The Lifestyle Taylor Hahn, 2023-05-16 A heartwarming and hilarious novel about swinging, marriage, and complexities of the heart. "This book is fun as hell. Hilarious, addictive, moving, and sexy. I lost track of time reading it, and I couldn't get enough!" –Jasmine Guillory, bestselling author of *While We Were Dating* Georgina Wagman has it all—a great marriage, a great job at a prestigious law firm, and great friends. She's living the life she always wanted, and everything is perfect. Until, that is, she walks in on her husband Nathan in a compromising position with a junior associate. Georgina has a moment of crisis. But divorce is not a part of the five-year plan, so she comes up with an idea to save her marriage and recapture the spark. She and Nathan are going to become swingers. Georgina isn't going to embark on this adventure alone, though. Her friends Felix and Norah and their respective partners decide to tag along for the ride. They've got relationship woes of their own that swinging just might fix. Georgina, convinced Felix and Norah belong together, is thrilled. What better place to reignite romance between two people destined to be together than a swingers' party? Her plan is foolproof, until she runs into a college ex at the first party. When they reconnect, Georgina will find herself torn between her head and her heart, with her very happiness hanging in the balance. Perfect for fans of Jennifer Weiner and Sophie Kinsella, *The Lifestyle* is a playful homage to Jane Austen's *Emma* Woodhouse and an outrageously fun summer read.

Living the 1.5 Degree Lifestyle Lloyd Alter, 2021-09-14 Stop thinking about efficiency and start thinking about sufficiency *Living the 1.5 Degree Lifestyle* reveals the carbon cost of everything we do, identifying where we can make big reductions, while not sweating the small stuff. The international scientific consensus is that we have less than a decade to drastically slash our collective carbon emissions to keep global heating to 1.5 degrees and avert catastrophe. This means that many of us have to cut our individual carbon footprints by over 80% to 2.5 tonnes per person per year by 2030. But where to start? Drawing on Lloyd Alter's journey to track his daily carbon emissions and live the 1.5 degree lifestyle, coverage includes: What it looks like to live a rich and truly green life From take-out food, to bikes and cars, to your internet usage – finding the big wins, ignoring the trivial, and spotting marketing ploys The invisible embodied carbon baked into everything we own and why electric cars aren't the answer How to start thinking about sufficiency rather than efficiency The roles of individuals versus governments and corporations. Grounded in meticulous research and yet accessible to all, *Living the 1.5 Degree Lifestyle* is a journey toward a life of quality over quantity, and sufficiency over efficiency, as we race to save our only home from catastrophic heating.

Lifestyle TV Laurie Ouellette, 2016 From HGTV and the Food Network to *Keeping Up With the Kardashians*, television is preoccupied with the pursuit and exhibition of lifestyle. *Lifestyle TV* analyzes a burgeoning array of lifestyle formats on network and cable channels, from how-to and advice programs to hybrid reality entertainment built around the cultivation of the self as project, the ethics of everyday life, the mediation of style and taste, the regulation of health and the body, and the performance of identity and difference. Ouellette situates these formats historically, arguing that the *lifestyling* of television ultimately signals more than the television industry's turn to cost-cutting formats, niche markets, and specialized demographics. Rather, Ouellette argues that the surge of reality programming devoted to the achievement and display of lifestyle practices and choices must also be situated within broader socio-historical changes in capitalist democracies.

Lifestyle and Social Structure Michael E. Sobel, 2013-09-11 Lifestyle and Social Structure: Concepts, Definitions, Analyses is devoted to the relationship between lifestyle and social structure. The book begins by constructing a meaningful concept of lifestyle in order to understand and model this relationship. The general formulation of the concept hinges on the descriptive word style, defined as any distinctive, and therefore recognizable way in which an act is performed or an artifact made or ought to be performed and made. After developing the implications of the definition, lifestyle is defined, by analogy, as any distinctive, and therefore recognizable mode of living. The notion of social structure is then introduced, arguing that structural differentiation engenders lifestyle differentiation. The remainder of the work is concerned primarily with the modeling of this relationship using data from the 1972-1973 Survey of Consumer Expenditures, and with the concept of stylistic unity. Key topics discussed include the relationship between the theory of lifestyle differentiation and modern economic utility theory; psychographic notions of lifestyle; and the relationships between lifestyle and other key sociological concepts (stratification, alienation). The concept of lifestyle should be of interest to a broad range of applied and theoretical researchers.

Lifestyle Journalism Folker Hanusch, 2014-03-05 Lifestyle journalism has experienced enormous growth in the media over the past two decades, but scholars in the fields of journalism and communication studies have so far paid relatively little attention to a field that is still sometimes seen as not real journalism. There is now an urgent need for in-depth exploration and contextualisation of this field, with its increasing relevance for 21st century consumer cultures. For the first time, this book presents a wide range of studies which have engaged with the field of lifestyle journalism in order to outline the various political, economic, social and cultural tensions within it. Taking a comparative view, the collection includes studies covering four continents, including countries such as Australia, China, Norway, Denmark, Singapore, the UK and the USA. While keeping the broader lifestyle field in mind, the chapters focus on a variety of sub-fields such as travel, music, food, health, fashion and personal technology journalism. This volume provides a fascinating account of the different facets of lifestyle journalism, and charts the way forward for a more sustained analysis of the field. This book was originally published as a special issue of Journalism Practice.

Lifestyle and Nature Ryuzo Furukawa, Yuko Suto, Emile H. Ishida, Takeshi Yamauchi, 2019-02-05 Environmental constraints are becoming increasingly severe, and now more than ever it is time that we confront head-on the change from an underground resources type of civilization to one with a new way of life and technology that embraces a sense of nature. To do so, we need to understand the process of the civilization change. We must change our way of thinking to backcasting in order to design future lifestyles and learn from the elderly who lived with nature under severe environmental constraints more than 70 years ago. We must also learn from nature directly, the only sustainable society on earth. This book introduces Bio-TRIZ and ontology engineering to match and find technologies needed for spiritually affluent lifestyles. It provides many examples of Japanese cities that conducted lifestyle design projects based on nature technology. The book is a great reference for graduate-level students of environmental studies and engineering and for researchers in innovation, social science, engineering, and public policy, especially those with an interest in lifestyle change for a sustainable society.

The Biopolitics of Lifestyle Christopher Mayes, 2015-12-22 A growing sense of urgency over obesity at the national and international level has led to a proliferation of medical and non-medical interventions into the daily lives of individuals and populations. This work focuses on the biopolitical use of lifestyle to govern individual choice and secure population health from the threat of obesity. The characterization of obesity as a threat to society caused by the cumulative effect of individual lifestyles has led to the politicization of daily choices, habits and practices as potential threats. This book critically examines these unquestioned assumptions about obesity and lifestyle, and their relation to wider debates surrounding neoliberal governmentality, biopolitical regulation of populations, discipline of bodies, and the possibility of community resistance. The rationale for this book follows Michel Foucault's approach of problematization, addressing the way lifestyle is problematized as a biopolitical domain in neoliberal societies. Mayes argues that in response to the threat of obesity, lifestyle has emerged as a network of disparate knowledges, relations and practices through which individuals are governed toward the security of the population's health. Although a central focus is government health campaigns, this volume demonstrates that the network of lifestyle emanates from a variety of overlapping domains and disciplines, including public health, clinical medicine, media, entertainment, school programs, advertising, sociology and ethics. This book offers a timely critique of the continued interventions into the lives of individuals and communities by government agencies, private industries, medical and non-medical experts in the name of health and population security and will be of interests to students and scholars of critical international relations theory, health and bioethics and governmentality studies.

The Consumption and Representation of Lifestyle Sports Belinda Wheaton,2014-06-11 Since their emergence in the 1960s, lifestyle sports (also referred to as action sport, extreme sports, adventure sports) have experienced unprecedented growth both in terms of participation and in their increased visibility across public and private space. book seeks to explore the changing representation and consumption of lifestyle sport in the twenty-first century. The essays, which cover a range of sports, and geographical contexts (including Brazil, Europe, North America and Australasia) focus on three themes. First, essays scrutinise aspects of the commercialisation process and impact of the media, reviewing and reconsidering theoretical frameworks to understand these processes. The scholars here emphasise the need to move beyond simplistic understandings of commercialisation as co-option and resistance, to capture the complexity and messiness of the process, and of the relationships between the cultural industries, participants and consumers. The second theme examines gender identity and representations, exploring the potential of lifestyle sport to be a politically transformative space in relation to gender, sexuality and 'race'. The last theme explores new theoretical directions in research on lifestyle sport, including insights from philosophy, sociology and cultural geography. The themes the monograph addresses are wide reaching, and centrally concerned with the changing meaning of sport and sporting identity in the twenty-first century. This book was previously published as a Special Issue of Sport in Society.
