04-03 A computer beats the reigning human

champion of Go, a game harder than chess. Another is composing classical music. Labs are creating life-forms from synthetic DNA. A doctor designs an artificial trachea, uses a 3D printer to produce it, and implants it and saves a child's life. Astonishing technological advances like these are arriving in increasing numbers. Scholar and entrepreneur Vivek Wadhwa uses this book to alert us to dozens of them and raise important questions about what they may mean for us. Breakthroughs such as personalized genomics, self-driving vehicles, drones, and artificial intelligence could make our lives healthier, safer, and easier. But the same technologies raise the specter of a frightening, alienating future: eugenics, a jobless economy, complete loss of privacy, and ever-worsening economic inequality. As Wadhwa puts it, our choices will determine if our future is Star Trek or Mad Max. Wadhwa offers us three questions to ask about every emerging technology: Does it have the potential to benefit everyone equally? What are its risks and rewards? And does it promote autonomy or dependence? Looking at a broad array of advances in this light, he emphasizes that the future is up to us to create—that even if our hands are not on the wheel, we will decide the driverless car's destination.

Business Ethics: Decision Making for Personal Integrity & Social Responsibility Laura Hartman,Joseph DesJardins,Chris MacDonald,2013-03-04 Business Ethics: Decision-Making for Personal Integrity & Social Responsibility, 3e is designed to prepare the student to apply an ethical decision-making model, not only in the ethics course but throughout her or his business discipline. This model teaches students ethical skills, vocabulary, and tools to apply in everyday business decisions and throughout their business courses. The authors speak in a sophisticated yet accessible manner while teaching the fundamentals of business ethics. Hartman's professional background in law and her teaching experience in the business curriculum, combined with DesJardins' background in philosophy and MacDonald's ability to distill complicated business transactions into understandable terms,

results in a broad language, ideal for this approach and market. The authors' goal is to engage the student by focusing on cases and business scenarios that students already find interesting. Students are then asked to look at the issues from an ethical perspective. Additionally, its focus on AACSB requirements makes it a comprehensive business ethics text for business school courses. The goal for the third edition is to provide "a comprehensive yet accessible introduction to the ethical issues arising in business." Hartman and DesJardins have retained the focus on decision-making as well as the emphasis on both personal and policy-level perspectives on ethics. This edition continues to provide pedagogical support throughout the text. The most noticeable changes involve a thorough updating of distinct items such as Reality Checks, Decision Points, and readings to reflect new cases, examples and data.

Web Development with ReasonML J. David Eisenberg,2019-03-26 ReasonML is a new, type-safe, functional language that compiles to efficient, readable JavaScript. ReasonML interoperates with existing JavaScript libraries and works especially well with React, one of the most popular front-end frameworks. Learn how to take advantage of the power of a functional language while keeping the flexibility of the whole JavaScript ecosystem. Move beyond theory and get things done faster and more reliably with ReasonML today. ReasonML is a new syntax for OCaml, a battle-tested programming language used in industry for over 20 years. Designed to be familiar to JavaScript programmers, ReasonML code compiles to highly readable JavaScript. With ReasonML, you get OCaml's powerful functional programming features: a strong static type system with an excellent type inference engine, pattern matching, and features for functional programming with immutable variables. ReasonML also allows flexibility with opt-in side effects, mutation, and object-oriented programming. ReasonML hits the sweet spot between the pure theoretical world and the laissez-faire approach of JavaScript.

Start using ReasonML's powerful type system as you learn the essentials of the language: variables and arithmetic operations. Gain expressive power as you write functions with named parameters and currying. Define your own data types, and integrate all these capabilities into a simple web page. Take advantage of ReasonML's functional data structures with map and reduce functions. Discover new ways to write algorithms with ReasonML's recursion support. Interoperate with existing JavaScript libraries with bindings, and write reactive web applications using ReasonML in tandem with React. Reinforce concepts with examples that range from short, tightly focused functions to complete programs, and practice your new skills with exercises in each chapter.With ReasonML, harness the awesome power of a functional language while retaining the best features of JavaScript to produce concise, fast, type-safe programs. What You Need: You'll need to have node.js (version 10.0 or above) and npm (version 5.6 or above). Once you install the bs-platform package and fire up a text editor, you're ready to go. (There are plugins for many popular editors that will make editing easier.)

Essentials of Business Communication Mary Ellen Guffey,2004 This text-workbook is a streamlined, no-nonsense approach to business communication. It takes a three-in-one approach: (1) text, (2) practical workbook, and (3) self-teaching grammar/mechanics handbook. The chapters reinforce basic writing skills, then apply these skills to a variety of memos, letters, reports, and resumes. This new edition features increased coverage of contemporary business communication issues including oral communication, electronic forms of communication, diversity and ethics.

Digital Knowledge Maps in Education Dirk Ifenthaler,Ria Hanewald,2013-11-01 Digital knowledge maps are 'at a glance' visual representations that enable enriching, imaginative and transformative ways for teaching and learning, with the potential to enhance positive educational outcomes. The use of such maps has generated much attention and interest among tertiary education practitioners and researchers over the last few years as higher education institutions around the world begin to invest heavily into new technologies designed to provide online spaces within which to build resources and conduct activities. The key elements of this edited volume will comprise original and innovative contributions to existing scholarship in this field, with examples of pedagogical possibilities as they are currently practiced across a range of contexts. It will contain chapters that address, theory, research and practical issues related to the use of digital knowledge maps in all aspects of tertiary education and draws predominantly on international perspectives with a diverse group of invited contributors. Reports on empirical studies as well as theoretical/conceptual chapters that engage deeply with pertinent questions and issues raised from a pedagogical, social, cultural, philosophical, and/or ethical standpoint are included. Systematic literature reviews dealing with digital knowledge mapping in education are also an integral part of the volume.

Learning Neo4j Rik Van Bruggen,2014-08-25 This book is for developers who want an alternative way to store and process data within their applications. No previous graph database experience is required; however, some basic database knowledge will help you understand the concepts more easily.

The Information Audit Susan Henczel,2013-02-07 The

Information Audit is a process by which an organisation investigates its information requirements and matches them against the information resources and services that are currently provided. Using a seven stage model this book will take the information professional through the process of an audit.

POGIL Shawn R. Simonson,2023-07-03 Process Oriented Guided Inquiry Learning (POGIL) is a pedagogy that is based on research on how people learn and has been shown to lead to better student outcomes in many contexts and in a variety of academic disciplines. Beyond facilitating students' mastery of a discipline, it promotes vital educational outcomes such as communication skills and critical thinking. Its active international community of practitioners provides accessible educational development and support for anyone developing related courses.Having started as a process developed by a group of chemistry professors focused on helping their students better grasp the concepts of general chemistry, The POGIL Project has grown into a dynamic organization of committed instructors who help each other transform classrooms and improve student success, develop curricular materials to assist this process, conduct research expanding what is known about learning and teaching, and provide professional development and collegiality from elementary teachers to college professors. As a pedagogy it has been shown to be effective in a variety of content areas and at different educational levels. This is an introduction to the process and the community.Every POGIL classroom is different and is a reflection of the uniqueness of the particular context – the institution, department, physical space, student body, and instructor – but follows a common structure in which students work cooperatively in self-managed small groups of three or four. The group work is focused on activities that are carefully designed and scaffolded to enable students to develop important concepts or to deepen and refine their understanding of those ideas or concepts for themselves, based entirely on data provided in class, not on

prior reading of the textbook or other introduction to the topic. The learning environment is structured to support the development of process skills –– such as teamwork, effective communication, information processing, problem solving, and critical thinking. The instructor's role is to facilitate the development of student concepts and process skills, not to simply deliver content to the students. The first part of this book introduces the theoretical and philosophical foundations of POGIL pedagogy and summarizes the literature demonstrating its efficacy. The second part of the book focusses on implementing POGIL, covering the formation and effective management of student teams, offering guidance on the selection and writing of POGIL activities, as well as on facilitation, teaching large classes, and assessment. The book concludes with examples of implementation in STEM and non-STEM disciplines as well as guidance on how to get started. Appendices provide additional resources and information about The POGIL Project.

   Rapid Manufacturing Neil Hopkinson,Richard Hague,Philip Dickens,2006-02-22 Rapid Manufacturing is a new area of manufacturing developed from a family of technologies known as Rapid Prototyping. These processes have already had the effect of both improving products and reducing their development time; this in turn resulted in the development of the technology of Rapid Tooling, which implemented Rapid Prototyping techniques to improve its own processes. Rapid Manufacturing has developed as the next stage, in which the need for tooling is eliminated. It has been shown that it is economically feasible to use existing commercial Rapid Prototyping systems to manufacture series parts in quantities of up to 20,000 and customised parts in quantities of hundreds of thousands. This form of manufacturing can be incredibly cost-effective and the process is far more flexible than conventional manufacturing. Rapid Manufacturing: An Industrial Revolution for the Digital Age addresses the academic fundamentals of Rapid Manufacturing as well as focussing on case studies and applications across a wide range of industry sectors.

As a technology that allows manufacturers to create products without tools, it enables previously impossible geometries to be made. This book is abundant with images depicting the fantastic array of products that are now being commercially manufactured using these technologies. Includes contributions from leading researchers working at the forefront of industry. Features detailed illustrations throughout. Rapid Manufacturing: An Industrial Revolution for the Digital Age is a groundbreaking text that provides excellent coverage of this fast emerging industry. It will interest manufacturing industry practitioners in research and development, product design and materials science, as well as having a theoretical appeal to researchers and post-graduate students in manufacturing engineering, product design, CAD/CAM and CIFM.

Customer Service Management in Africa Robert Ebo Hinson,Ogechi Adeola,Terri Lituchy,Abednego Feehi Okoe Amartey,2020-05-07 Customer Service Management in Africa: A Strategic and Operational Perspective (978-0-367-14337-4, K410515) Customer Service is Changing! The message of 34 authors featured in Customer Service Management in Africa: A Strategic and Operational Perspective is clear: Today's consumers are no longer 'passive audiences' but 'active players' that engage with businesses at each stage of product or service design and delivery systems. Consumer demands and expectations are also increasingly being dictated by changing personal preferences, enhanced access to information and expanding digital reality. The customer service principles – strategic and operational – advocated by these authors are universal, but particularly compelling as they apply to Africa's unique and dynamic operating environment. In recognition of the importance of excellent customer service, this comprehensive and well-timed book provides an essential guide on the increasing role of the customer to business success. This book discusses the management and delivery of customer service under seven broad themes: Customer

Service as Shared Value, Customer Service Strategy, Customer Service Systems, Customer Service Style, Customer Service Culture, Customer Service Skills and Customer Experience – Advancing Customer Service in Africa. Central questions posed and addressed include: What is the new definition of customer service management? How should organisations position themselves to create value for customers and stakeholders? How should employees project themselves to align with customer service promises made by their organisations? Overall, this book provides strategic and operational insights into effective customer service management in Africa. The customer service management concepts, roles and practices outlined, particularly as they apply to the African context, make it an important addition to scholars' or practitioners' reference works.

Quantum Chemistry and Spectroscopy Tricia D. Shepherd,Alexander Grushow,The POGIL Project,2014-08-18 Quantum Chemistry & Spectroscopy: A Guided Inquiry was developed to facilitate more student-centered classroom instruction of physical chemistry. Based on principles developed through years of research on how students learn, these materials follow the POGIL methodology and have been endorsed by The POGIL Project. This approach implements modern cognitive learning principles by having students learn how to create kowledge and how to test that knowledge. These materials are designed for use in any physical chemistry course as the primary classroom materials, and should be supplemented with a traditional physical chemistry book.

Safety of Bridges Parag C.
