Writing a game for the iPhone and iPad does not have to be that difficult, and Cocos2D makes game development fun and easy. Learning Cocos2D walks you through the process of building Space Viking (which is free on the App Store), a 2D scrolling game that leverages Cocos2D, Box2D, and Chipmunk. As you build Space Viking, you'll learn everything you need to know about Cocos2D so you can create the next killer iOS game. Download the free version of Space Viking from the App Store today! The Death of Luigi Trastulli and Other Stories Alessandro Portelli,2010-03-30 Portelli offers a new and challenging approach to oral history, with an interdisciplinary and multicultural perspective. Examining cultural conflict and communication between social groups and classes in industrial societies, he identifies the way individuals strive to create memories in order to make sense of their lives, and evaluates the impact of the fieldwork experience on the consciousness of the researcher. By recovering the value of the story-telling experience, Portelli's work makes delightful reading for the specialist and non-specialist alike.

The Oxford Handbook of Childhood and Education in the Classical World Judith Evans Grubbs,Tim Parkin,2013-11-12 The past thirty years have seen an explosion of interest in Greek and Roman social history, particularly studies of women and the family. Until recently these studies did not focus especially on children and childhood, but considered children in the larger context of family continuity and inter-family relationships, or legal issues like legitimacy, adoption and inheritance. Recent publications have examined a variety of aspects related to childhood in ancient Greece and Rome, but until now nothing has attempted to comprehensively survey the state of ancient childhood studies. This handbook does just that, showcasing the work of both established and rising scholars and demonstrating the variety of approaches to the study of childhood in the classical world. In thirty chapters, with a detailed introduction and envoi, The Oxford Handbook of Childhood and Education in the Classical World presents current research in a wide range of topics on ancient childhood, including sub-disciplines of Classics that rarely appear in collections on the family or childhood such as archaeology and ancient medicine. Contributors include some of the foremost experts in the field as well as younger, up-and-coming scholars. Unlike most edited volumes on childhood or the family in antiquity, this collection also gives attention to the late antique period and whether (or how) conceptions of childhood and the life of children changed with Christianity. The chronological spread runs from archaic Greece to the later Roman Empire (fifth century C.E.). Geographical areas covered include not only classical Greece and Roman Italy, but also the eastern Mediterranean. The Oxford Handbook of Childhood and Education in the Classical World engages with perennially valuable questions about family and education in the ancient world while providing a much-needed touchstone for research in the field.

Jacques Lacan and the Freudian Practice of Psychoanalysis Dany Nobus,2013-01-11 Jacques Lacan and the Freudian Practice of Psychoanalysis paints a completely new picture of the man and his ideas. The book succeeds in showing how ideas can become more accessible, and re-evaluates his significance within the field of psychodynamic psychotherapy. The book is structured thematically around five key issues: diagnosis, the analyst's position during the treatment, the management of transference, the formulation of interpretations, and the organisation of analytic training. For each of these issues, Lacan's entire work both published and unpublished material, has been taken into account and theoretical principles have been illustrated with clinical examples. The book also contains the first complete bibliography of Lacan's works in English. Clear, detailed, and wide ranging, Jacques Lacan and the Freudian Practice of Psychoanalysis will prove essential reading, not only for professionals and students within the fields of psychology and psychiatry, but for all those keen to discover a new Lacan.

Importing Asta Nielsen Martin Loiperdinger,Uli Jung,2013 Danish silent film actress Asta Nielsen became a brand name in movie houses around the globe in the early 1900s. Known simply as The Asta, she exhibited both a subtle eroticism and a naturalistic style in her performances, which propelled her into international stardom. Nielsen's worldwide fame was made possible by film distributors adept at contracting long runs for films in cinemas around the world. This volume examines the role of these newly developed film distribution strategies and the resulting emergence of the international film star.

14 MeV Neutrons Vladivoj Valkovic,2015-08-25 Despite the often difficult and time-consuming effort of performing experiments

with fast (14 MeV) neutrons, these neutrons can offer special insight into nucleus and other materials because of the absence of charge. 14 MeV Neutrons: Physics and Applications explores fast neutrons in basic science and applications to problems in medicine, the environment, and security. Drawing on his more than 50 years of experience working with 14 MeV neutrons, the author focuses on: Sources of 14 MeV neutrons, including laboratory size accelerators, small and sealed tube generators, well logging sealed tube accelerators, neutron generators with detection of associated alpha particles, plasma devices, high flux sources, and laser-generated neutron sources Nuclear reactions with 14 MeV neutrons, including measurements of energy spectra, angular distributions, and deductions of reaction mechanism Nuclear reactions with three particles in the final state induced by neutrons and the identification of effects of final state interaction, quasi-free scattering, and charge-dependence of nuclear forces Charged particle and neutron detection methods, particularly position-sensitive detectors Industrial applications of nuclear analytical methods, especially in the metallurgy and coal industries Quality assurance and quality control measures for nuclear analytical methods Nuclear and atomic physics-based technology for combating illicit trafficking and terrorism Medical applications, including radiography, radiotherapy, in vivo neutron activation analysis, boron neutron therapy, collimated neutron beams, and dosimetry This book reflects the exciting developments in both fundamental nuclear physics and the application of fast neutrons to many practical problems. The book shows how 14 MeV neutrons are used in materials detection and analysis to effectively inspect large volumes in complex environments.

The Reign of Speech Dries G. M. Dulsster,2021-10-28 This book provides an in-depth examination of Lacanian oriented psychotherapy and supervision, drawing on a wide range of Lacanian texts and rich interview data. Beginning with a comprehensive overview of the Lacanian psychoanalytic therapeutic process, it next considers this in relation to Lacanian texts – including, ‘The Function and Field of Speech and Language in Psychoanalysis’, ‘Direction of the Treatment’, ‘Lacanian Discourses’ and ‘Seminar XXIII’ – and interview data from ex-analysants and psychoanalysts.The second part of the book offers the first systematic discussion of Lacanian supervision. Through a sophisticated theoretical analysis and unique research material, Dries Dulsster has created an important reference point for students, scholars and clinicians that will appeal to those new to Lacanian practice, and those already deeply involved in it.

Biodiversity of Angola Brian J. Huntley,Vladimir Russo,Fernanda Lages,Nuno Ferrand,2019-02-20 This open access multi-authored book presents a 'state of the science' synthesis of knowledge on the biodiversity of Angola, based on sources in peer-reviewed journals, in books and where appropriate, unpublished official reports. The book identifies Angola as one of the most biologically diverse countries in Africa, but notes that its fauna, flora, habitats and the processes that drive the dynamics of its ecosystems are still very poorly researched and documented. This 'state of the science' synthesis is for the use of all students of Angola's biodiversity, and for those responsible for the planning, development and sustainable management of the country's living resources. The volume brings together the results of expeditions and research undertaken in Angola since the late eighteenth century, with emphasis on work conducted in the four decades since Angola's independence in 1975. The individual chapters have been written by leaders in their fields, and reviewed by peers familiar with the region.
