With the right techniques and software, today's high-tech equipment can be used to create outstanding photographs or stunning digital imaging projects. This book allows any educator to teach digital photography/video and multimedia, regardless of previous experience with digital imaging, supplying tested and proven lesson plans, hands-on project ideas, and grading rubrics for a full-year course. Ideal for middle school, high school, and community college teachers as well as public youth services librarians, particularly those embracing the makerspace movement, *Teaching Digital Photography: The Ultimate Guide to 'Tween and Teen Learning* provides a detailed educational plan advising how to purchase equipment, set up a classroom or library area to be used for instruction, and instruct the students in the skills needed to become excellent digital photographers. The first half of the book focuses on establishing the class: the general philosophy, the classroom, and the equipment. Three chapters are dedicated to exploring the best ways to teach students the skills of photography, digital image improvement, and digital layout. The final sections of the book provide more than 20 digital layout projects and cover digital video production.

Great on Camera Larry Becker, 2020-04-13 7 Undeniable Truths... People do business with people or companies they know, like, and trust. The best way to connect with someone and build trust, is in person. And when that's not an option, the second best way to connect and build trust is with video. Online videos have exponentially more engagement than pictures and written text. Videos are used by companies of every size. Consumers expect/demand video. Most people are uncomfortable being on camera. There are countless ways to be bad on camera and most people make mistakes they don't even realize. There's no question that everyone in business, from Fortune 100 companies to solopreneurs, can leverage video to connect better with your target market, as well as existing customers. The problem is that most people aren't comfortable being on camera. Then an even bigger problem is that, once people come to grips with the fact that they have to be on camera, most people make mistakes that send the wrong message to the viewer. And the crazy part is that they have no idea they're sending a negative message on camera. Great On Camera is all about understanding everything you need to know so you can be your best on camera, connect with your target market, build trust, and make sales.

Going Multinational Frédérique Sachwald, 2001 At the beginning of the 1990s, Korean firms embarked on an impressive wave of direct investment abroad. This dramatic multinationalization was considered as yet another sign of Korea's remarkable economic performance, especially as a high proportion of the foreign ventures were located in advanced countries. But this unbalanced quest for globalization actually tested the 'Korean model' to its limits; after the 1997 crisis a new policy prepared the way for a surge of inward investment. Using empirical tests and case-studies, this collection shows that Korean groups have invested in developed countries to jump over trade barriers, but also to source advanced technology and marketing capabilities. Moreover, their ambitious strategies have been stimulated by oligopolistic rivalry among the chaebols. From a policy perspective, the book provides an original discussion of national ownership by questioning the substitutability between inward and outward foreign investment and its relationship with the evolution of the national innovation system. By shedding light on the pattern of Korea's internationalization, these essays make a valuable contribution to the theory of international production and provide important insights for the current policy debates on globalization and innovation-led growth.
