Adobe Illustrator 9.0 ,2000 Learn how to create professional-quality artwork for print or the Web using Illustrator 9, the world's most popular illustration application Updated edition of the worldwide bestseller Adobe Illustrator is one of the most popular vector graphics tools in the print and web industry Self-paced lessons are the ideal introduction to Illustrator's complex features Adobe Illustrator 9.0 Classroom in a Book shows users how to master Adobe Illustrator in short, focused lessons. Created by Adobe's own training experts, it covers all the new features of Illustrator 9, including added compatibility with Macromedia Flash, a new Transparency Palette, and superior vector and raster graphics. Readers start with an introduction to Illustrator's many tools, brushes, and palettes. Lessons include making selections, painting, gradient fills, drawing straight lines, using type and creating type masks, outlining paths with patterns, printing artwork, producing color separations, and preparing finished artwork for print or the Web. Each lesson builds upon the knowledge learned in previous lessons, so readers have a full tour of the software by the time they have finished the book. The cross-platform CD provides all the lessons and images needed for each chapter. Previous Edition ISBN: 1-56830-470-6 The Adobe Creative Team is made up of members of Adobe's User Education Group. They take their expertise in training users to work with Adobe products, combine it with the creative talents of the Adobe Illustrator team, and add the valuable content of the CD-ROM to make a unique learning package from Adobe Systems.

Narratives of fear and safety Kaisa Kaukiainen,Kaisa Kurikka,Hanna Mäkelä,Elise Nykänen,Sanna Nyqvist,Juha Raipola,Anne Riippa,Hanna Samola,2020-09-01 The essays in this edited volume, written in English and French, tackle the intriguing problems of fear and safety by analysing their various meanings and manifestations in literature and other narrative media. The articles bring forth new, cross-cultural interpretations on fear and safety through examining what kinds of genre-specific means of world-making narratives use to express these two affectivities. The articles also show how important it is to study these themes in order to understand challenges in times of global threats, such as the climate crisis. The main themes of the book are approached from various theoretical perspectives as related to their literary and cultural representations. Recent trends in research, such as affect and risk theory, serve as the basis for the discussion. The articles in the volume also draw from disciplines such as gender studies and trauma studies to examine the threats posed by collective fears and aggression on individuals' lives and propose ways of coping with fear. These themes are addressed also in articles analysing new adaptations of old myths that retell stories of the past. Many of the articles in the volume discuss apocalyptic and dystopian narratives that currently permeate the entire cultural landscape. Dystopian narratives do not only deal with future threats, such as totalitarianism, technocracy, or environmental disasters, but also suggest alternative ways of being and new hopes in the form of political resistance.

The Mac Almanac Sharon Zardetto Aker,1994 Written in the same conversational tone that made The Macintosh Bible such a success, this book takes the concept of the ultimate reference book one step further. With completely updated information, more graphics, and dramatically improved internal design, this book is destined to become the premiere general reference book for today's Mac enthusiasts.

Python for Probability, Statistics, and Machine Learning José Unpingco,2019-06-29 This book, fully updated for Python version 3.6+, covers the key ideas that link probability, statistics, and machine learning illustrated using Python modules in these areas. All the figures and numerical results are reproducible using the Python codes provided. The author develops key intuitions in machine learning by working meaningful examples using multiple analytical methods and Python codes, thereby connecting theoretical concepts to concrete implementations. Detailed proofs for certain important results are also provided. Modern Python modules like Pandas, Sympy, Scikit-learn, Tensorflow, and Keras are applied to simulate and visualize important machine learning concepts like the bias/variance trade-off, cross-validation, and regularization. Many abstract mathematical ideas, such as convergence in probability theory, are developed and illustrated with numerical examples. This updated edition now includes the Fisher Exact Test and the Mann-Whitney-Wilcoxon Test. A new section on survival analysis has been included as well as substantial development of Generalized Linear Models. The new deep learning section for image processing includes an in-depth discussion of gradient descent methods that underpin all deep learning algorithms. As with the prior edition, there are new and updated *Programming Tips* that illustrate effective Python modules and methods for scientific programming and machine learning. There are 445 run-able code blocks with corresponding outputs that have been tested for accuracy. Over 158 graphical visualizations (almost all generated using Python) illustrate the concepts that are developed both in code and in mathematics. We also discuss and use key Python modules such as Numpy, Scikit-learn, Sympy, Scipy, Lifelines, CvxPy, Theano, Matplotlib, Pandas, Tensorflow, Statsmodels, and Keras. This book is suitable for anyone with an undergraduate-level exposure to probability, statistics, or machine learning and with rudimentary knowledge of Python programming.

The School Bereavement Toolkit Jacquie Palmer,2021-08-09 Practical and accessible, this guidebook is designed to help staff in schools support bereaved children in their care. Providing information and guidance on practical issues around bereavement and indicating some of the issues that might require extra thought or assistance, this book makes accessing relevant information as easy and quick as possible. When busy school staff are faced with a bereaved child, the prospect can be daunting. What do I say? What can I do? Will I make it worse? Have I got time to do this? This book is a toolbox to give staff confidence in helping bereaved young people. Information is easily accessed and simple to use, giving staff quick and practical help. There are sections on what will help and what will not; also included are photocopiable worksheets and tools to aid children and young people to explore their grief, as well as information on how school communities can share the news and manage an initial response. With age-appropriate guidance to help school staff working in both primary and secondary settings, this key guide provides quick-to-access information for those not trained in child bereavement to help individual children or whole classes following a loss.
