All Health Politics Is Local Merlin Chowkwanyun, 2022-05-09 Health is political. It entails fierce battles over the allocation of resources, arguments over the imposition of regulations, and the mediation of dueling public sentiments—all conflicts that are often narrated from a national, top-down view. In *All Health Politics Is Local*, Merlin Chowkwanyun shifts our focus, taking us to four very different places—New York City, Los Angeles, Cleveland, and Central Appalachia—to experience a national story through a regional lens. He shows how racial uprisings in the 1960s catalyzed the creation of new medical infrastructure for those long denied it, what local authorities did to curb air pollution so toxic that it made residents choke and cry, how community health activists and bureaucrats fought over who'd control facilities long run by insular elites, and what a national coal boom did to community ecology and health. *All Health Politics Is Local* shatters the notion of a single national health agenda. Health is and has always been political, shaped both by formal policy at the highest levels and by grassroots community battles far below.

Theories of Local Immigration Policy Felipe Amin Filomeno, 2016-11-25 This book offers a critical account of studies of local immigration policy and a relational approach to explain its emergence, variation, and effects in a context of interdependence and globalization. The author emphasizes the horizontal interactions between local governments, and vertical interactions between local and national levels of government, as well as international interactions. Everywhere in the world, a growing number of cities are faced with challenges and opportunities brought by immigration. While some local governments have welcomed immigrants and promoted their social inclusion, others have actively prevented their arrival and settlement. Most studies emphasize the role of local conditions in the making and implementation of local immigration policy, but this book argues that broader processes—such as inter-governmental relations, economic globalization, and international institutions—are crucial.

World Television Joseph D. Straubhaar, 2007-05-18 *World Television: From Global to Local*, a new assessment of the interdependence of television across cultures and nations brings together the most current research and theories on the subject. By examining recent developments in the world system of television as well as several theories of culture, industry, genre, and audience, author Joseph D. Straubhaar offers new insights into the topic. He argues that television is being simultaneously globalized, regionalized, nationalized, and even localized, with audiences engaging it at multiple levels of identity and interest; therefore the book looks at all these levels of operation. Key Features Draws upon both international communication and cultural studies perspectives: Presents a new model is presented that attempts to move beyond the current controversies about imperialism and globalization. Looks at historical patterns: Historical patterns across cultures and countries help compare where television has been and where it is going. Takes a contemporary focus: Uses of technology, flows and patterns of program development, genres of television, the interaction of producers and audiences, and patterns of audience choice among emerging alternatives are examined. Explores how the audience for these evolving forms of television is structured: The effects of these forces or patterns of television have on both cultural formations and individual identities are identified. Intended Audience This is an excellent text for advanced undergraduate and graduate courses in Globalization and Culture, Global Media, Television Studies, Television Criticism, and International Media.

But for Birmingham Glenn T. Eskew, 2000-11-09 Birmingham served as the stage for some of the most dramatic and important moments in the history of the civil rights struggle. In this vivid narrative account, Glenn Eskew traces

the evolution of nonviolent protest in the city, focusing particularly on the sometimes problematic intersection of the local and national movements. Eskew describes the changing face of Birmingham's civil rights campaign, from the politics of accommodation practiced by the city's black bourgeoisie in the 1950s to local pastor Fred L. Shuttlesworth's groundbreaking use of nonviolent direct action to challenge segregation during the late 1950s and early 1960s. In 1963, the national movement, in the person of Martin Luther King Jr., turned to Birmingham. The national uproar that followed on Police Commissioner Bull Connor's use of dogs and fire hoses against the demonstrators provided the impetus behind passage of the watershed Civil Rights Act of 1964. Paradoxically, though, the larger victory won in the streets of Birmingham did little for many of the city's black citizens, argues Eskew. The cancellation of protest marches before any clear-cut gains had been made left Shuttlesworth feeling betrayed even as King claimed a personal victory. While African Americans were admitted to the leadership of the city, the way power was exercised--and for whom--remained fundamentally unchanged.

Local Peacebuilding and National Peace Christopher R. Mitchell, Landon E. Hancock, 2012-05-03 Local Peacebuilding and National Peace is a collection of essays that examines the effects of local peacebuilding efforts on national peace initiatives. The book looks at violent and protracted struggles in which local people have sought to make their own peace with local combatants in a variety of ways, and how such initiatives have affected and have been affected by national level strategies. Chapters on theories of local and national peacemaking are combined with chapters on recent efforts to carry out such processes in war torn societies such as Africa, Asia, and South America, with essays contributed by experts who were actually actively involved in the peacemaking process. With its unique focus on the interaction of peacemaking at local and national levels, the book will fill a gap in the literature. It will be of interest to students and researchers in such fields as peace studies, conflict resolution, international relations, postwar recovery and development.

Global and Local Internationalization Elspeth Jones, Robert Coelen, Jos Beelen, Hans de Wit, 2015-12-14 Offering a range of perspectives on internationalization in higher education from a globally dispersed group of authors, this book reflects the many facets of the theme. It reminds us that, while internationalization is strongly connected to the globalization of society, at the same time it is deeply embedded in local political, economic and social structures, systems and cultures. The increasing attention given to internationalization by institutions all around the world is leading to diversification and broadening of practice. This in turn deepens our understanding of what is needed to enhance the educational experiences of students, and how the outcomes of internationalization contribute to the skills needed in a globalized and multicultural society. Yet inevitably the impact is becoming more noticeable locally and the six sections of the book focus on these dimensions: • Internationalization in Local and Global Contexts • Local and Global Drivers for Change • Global and Local Dimensions of Curriculum Internationalization • The Outcomes of Local and Global International Education • Internationalization for Local and Global Employability • Regional and National Cases of Local and Global Internationalization How can we define more precise learning outcomes that underpin learning and teaching? How do we avoid the societal risks of internationalization and ensure that internationalization opportunities and benefits are shared equally? How do we prevent brain drain and commercialization? What are the values that underlie our actions? These are just some of the questions that will occupy our minds, locally and globally, in the years to come and which this book seeks to highlight.

Local and Community Driven Development Hans P. Binswanger-Mkhize, Jacomina P. de Regt, Stephen Spector, 2010-02-12 'Local and Community Driven Development: Moving to Scale in Theory and Practice' provides development

practitioners with the historical background and the tools required to successfully scale up local and community driven development (LCDD) to the regional and national levels. LCDD gives control of development decisions and resources to communities and local governments. It involves collaboration between communities, local governments, technical agencies, and the private sector. Since the 1980s, participatory approaches have received new impetus via participatory rural appraisal, the integration of participation in sector programs, decentralization efforts of developing countries, and greater space for civil society and the private sector. This book traces the emergence of the LCDD synthesis from these various strands. 'Local and Community Driven Development' provides the theoretical underpinnings for scaling up, guidance on how to adapt the approach to the specific institutional and political settings of different countries, diagnostic tools, and step-by-step instructions to diagnose the national context, adapt policies, and expand programs. It will be a useful guide for rural and urban development practitioners, public administrators, and policy makers who wrestle daily with the problems the book addresses.

On Doing Local History Carol Kammen, 2014-04-04 For over thirty years, Carol Kammen's *On Doing Local History* has been a valuable guide to professional and "amateur" historians alike. First published in 1986, revised in 2003, this book offers not only discussion of practical matters, but also a deeper reflection on local, public history, what it means, and why it is done. It is used in classrooms and found on the shelves of local historians across the U.S. The third edition features: Updates to chapters that focus on the current concerns and situation of local historians A new chapter on how the field of history cooperates with other arts A new chapter on writing a congregational history Updated references With the same passion (and now even more experience) that drove her to write the first edition, Kammen has brought her seminal work into today's context for the next generation of local historians. The new edition ensures that this classic will continue to move anyone interested in public history towards a better understanding of why they do what they do and how it benefits their communities.

National Transportation Science and Technology Strategy National Science and Technology Council (U.S.). Subcommittee on Transportation Research and Development, 1999 The National Science and Technology Council (NSTC) Committee on Technology, Subcommittee on Transportation Research and Development (R & D), has created a National Transportation Science and Technology Strategy that builds on the earlier strategy published in 1997. Like its predecessor, the National Strategy is intended to help Congress and the Administration establish national transportation R & D priorities and coordinated research activities. The National Strategy articulates goals for transportation system safety, mobility and access, economic growth, the environment and national security. It proposes the broader involvement of state, local and tribal agencies; academic institutions; and private industry in national transportation R & D strategic planning and system assessment, private-public technology partnerships, enabling research and transportation education and training.

Global Trends 2040 National Intelligence Council, 2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated

economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Becoming Apart Michael Lewis, 2020-03-23 Focusing on the marginal region of Toyama, on the Sea of Japan, the author explores the interplay of central and regional authorities, local and national perceptions of rights, and the emerging political practices in Toyama and Tokyo that became part of the new political culture that took shape in Japan following the Meiji Restoration. Lewis argues that in response to the demands of the centralizing state, local elites and leaders in Toyama developed a repertoire of supple responses that varied with the political or economic issue at stake.

Local Food Environments Kimberly B. Morland, Yael M. Lehmann, Allison E. Karpyn, 2022-04-19 In this book, Morland, Lehmann, and Karpyn discuss the critical need for healthy food financing programs as a vehicle to improve food access for all Americans. In my career as a public servant, there are very few legislative achievements that I'm prouder of than the Healthy Food Financing Initiative, which started in my home state of Pennsylvania. The program gained status as a proven and economically sustainable federal program that is helping to improve the quality of life in our neighborhoods: by allowing millions access to healthy, affordable food. - Congressman Dwight Evans United States House of Representatives, Pennsylvania, District 3 If we work together, we can create a healthy food system that is equitable and accessible to all. This book highlights the importance of healthy food projects like grocery stores, farmers markets, co-ops, and other healthy food retail in revitalizing local communities across the country. Without basic nourishment, kids and families simply won't be successful - which is why this book is a must read. - Sam Kass President Obama's Senior Nutrition Policy Advisor and Executive Director of Let's Move! Morland and colleagues' new second edition provides an excellent foundation for courses in food policy and community nutrition. Their detailed review of the economics of local and national food financing will open students' minds to the complexity inherent in measuring and interpreting outcomes. - Robert S. Lawrence, MD, MACP Founder and Former Director of the Center for a Livable Future Johns Hopkins University, Bloomberg School of Public Health Features ● Describes how disparities in food access formed in the United States ● Includes federal policies and programs aimed at addressing food access in underserved areas, including the Healthy Food Financing Initiative ● Features examples of state initiatives that address poor access to food retailers ● Provides methods for program evaluation utilizing principals of implementation and dissemination science ● Includes critical thinking questions and embedded videos aimed to generate discussions on how restricted local food environments in the United States are rooted in economic disparities that impact food access as well as housing, education, and job opportunities

The Routledge Handbook of Local Elections and Voting in Europe Adam Gendźwiłł, Ulrik Kjaer, Kristof Steyvers, 2022-02-27 The Routledge Handbook of Local Elections and Voting in Europe represents the standard

reference text and practical resource for everybody who analyzes issues such as local electoral systems, voting behavior, or political representation in Europe. It provides comprehensive and expert coverage of 40 European countries – organized along the respective local state traditions – and in addressing a wide range of important questions related to local elections and voting, it broadens the scope of existing analyses quantitatively as well as qualitatively. Finally, it affords a more theoretically grounded typology of local elections and voting. Each country chapter is written by a leading expert and follows a rigorous conceptual framework for cross-national comparisons, providing an overview of the local government system, details on the place of local elections within the multilevel political system, specific features of the electoral system, analysis of the main electoral outcomes in recent decades, and, finally, reflective discussion. Representative democracy is as widespread at the local as at the national level, and as the significance of local authorities in Europe has increased in recent decades, local elections represent a crucial area of study. The Routledge Handbook of Local Elections and Voting in Europe is an authoritative and essential reference text for scholars and students interested in local electoral politics and, more broadly, European studies, public administration, and political science.

Valuing U.S. National Parks and Programs Linda J. Bilmes, John B. Loomis, 2019-07-12 This book provides the first comprehensive economic valuation of U.S. National Parks (including monuments, seashores, lakeshores, recreation areas, and historic sites) and National Park Service (NPS) programs. The book develops a comprehensive framework to calculate the economic value of protected areas, with particular application to the U.S. National Park Service. The framework covers many benefits provided by NPS units and programs, including on-site visitation, carbon sequestration, and intellectual property such as in education curricula and filming of movies/ TV shows, with case studies of each included. Examples are drawn from studies in Santa Monica Mountains National Recreation Area, Golden Gate National Recreation Area, Everglades National Park, and Chesapeake Bay. The editors conclude with a chapter on innovative approaches for sustainable funding of the NPS in its second century. The framework serves as a blueprint of methodologies for conservationists, government agencies, land trusts, economists, and others to value public lands, historical sites, and related programs, such as education. The methodologies are relevant to local and state parks, wildlife refuges, and protected areas in developed and developing countries as well as to national parks around the world. Containing a series of unique case studies, this book will be of great interest to professionals and students in environmental economics, land management, and nature conservation, as well as the more general reader interested in National Parks.

The Nature and Role of Algebra in the K-14 Curriculum National Research Council, National Council of Teachers of Mathematics and Mathematical Sciences Education Board, Center for Science, Mathematics, and Engineering Education, 1998-10-23 With the 1989 release of *Everybody Counts* by the Mathematical Sciences Education Board (MSEB) of the National Research Council and the Curriculum and Evaluation Standards for School Mathematics by the National Council of Teachers of Mathematics (NCTM), the standards movement in K-12 education was launched. Since that time, the MSEB and the NCTM have remained committed to deepening the public debate, discourse, and understanding of the principles and implications of standards-based reform. One of the main tenets in the NCTM Standards is commitment to providing high-quality mathematical experiences to all students. Another feature of the Standards is emphasis on development of specific mathematical topics across the grades. In particular, the Standards emphasize the importance of algebraic thinking as an essential strand in the elementary school curriculum. Issues related to school algebra are pivotal in many ways. Traditionally, algebra in high school or earlier has been considered a gatekeeper, critical to participation in postsecondary education, especially for

minority students. Yet, as traditionally taught, first-year algebra courses have been characterized as an unmitigated disaster for most students. There have been many shifts in the algebra curriculum in schools within recent years. Some of these have been successful first steps in increasing enrollment in algebra and in broadening the scope of the algebra curriculum. Others have compounded existing problems. Algebra is not yet conceived of as a K-14 subject. Issues of opportunity and equity persist. Because there is no one answer to the dilemma of how to deal with algebra, making progress requires sustained dialogue, experimentation, reflection, and communication of ideas and practices at both the local and national levels. As an initial step in moving from national-level dialogue and speculations to concerted local and state level work on the role of algebra in the curriculum, the MSEB and the NCTM co-sponsored a national symposium, The Nature and Role of Algebra in the K-14 Curriculum, on May 27 and 28, 1997, at the National Academy of Sciences in Washington, D.C.
