A Media Epigraphy of Video Compression Marek Jancovic, 2023-07-29 This book explores the historical interrelationships between mathematics, medicine and media, and offers a unique perspective on how video compression has shaped our relationship with moving images and the world. It situates compression in a network of technological, visual and epistemic practices spanning from late 18th-century computational methods to the standardization of electrical infrastructure and the development of neurology throughout the 1900s. Bringing into conversation media archaeology, science and technology studies, disability studies and queer theory, each chapter offers an in-depth look at a different trace of compression, such as interlacing, macroblocking or flicker. This is a story of forgotten technologies, unusual media practices, strange images on the margins of visual culture and inventive ways of looking at the world. Readers will find illuminating discussions of the formation of complex scientific and medical systems, and of the violent and pleasurable interactions between our bodies and media infrastructure.

Video Theory Andreas Treske, 2015-04-30 Video is a part of everyday life, comparable to driving a car or taking a shower. It is nearly omnipresent, available on demand and attached to nearly anything, anywhere. Online Video became something vital and independent. With all the video created by the cameras around us, constantly uploading, sharing, linking, and relating, a blue ocean is covering our planet, an ocean of video. What might look as bluish noise and dust from the far outside, might embed beautiful and fascinating living scapes of moving images, objects constantly changing, re-arranging, assembling, evolving, collapsing, but never disappearing, a real cinema. Andreas Treske describes and theorizes these objects formerly named video, their forms, behaviours and properties.

Screens Producing & Media Operations Laura Frank, 2019-10-22 Media servers have established themselves as the dominant video playback tool for live events; however, the practice of delivering content to these systems and the structure of the media operations team is still evolving. This book outlines a workflow for video content delivery and describes team communication that can be applied to any entertainment production including: television specials, concert touring, corporate events, theater, as well as special events, film, large audience marketing events, and multi-screen permanent installations. This workflow is hardware and software independent, designed to evolve with future technologies as they become established in the field of multi-screen production, and has been proven professionally by the author and her peers over a decade of productions. The methodology presented will provide insights beneficial to students and current practitioners of media server technology, screens producers, and video content developers. Using real world examples of internationally recognized productions, a foundation is laid for best practices in Media Operations. Additional content, including full-color versions of the images inside the book, is available online.

A brief history of projected imagery is included, as well as information on analog systems, as outdated technology continues to be used either by choice of the designer or by necessity due to budget. By providing the information to understand the tools and how to use them, the reader should be able to create their own systems to meet his or her design ideas.

Video Recording Technology Aaron Foisi Nnungwun, 2012-11-12 Video recording has recently become an important phenomenon. This text documents the history of magnetic recording, stressing its importance in consumer as well as commercial applications from the advent of magnetism through the invention of such new technologies as Digital Audio Tape (DAT), High Definition Television (HDTV), and a multitude of sophisticated Digital Video Cassette Recorders.

Music Video After MTV Mathias Bonde Korsgaard, 2017-05-18 Since the 1980s, music videos have been everywhere, and today almost all of the most-viewed clips on YouTube are music videos. However, in academia, music videos do not currently share this popularity. Music Video After MTV gives music video its due academic credit by exploring the changing landscapes surrounding post-millennial music video. Across seven chapters, the book addresses core issues relating to the study of music videos, including the history, analysis, and audiovisual aesthetics of music videos. Moreover, the book is the first of its kind to truly address the recent changes following the digitization of music video, including its changing cycles of production, distribution and reception, the influence of music videos on other media, and the rise of new types of online music video. Approaching music videos from a composite theoretical framework, Music Video After MTV brings music video research up to speed in several areas: it offers the first account of the research history of music videos, the first truly audiovisual approach to music video studies and it presents numerous inspiring case studies, ranging from classics by Michel Gondry and Chris Cunningham to recent experimental and interactive videos that interrogate the very limits of music video.

Videography Sean Cubitt, 1993-11-09 Videography is an attempt to discover the conditions under which it is possible to speak, write and teach about the electronic media. It provides a materialist account of video and computer media as they are practised and used today. A theoretical section tests the claims of various theses in art history, media and cultural theory to account for the variety of video practice in the contemporary scene. The remainder of the book is devoted to close analysis of work, from amateur video to computer graphics.

Music/Video Gina Arnold, Daniel Cookney, Kirsty Fairclough, Michael N. Goddard, 2017-08-10 This book is a lively, comprehensive and timely reader on the music video, capitalising on cross-disciplinary research expertise, which represents a substantial academic engagement with the music video, a mediated form and practice that still remains relatively under-explored in a 21st century context. The music video has remained suspended between two distinct poles. On the one hand, the music video as the visual sheen of late capitalism, at the intersection of celebrity studies and postmodernism. On the other hand, the music video as art, looking to a prehistory of avant-garde filmmaking while perpetually pushing forward the digital frontier with a taste for anarchy, controversy, and the integration of special effects into a form designed to be disseminated across digital platforms. In this way, the music video virally re-engenders debates about high art and low culture. This collection presents a comprehensive account of the music video from a contemporary 21st century perspective. This entails revisiting key moments in

the canonical history of the music video, exploring its articulations of sexuality and gender, examining its functioning as a form of artistic expression between music, film and video art, and following the music video's dissemination into the digital domain, considering how digital media and social media have come to re-invent the forms and functions of the music video, well beyond the limits of "music television".
