Unbelievable Stacy Horn, 2009-10-06 “Author Stacy Horn dissects all the things that go bump in the night—ghosts, poltergeists, your ex-boyfriend Klaus—in [her] macabre book.” —Marie Claire A fascinating, eye-opening collection of “Investigations into Ghosts, Poltergeists, Telepathy, and Other Unseen Phenomena, from the Duke Parapsychology

Laboratory,” Unbelievable by Stacy Horn explores science’s remarkable first attempts to prove—or disprove—the existence of the paranormal. A featured contributor on the popular NPR program “All Things Considered,” Horn has been praised by Mary Roach, bestselling author of *Spook*, for her “awe-fueled curiosity [and] top-flight reporting skills.” Horn attacks a most controversial subject with *Unbelievable*—a book that will appeal to armchair scientists as well as fans of TV’s *Medium*, *The Ghost Whisperer*, and *Crossing Over* with John Edward.

Magic Is Dead Ian Frisch, 2019-02-26 In the vein of Neil Strauss’ *The Game* and Joshua Foer’s *Moonwalking with Einstein* comes the fascinating story of one man’s colorful, mysterious, and personal journey into the world of magic, and his unlikely invitation into an underground secret society of revolutionary magicians from around the world. *Magic Is Dead* is Ian Frisch’s head-first dive into a hidden world full of extraordinary characters and highly guarded secrets. It is a story of imagination, deception, and art that spotlights today’s most brilliant young magicians—a mysterious club known as the52, who are revolutionizing an ancient artform under the mantra *Magic Is Dead*. Ian brings us with him as he not only gets to know this fascinating world, but also becomes an integral part of it. We meet the52’s founding members—Laura London, Daniel Madison, and Chris Ramsay—and explore their personal demons, professional aspirations, and what drew them to their craft. We join them at private gatherings of the most extraordinary magicians working today, follow them to magic conventions in Las Vegas and England, and discover some of the best tricks of the trade. We also encounter David Blaine; hang out with Penn Jillette; meet Dynamo, the U.K.’s most famous magician; and

go behind the scenes of a Netflix magic show. *Magic Is Dead* is also a chronicle of magic's rich history and how it has changed in the internet age, as the young guns embrace social media and move away from the old-school take on the craft. As he tells the story of the 52, and his role as its most unlikely member, Ian reveals his own connection with trickery and deceit and how he first learned the elements that make magic work from his poker-playing mother. He recalls their adventures in card rooms and casinos after his father's sudden death, and shares a touching moment that he had, as a working journalist, with his childhood idol Shaquille O'Neal. "Magic—the romanticism of the inexplicable, the awe and admiration of the unexpected—is an underlying force in how we view the world and its myriad possibilities," Ian writes. As his journey continues, Ian not only becomes a performer and creator of magic—even fooling the late Anthony Bourdain during a chance encounter—he also cements a new brotherhood, and begins to understand his relationship with his father, fifteen years after his death. Written with psychological acuity and a keen eye for detail, *Magic Is Dead* is an engrossing tale full of wonder and surprise.

Synchronicity C. G. Jung, 2013-04-15 To Jung, synchronicity is a meaningful coincidence in time, a psychic factor which is independent of space and time. This revolutionary concept of synchronicity both challenges and complements the physicist's classical view of causality. It also forces us to a basic reconsideration of the meaning of chance, probability, coincidence and the singular events in our lives.

Dangerous Games to Play in the Dark Lucia Peters, 2019-09-03 What begins as a test of bravery or a sleepover activity—chanting in front of a mirror, riding an elevator alone, taking pictures in the dark—can become something . . . dangerous. This compendium collects the most spine-chilling games based on urban legends from around the world. Centuries-old games such as Bloody Mary and Light as a Feather, Stiff as a

Board are detailed alongside new games from the internet age, like The Answer Man, a sinister voice that whispers secrets to whomever manages to contact him with a cellphone. With step-by-step instructions, historical context, and the stakes for each game, this black handbook is the ideal gift for anyone looking for a late-night thrill—but beware who, or what, may come out to play.

Standard Deviations Gary Smith, 2014-07-31 How statistical data is used, misused, and abused every day to fool us: “A very entertaining book about a very serious problem.” —Robert J. Shiller, winner of the Nobel Prize in Economics and author of *Irrational Exuberance* Did you know that baseball players whose names begin with “D” are more likely to die young? That Asian Americans are most susceptible to heart attacks on the fourth day of the month? That drinking a full pot of coffee every morning adds years to your life, but one cup a day increases your pancreatic cancer risk? These “facts” have been argued with a straight face by credentialed researchers and backed up with reams of data and convincing statistics. As Nobel Prize-winning economist Ronald Coase cynically observed, “If you torture data long enough, it will confess.” Lying with statistics is a time-honored con. In *Standard Deviations*, economics professor Gary Smith walks us through the various tricks and traps that people use to back up their own crackpot theories. Sometimes, the unscrupulous deliberately try to mislead us. Other times, the well-intentioned are blissfully unaware of the mischief they are committing. Today, data is so plentiful that researchers spend precious little time distinguishing between good, meaningful indicators and total rubbish. Not only do others use data to fool us, we fool ourselves. Drawing on breakthrough research in behavioral economics and using clear

examples, *Standard Deviations* demystifies the science behind statistics and makes it easy to spot the fraud all around us. “An entertaining primer . . . packed with figures, tables, graphs and ludicrous examples from people who know better (academics, scientists) and those who don’t (political candidates, advertisers).” —Kirkus Reviews (starred review)

The Mystery of ESP Chris Oxlade, 2008 What is extra-sensory perception? Can people move objects with their minds? How is ESP tested? Some things are so strange that they cannot be explained. This series explains the connection between science and natural phenomena and how science can be used to try to explain mysteries.
