The Business of Media Distribution Jeffrey C. Ulin, 2019-05-30 In this updated edition of the industry staple, veteran media executive Jeff Ulin relates business theory and practice across key global market segments—film, television, and online/digital—providing you with an insider's perspective that can't be found anywhere else. Learn how an idea moves from concept to profit and how distribution dominates the bottom line: Hollywood stars may make the headlines, but marketing and distribution are the behind-the-scenes drivers converting content into cash. The third edition: Includes perspectives from key industry executives at studios, networks, agencies and online leaders, including Fox, Paramount, Lucasfilm, Endeavor, Tencent, MPAA, YouTube, Amazon, and many more;

Explores the explosive growth of the Chinese market, including box office trends, participation in financing Hollywood feature films, and the surge in online usage; Illustrates how online streaming leaders like Netflix, Amazon, Apple, YouTube, Hulu and Facebook are changing the way TV content is distributed and consumed, and in cases how these services are moving into theatrical markets; Analyzes online influences and disruption throughout the distribution chain, and explains the risks and impact stemming from changing access points (e.g., stand-alone apps), delivery methods (over-the-top) and consumption patterns (e.g., binge watching); Breaks down historical film windows, the economic drivers behind them, and how online and digital delivery applications are changing the landscape. Ulin provides the virtual apprenticeship you need to demystify and manage the complicated media markets, understand how digital distribution has impacted the ecosystem, and glimpse into the future of how film and television content will be financed, distributed and watched. An online eResource contains further discussion on topics presented in the book.

A Media Epigraphy of Video Compression Marek Jancovic, 2023-07-29 This book explores the historical interrelationships between mathematics, medicine and media, and offers a unique perspective on how video compression has shaped our relationship with moving images and the world. It situates compression in a network of technological, visual and epistemic practices spanning from late 18th-century computational methods to the standardization of electrical infrastructure and the development of neurology throughout the 1900s. Bringing into conversation media archaeology, science and technology studies, disability studies and queer theory, each chapter offers an in-depth look at a different trace of compression, such as interlacing, macroblocking or flicker. This is a story of forgotten technologies, unusual media practices, strange images on the margins of visual culture and inventive ways of looking at the world. Readers will find illuminating discussions of the formation of

complex scientific and medical systems, and of the violent and pleasurable interactions between our bodies and media infrastructure.

*Music Video After MTV* Mathias Bonde Korsgaard, 2017-05-18 Since the 1980s, music videos have been everywhere, and today almost all of the most-viewed clips on YouTube are music videos. However, in academia, music videos do not currently share this popularity. *Music Video After MTV* gives music video its due academic credit by exploring the changing landscapes surrounding post-millennial music video. Across seven chapters, the book addresses core issues relating to the study of music videos, including the history, analysis, and audiovisual aesthetics of music videos. Moreover, the book is the first of its kind to truly address the recent changes following the digitization of music video, including its changing cycles of production, distribution and reception, the influence of music videos on other media, and the rise of new types of online music video. Approaching music videos from a composite theoretical framework, *Music Video After MTV* brings music video research up to speed in several areas: it offers the first account of the research history of music videos, the first truly audiovisual approach to music video studies and it presents numerous inspiring case studies, ranging

from classics by Michel Gondry and Chris Cunningham to recent experimental and interactive videos that interrogate the very limits of music video.

*YouTube* Jean Burgess, Joshua Green, 2013-09-04 YouTube is one of the most well-known and widely discussed sites of participatory media in the contemporary online environment, and it is the first genuinely mass-popular platform for user-created video. In this timely and comprehensive introduction to how YouTube is being used and why it matters, Burgess and Green discuss the ways that it relates to wider transformations in culture, society and the economy. The book critically examines the public debates surrounding the site, demonstrating how it is central to struggles for authority and control in the new media environment. Drawing on a range of theoretical sources and empirical research, the authors discuss how YouTube is being used by the media industries, by audiences and amateur producers, and by particular communities of interest, and the ways in which these uses challenge existing ideas about cultural 'production' and 'consumption'. Rich with both concrete examples and featuring specially commissioned chapters by Henry Jenkins and John Hartley, the book is essential reading for anyone interested in the contemporary and future implications of online media. It will be particularly valuable for students and scholars in media, communication and cultural studies.

**Media Design and Technology for Live Entertainment** Davin Gaddy, 2017-11-27 Media Design and Technology for Live Entertainment is a guide to understanding the concepts and equipment used in projection and video design for live performances. After an introduction in the principles of design elements as well as information on content, this book focuses on how content is used and transmitted by describing the essential components of systems, providing definitions used in communicating video concepts, and including basic system troubleshooting tips and tricks. A brief

history of projected imagery is included, as well as information on analog systems, as outdated technology continues to be used either by choice of the designer or by necessity due to budget. By providing the information to understand the tools and how to use them, the reader should be able to create their own systems to meet his or her design ideas.

Teaching Youth Media Steven Goodman, 2003-01-23 This book explores the power of using media education to help urban teenagers develop their critical thinking and literacy skills. Drawing on his twenty years of experience working with inner-city youth at the acclaimed Educational Video Center (EVC) in New York City, Steven Goodman looks closely at both the problems and possibilities of this model of media education. Responding to our national concern about adolescents, literacy, media, and violence, *Teaching Youth Media*: Describes the changes schools and after-school programs need to make in order to create a media education that empowers students to change their world; Explores the intersection of literacy and culture as youth learn to analyze information from a variety of sources, including television, newspapers, books, films, school, church, and lives outside of school; Features case studies of students and teachers engaged in making video documentaries at EVC and in an alternative high school; Illuminates the practical day-to-day challenges faced by professional developers and teachers working to change the way education is practiced in their classes and schools.

**Video Theory** Andreas Treske, 2015-04-30 Video is a part of everyday life, comparable to driving a car or taking a shower. It is nearly omnipresent, available on demand and attached to nearby anything, anywhere. Online Video became something vital and independent. With all the video created by the cameras around us, constantly uploading, sharing, linking, and relating, a blue ocean is covering our planet, an ocean of video. What might look as bluish noise and dust from the far

outside, might embed beautiful and fascinating living scapes of moving images, objects constantly changing, re-arranging, assembling, evolving, collapsing, but never disappearing, a real cinema. Andreas Treske describes and theorizes these objects formerly named video, their forms, behaviours and properties.

*Video Cultures* D. Buckingham, R. Willett, 2009-10-09 Over the past decade, there has been a huge increase in ordinary people's access to video production technology. These essays explore the theoretical significance of this trend and its impact on society, as well as examining a wide range of case studies, from camcorders and camera phones to YouTube and citizen journalism.

**The Media Design Book** Philip Mazzurco, 1984

**Writing on the Wall** Tom Standage, 2013-10-10 Today we are endlessly connected: constantly tweeting, texting or e-mailing. This may seem unprecedented, yet it is not. Throughout history, information has been spread through social networks, with far-reaching social and political effects. *Writing on the Wall* reveals how an elaborate network of letter exchanges forewarned of power shifts in Cicero's Rome, while the torrent of tracts circulating in sixteenth-century Germany triggered the Reformation. Standage traces the story of the rise, fall and rebirth of social media over the past 2,000 years offering an illuminating perspective on the history of media, and revealing that social networks do not merely connect us today – they also link us to the past.

Screens Producing & Media Operations Laura Frank, 2019-10-22 Media servers have established themselves as the dominant video playback tool for live events; however, the practice of delivering content to these systems and the structure of the media operations team is still evolving. This book outlines a workflow for video content delivery and describes team communication that can be applied to any entertainment production including: television specials, concert touring, corporate events,

theater, as well as special events, film, large audience marketing events, and multi-screen permanent installations. This workflow is hardware and software independent, designed to evolve with future technologies as they become established in the field of multi-screen production, and has been proven professionally by the author and her peers over a decade of productions. The methodology presented will provide insights beneficial to students and current practitioners of media server technology, screens producers, and video content developers. Using real world examples of internationally recognized productions, a foundation is laid for best practices in Media Operations. Additional content, including full-color versions of the images inside the book, is available online.
