Cataloging Cultural Objects Murtha Baca, 2006-06-12 In a visual and artifact-filled world, cataloging one-of-a-kind cultural objects without published guidelines and standards has been a challenge. Now for the first time, under the leadership of the Visual Resources Association, a cross-section of five visual and cultural heritage experts, along with scores of reviewers from varied institutions, have created a new data content standard focused on cultural materials. This cutting-edge reference offers practical resources for cataloging and flexibility to meet the needs of a wide range of institutions—from libraries to museums to archives. Consistently following these guidelines for selecting, ordering, and formatting data used to populate metadata elements in cultural materials' catalog records: Promotes good descriptive cataloging and reduces redundancy Builds a foundation of shared documentation Creates data sharing opportunities Enhances end-user access across institutional boundaries Complements existing standards (AACR) This is a must-have reference for museum professionals, visual resources curators, archivists, librarians and anyone who documents cultural objects (including architecture, paintings, sculpture, prints, manuscripts, photographs, visual media, performance art, archaeological sites, and artifacts) and their images.

Introduction to Art Image Access Murtha Baca, 2002 With the proliferation of information on the World Wide Web and in other networked environments, there are many users that search for images of works of art and architecture. End-users generally try to search for images by subject, a process that often proves unsatisfactory and frustrating. Cataloging images of works of art has always been challenging, but now that end-users need only have access to the Internet, the challenge is more daunting than ever. This illustrated book on using metadata standards and controlled vocabularies to catalog and provide end-user access to images of works of art also focuses on decisions that must be made about the arrangement of visual records, descriptive principles and methodologies, and requirements for access. *Introduction to Art Image Access* addresses the issues that underlie the intellectual process of documenting a visual collection to make it accessible in an electronic environment. A glossary, selected bibliography, and an annotated list of tools are included.

Introduction to Art Image Access, 2013 In *Introduction to Art Image Access*, four experts present strategies for using metadata standards and controlled vocabularies to provide accurate access to images of works of art via subject analysis and description. They also address the organization and arrangement of visual records and outline descriptive principles and methodologies. An annotated list of tools, a glossary, and a selected bibliography are included.--BOOK JACKET.

The FIAF Moving Image Cataloguing Manual Linda Tadic, 2016-10-17 The FIAF Moving Image Cataloguing Manual is the result of many years of labor and collaboration with numerous professionals in the moving image field. It addresses the changes in information technology that we've seen over the past two decades, and aligns with modern cataloguing and metadata standards and concepts such as FRBR (Functional Requirements for Bibliographic Records), EN 15907, and RDA (Resource Description and Access). The manual is designed to be compatible with a variety of data structures, and provides charts, decision trees, examples, and other tools to help experts and non-experts alike in performing real-world cataloguing of moving image collections.

Moving Image Cataloging Martha M. Yee, 2007-10-30 Libraries, archives, and museums hold a wide variety of moving images. all of which require the same level of attention to issues of organization and access as their print counterparts. Consequently, the people who create collection level records and metadata for these resources need to be equally conversant in the principles of cataloging. Martha Yee covers both descriptive (AACR2R, AMIM, and FIAF rules) and subject cataloging (with a focus on LCSH). In the process, the reader is encouraged to think critically and to be prepared to make decisions in ambiguous situations where solutions to problems are not always obvious or clearly dictated by specific rules.
