**Vietnam's Foreign Policy under Doi Moi** Le Hong Hiep, Anton Tsvetov, 2018-03-19 In 1986, the Communist Party of Vietnam (CPV) adopted the Doi Moi (Renovation) policy at its sixth national congress, opening up a new chapter in the country's modern history. Under Doi Moi, Vietnam has undergone significant socio-economic, political and foreign policy reforms that have transformed the country in many meaningful ways. This edited volume aims to provide an in-depth analysis of the multiple aspects and transformations of Vietnam's foreign policy over the past thirty years. The book is divided into three sections. The first covers the broader framework of Vietnam's foreign policymaking and the historical evolution of Vietnam's diplomacy under Doi Moi. The second examines Vietnam's bilateral relationships with its major partners, namely the United States, China, Japan, India, Russia, its

smaller neighbours (Cambodia and Laos), and ASEAN. Finally, the book looks into two major issues in Vietnam's current foreign policy: the management of the South China Sea disputes and the international economic integration process. As the most informative, updated and comprehensive volume on Vietnam's foreign policy under Doi Moi, the book is a useful reference source for academics, policymakers, students as well as anyone interested in contemporary Vietnam in general and its foreign policy in particular.

**Handbook of Research on Deception, Fake News, and Misinformation Online** Chilawa, Innocent E., Samoilenko, Sergei A., 2019-06-28 The growing amount of false and misleading information on the internet has generated new concerns and quests for research regarding the study of deception and deception detection. Innovative methods that involve catching these fraudulent scams are constantly being perfected, but more material addressing these concerns is needed. The Handbook of Research on Deception, Fake News, and Misinformation Online provides broad perspectives, practices, and case studies on online deception. It also offers deception-detection methods on how to address the

challenges of the various aspects of deceptive online communication and cyber fraud. While highlighting topics such as behavior analysis, cyber terrorism, and network security, this publication explores various aspects of deceptive behavior and deceptive communication on social media, as well as new methods examining the concepts of fake news and misinformation, character assassination, and political deception. This book is ideally designed for academicians, students, researchers, media specialists, and professionals involved in media and communications, cyber security, psychology, forensic linguistics, and information technology.

**Defeating the Dictators** Charles Dunst, 2023-02-02 ' Charles Dunst's deeply researched, timely and powerful book offers a blueprint for how democracies should fight back.' - Sir Kim Darroch  
'Remarkable. A thoughtful and perceptive book.' - Rt. Hon. Jeremy Hunt, MP The world is currently experiencing the lowest levels of democracy we have seen in over thirty years. Autocracy is on the rise, and while the cost of autocracy seems evident, it nevertheless remains an attractive option to many. While leaders like Viktor Orbán disrupt democratic foundations from within, autocrats like Xi

Jinping and Vladimir Putin do so from abroad, eroding democratic institutions and values and imperilling democracies that appear increasingly fragile. There are even those who, disillusioned with the current institutions in place, increasingly think authoritarianism can deliver them a better life than democracy has or could. They're wrong. Autocracy is not the solution - better democracy is. But we have to make the case for it. We have to combat institutional rot by learning from one another, and, at times, from our rivals. And we have to get our own houses in order. Only then can we effectively stand up for democratic values around the world and defeat the dictators.

*Trading in Uncertainty* Esther Horat, 2017-07-04 This book is an ethnographic case study, based on first hand observation, of family businesses in the northern Vietnamese village of Ninh Hiệp along the Red River Delta, which became a major hub for textiles in the wake of the country's shift towards market socialism. The author explores how the traders experience, negotiate and react to a marketization process that is markedly shaped by the state's morally ambivalent governance, and which can be thus characterised as an admixture of socialist and neoliberal ideologies. How are

traders shaping the political economy of Vietnam? How has the labour force changed as textile-handling has become an increasingly profitable undertaking? Horat explores the relationships between traders and local authorities, as well as changing ideas of masculinity and femininity. Focusing on the redevelopment of the market landscape and the increasing share of private ownership that have given rise to great uncertainty, this book provides a well-timed inquiry into current debates of economic development in a uniquely shaped market environment.

**The COVID-19 Pandemic and Risks in East Asia** Nobuto Yamamoto, 2022-11-29 Using risk as a conceptual lens, this book analyzes how communities across East Asia responded to the disruption unleashed by the COVID-19 pandemic. The contributors to this book look at how governments, societies, and individuals have perceived, experienced, dealt with and interpreted the pandemic and the transformations it has brought across countries like Japan, South Korea, Taiwan, Vietnam, and the Philippines. They examine pressing concerns such as infodemic, digital health literacy, media cynicism, telework, and digital inequalities in conjunction with issues such as public trust, identity formation,

nationalism, and social fragmentation. They look at a wide range of questions relating to communication, mediation, and reactions to the challenges of the pandemic. An insightful resource for scholars of risk studies and of East Asian societies, the book is also a valuable reference for students and researchers of media and communication studies and sociology.

**The Political Logics of Anticorruption Efforts in Asia** Cheng Chen, Meredith L. Weiss, 2019-12-01

Focusing on Northeast and Southeast Asia—regions notable for political diversity, difficult environments for fighting corruption, and multifarious anticorruption outcomes—this book examines the political dynamics behind anticorruption efforts there. The contributors present case studies of the Philippines, Indonesia, Taiwan, Vietnam, Thailand, South Korea, and China that explore the varying roles anticorruption efforts play in solidifying or disputing democratic and nondemocratic institutions and legitimacy, as well as the broader political and economic contexts that gave rise to these efforts. Whether motivated by private interests, party loyalty, or political institutionalization, political actors shape the trajectories of anticorruption efforts by challenging their opponents over what constitutes

corruption, what enables corruption, and how to combat corruption. Arguing that anticorruption strategy may be associated more closely with shifting bases of regime legitimacy than with regime type, the book sheds light on the divergent ways in which states control and respond to political elites and society at large, and on how citizens from across strata understand and engage with their states.

*Spiderweb Capitalism* Kimberly Kay Hoang, 2022-09-06 A behind-the-scenes look at how the rich and powerful use offshore shell corporations to conceal their wealth and make themselves richer In 2015, the anonymous leak of the Panama Papers brought to light millions of financial and legal documents exposing how the superrich hide their money using complex webs of offshore vehicles. *Spiderweb Capitalism* takes you inside this shadow economy, uncovering the mechanics behind the invisible, mundane networks of lawyers, accountants, company secretaries, and fixers who facilitate the illicit movement of wealth across borders and around the globe. Kimberly Kay Hoang traveled more than 350,000 miles and conducted hundreds of in-depth interviews with private wealth managers, fund managers, entrepreneurs, C-suite executives, bankers, auditors, and other financial professionals. She

traces the flow of capital from offshore funds in places like the Cayman Islands, Samoa, and Panama to special-purpose vehicles and holding companies in Singapore and Hong Kong, and how it finds its way into risky markets onshore in Vietnam and Myanmar. Hoang reveals the strategies behind spiderweb capitalism and examines the moral dilemmas of making money in legal, financial, and political gray zones. Dazzlingly written, *Spiderweb Capitalism* sheds critical light on how global elites capitalize on risky frontier markets, and deepens our understanding of the paradoxical ways in which global economic growth is sustained through states where the line separating the legal from the corrupt is not always clear.

*Technology Application in Tourism in Asia* Azizul Hassan, 2022-03-02 This book very specifically focuses on technology application in tourism in Asia. The book contains twenty-seven chapters in four sections (i.e., theories, innovations, practices, and future research directions), based on the intriguing qualities and importance of technology applications in the Asian tourism business. This book, a blend of comprehensive and extensive efforts by the contributors and editor, is designed to extensively cover

technology applications in tourism in Asia, including distinct topics such as mobile computing, new product designs, innovative technology usages in tourism promotion, technology-driven sustainable tourism development, location-based apps, mobility, accessibility, the post crisis situation of COVID-19, etc. This book is a significant contribution towards the very limited knowledge of technology applications in tourism, with selected examples of Asian countries. The importance of technology in Asian tourism is rapidly increasing, and has led to a rise in luxury, allowing citizens to enjoy leisure travel over both long and short distances. The rise of low-cost airlines and the region's growing, affluent middle class have changed the tourism environment dramatically. More tourists are booking their holidays online as a result of technological advancements. Online travel is the most important and well-established aspect of Asia's Internet economy. Considering the ongoing trend of technology applications in the tourism industry in Asia, more research attempts like this book need to be made aiming towards exploring diverse aspects. As tourism is an expanding area, this book can serve as a reading companion for tourism students, policy planners and industry professionals. This book is

expected to be appreciated by expatriate researchers and researchers having a keen interest in the Asian tourism industry.

**Timber Trafficking in Vietnam** Ngoc Anh Cao, 2018-02-09 This book is the first systematic investigation into the problem of timber trafficking in Vietnam, providing a detailed understanding of the typology of, victimization from, and key factors driving this crime. The book first reveals a multifaceted pattern of timber trafficking in Vietnam, comprising five different components: harvesting, transporting, trading, supporting, and processing. It then assesses the crime's victimization from timber trafficking. Thanks to the employment of a broad conceptual framework of human security, Cao reveals that timber trafficking has substantial harmful impacts on all seven elements of human security: economic, food, health, environmental, personal, community, and political; whilst being closely interconnected, they vary between different groups of victims. Cao concludes by offering five solutions to better control of timber trafficking in the context of Vietnam, which crucially involve refining the current policy framework of forest governance and improving the efficiency of law enforcement. A wide-ranging and

timely study, this book will hold particular appeal for scholars of green criminology and environmental harm.

*Management Practices in Asia* Christiane Prange, Ralph Kattenbach, 2019-08-20 Asia is a continent of contradictions and boundaries; it offers exciting business opportunities, but is also characterized by unpredictability and conflict. While flexibility and creativity are in the DNA of many startups in China, major players like Xiaomi and Alibaba have also emerged as global giants, challenging established global competitors. The authors of this book show that these companies are crossing various boundaries – between cultures, mindsets, and perspectives. At the same time, Western companies entering Asian markets face challenges that are very different from those on their home turf. This book addresses the needs of current and future managers doing business in Asia, who need to understand the individual, social and business challenges that can arise from crossing boundaries. The respective case studies provide essential insights on how several Asian companies

have made impressive strides towards becoming established players; how the revival of local brands and growing pride in local products has become a major challenge for global competition; how the need to actively practice corporate social responsibility in Asian markets is currently challenging many companies; and how the need for individual and team coaching among the members of management to support a company's development has grown tremendously, calling for new solutions.

*Postwar Journeys* Hang Thi Thu Le-Tormala,2021-06-18 *Postwar Journeys: American and Vietnamese Transnational Peace Efforts since 1975* tells the story of the dynamic roles played by ordinary American and Vietnamese citizens in their postwar quest for peace—an effort to transform their lives and their societies. Hang Thi Thu Le-Tormala deepens our understanding of the Vietnam War and its aftermath by taking a closer look at postwar Vietnam and offering a fresh analysis of the effects of the war and what postwar reconstruction meant for ordinary citizens. This thoughtful exploration of US-Vietnam postwar relations through the work of US and Vietnamese civilians expands

diplomatic history beyond its rigid conventional emphasis on national interests and political calculations as well as highlights the possibilities of transforming traumatic experiences or hostile attitudes into positive social change. Le-Tormala's research reveals a wealth of boundary-crossing interactions between US and Vietnamese citizens, even during the times of extremely restricted diplomatic relations between the two nation-states. She brings to center stage citizens' efforts to solve postwar individual and social problems and bridges a gap in the scholarship on the US-Vietnam relations. Peace efforts are defined in their broadest sense, ranging from searching for missing family members or friends, helping people overcome the ordeals resulting from the war, and meeting or working with former opponents for the betterment of their societies. Le-Tormala's research reveals how ordinary US and Vietnamese citizens were active historical actors who vigorously developed cultural ties and promoted mutual understanding in imaginative ways, even and especially during periods of governmental hostility. Through nonprofit organizations as well as cultural and academic exchange programs, trailblazers from diverse backgrounds promoted mutual understanding and acted as catalytic

forces between the two governments. Postwar Journeys presents the powerful stories of love and compassion among former adversaries; their shared experiences of a brutal war and desire for peace connected strangers, even opponents, of two different worlds, laying the groundwork for US-Vietnam diplomatic normalization.

**Vietnam Tourism** Huong T. Bui, Giang T. Phi, Long H. Pham, Huong H. Do, Andrew Le, Binh Nghiem-Phu, 2022-02-18 Vietnam has experienced rapid growth within its tourism industry during the past decades. This growth is part of Vietnam's opening economy allowing a wide range of forms of tourism. *Vietnam Tourism: Policies and Practices* provides a comprehensive review of tourism development in Vietnam. Part I outlines the history of tourism, the role and involvement of public and private sectors in governance and planning, and the markets for tourism. Part II offers analysis and assessment of various types of tourism in Vietnam, including marine and island, eco, heritage, dark and community-based tourism. Part III centres on current operational issues of tourism, hotels and events. Written by scholars with extensive research experience on tourism in Vietnam this book is a reliable source of

reference for students, researchers and industry practitioners who are interested modern tourism specifically in Vietnam and Southeast Asia.

*The Dragon's Underbelly* Nhu Truong, Tuong Vu, 2023-01-13 This book shows why Vietnam has not become the dragon it is often touted to be. The team of authors include both long-time observers and junior scholars who present cutting-edge research on the latest trends as well as major challenges facing the country's economy and political system. As Vietnam seeks to escape from poverty and the legacies of mistaken socialist policies, its economy has become fully integrated into the global economy. Yet, without an effective and far-sighted leadership, it is still occupying a low position in the global value chains and becoming increasingly dependent on China. Politically, after three decades of reform, the Vietnamese Communist Party's grip on power has well adapted to the market economy, but is confronting deep vulnerabilities as observed in its eroding ability to control workers, the media, public universities, and state-owned enterprises. The book also includes a section that applies formal and statistical methods to compare Vietnam with China in two critical areas of political accountability

and anti-corruption policy.
