Wild Weather Days Katie Marsico,2006-09 Boom!

Did you hear that rumble of thunder? Thunderstorms occur when ice and water rub together inside a cloud. Read this book to learn more about wild weather!

Television Weathercasting Robert Henson,1990

Will it rain tomorrow? That perennial question has made weather the most popular segment of local television news for years. Yet weathercasters do far more than simply convey the latest outlook. Depending on the circumstances, they may inject humor into the forecast (having a Lhasa apso pant and wag its tail during the forecast, for instance), warn of a life-threatening tornado or hurricane, or instruct viewers on the science behind weather. This book, the first critically to examine weathercasters and their craft, is based on years of research and covers both the lighthearted and serious aspects of television weather. Chapters include pioneer weathercasters of the 1940s and 1950s, technical advances, interaction with the National Weather Service, severe weather coverage, celebrities who began with television weather, and the status of women and minorities in weathercasting.

Groundhog Weather School Joan Holub,2013-12-05

When Groundhog realizes he needs helpers all over the country to accurately forecast the weather, he establishes a school to teach young groundhogs how to properly determine when spring will arrive.

Snowy Weather Days Katie Marsico,2013 Provides a

simple introduction to the weather that focuses on snow.

What Does Rain Smell Like? Simon King, Clare Nasir, 2019-10-17 'Clear, succinct and engaging answers to every question you could ask about the weather.' Gavin Pretor-Pinney, author of *The Cloudspotter's Guide* Why doesn't rain fall all at once? Can technology change the track of a hurricane? What's the weather like on other planets? Meteorologists Simon King and Clare Nasir reveal the captivating ways the weather works, from exploring incredible weather phenomenon (how are rainbows formed?), expertly breaking down our knowledge of the elements (could we harness the power of lightning?) to explaining the significance of weather in history (has the weather ever started a war?) and discussing the future of weather (could climate modification save the planet?). In *What Does Rain Smell Like?* Simon and Clare uncover the thrilling science behind a subject that affects us all. They unearth and analyse all aspects of the weather and how it changes our lives through answering our most curious questions about the world around us.

A Little Closer to Home Ginger Zee, 2022-01-11 In Ginger Zee's follow-up to the bestselling *Natural Disaster*, the ABC chief meteorologist takes readers on a much deeper journey of self discovery. When Ginger Zee opened her life to readers in *Natural Disaster*, the response was enormous. She put a very relatable if surprising face on depression and has helped lessen the stigma surrounding mental health issues. But Ginger tells us, *Natural Disaster* was Ginger Lite

and only scratched the surface. In this moving follow-up, Ginger shares her truest self. She spent most of her life shielding her vulnerabilities from the world all while being a professional people pleaser. Her stormy childhood, her ongoing struggles with crippling depression, her suicide attempts, and many other life experiences will resonate with readers who are likely to see themselves along the way. In spite of its serious subject matter, Ginger's positive, life-affirming outlook comes through loud and clear. Written with great heart and quite a bit of humor, Ginger normalizes issues and challenges millions of people face every day. A Little Closer to Home will broaden the conversation around mental health at a time we need it more than ever.

Looking Up Matthew Cappucci, 2022-08-02 An energetic and electrifying narrative about all things weather—by one of today's rising meteorological stars. Get in—we're going storm-chasing! Imagine a very cool weather nerd has just pulled up to you and yelled this out the window of his custom-built armored storm-chasing truck. The wind is whipping around, he's munching on Wawa, it's all very chaotic—yet as you look into his grinning face, you feel the greatest surge of adrenaline you have ever felt in your life. Hallelujah: your cavalry is here! Welcome to the brilliance of Looking Up, the lively new book from rising meteorology star Matthew Cappucci. He's a meteorologist for The Washington Post, and you might think of him as Doogie Howser meets Bill Paxton from Twister, with a dash of Leonardo DiCaprio from Catch Me If You Can. A self-

proclaimed weather nerd, at the age of fourteen he talked his way into delivering a presentation on waterspouts at the American Meteorological Society's annual broadcast conference by fudging his age on the application and created his own major on weather science while an undergrad at Harvard. Combining reportage and accessible science with personal storytelling and infectious enthusiasm, *Looking Up* is a riveting ride through the state of our weather and a touching story about parents and mentors helping a budding scientist achieve his improbable dreams. Throughout, readers get a tutorial on the basics of weather science and the impact of the climate. As our country's leaders sound the alarm on climate change, few people have as close a view to how serious the situation actually is than those whose job is to follow the weather, which is the daily dose of climate we interact with and experience every day. The weather affects every aspect of our lives (even our art) as well as our future. The way we think about it requires a whole-life overhaul. Rain or shine, tropical storm or twister, Cappucci is here to help us begin the process. So get in his storm-chasing truck already, will ya?

Ari, who runs on sunshine and optimism, is at her wits' end. The only person who seems to understand how she feels is sweet but reserved sports reporter Russell Barringer. In the aftermath of a disastrous holiday party, Ari and Russell decide to team up to solve their bosses' relationship issues. Between secret gifts and double dates, they start nudging their bosses back together. But their well-meaning meddling backfires when the real chemistry builds between Ari and Russell. Working closely with Russell means allowing him to get to know parts of herself that Ari keeps hidden from everyone. Will he be able to embrace her dark clouds as well as her clear skies?

Rainy Weather Days Pam Rosenberg, 2006-09 Simple text and colorful pictures describe what rain is, when it can fall, and the good things rain can do.

Storm Watchers John D. Cox, 2002-11-04 A lively, inspiring account of the pioneers who sought to accurately predict the weather Benjamin Franklin . . . James P. Espy . . . Cleveland Abbe . . . Carl-Gustaf Rossby . . . Jule G. Charney . . . just a few of the remarkable individuals who struggled against formidable odds to understand the atmosphere and predict the weather. Where they

saw patterns and processes, others saw randomness and tumult-and yet they strove to make their voices heard, often saving lives in the process. Storm Watchers takes you on a fascinating journey through time that captures the evolution of weather forecasting. From the age when meteorology was considered one step removed from sorcery to the modern-day wizardry of supercomputers, John Cox introduces you to the pioneering scientists whose work fulfilled an ancient dream and made it possible to foretell the future. He tells the little-known stories of these weathermen, such as Ptolemy's weather predictions based on astrology, John Finley's breakthrough research in identifying tornadoes, and Tor Bergeron's new techniques of weather forecasting, which contributed to its final worldwide acceptance. Filled with extraordinary tales of bravery and sacrifice, Storm Watchers will make you think twice the next time you turn on the local news to catch the weather report.

Fun Weather Days Pam Rosenberg, 2006-09 Discusses all kinds of weather from cloudy winter days to springtime rain showers and rainbows.

Mighty Storms of New England Eric P. Fisher, 2021-10-21 The New England landscape has long been battered by some of the most intense weather in the United States. The region breeds one of the highest concentrations of meteorologists in the country for a reason. One can experience just about anything except a dust storm. Snowstorms, floods, droughts, heat waves, arctic blasts, hurricanes, tornadoes, wildfires, and other atmospheric oddities come and go with the changing seasons. Rare is the boring year of

weather. Knowing the past is a critical part of understanding and forecasting the weather. Meteorologist Eric Fisher takes an in depth look at some of the most intense weather events in New England's history. The stories in this book not only describe the loss and the damage caused by the storms, but also how nearly all of them in left such an impression that they immediately led to progress where new warnings systems were implemented, government agencies formed, and technology accelerated in response to the devastation these events left behind.

News and Weather Richard Tipping, Nigel Roberts, 1973

World News, Local Weather Charles Atkinson, 2013-12-13

"Fear God and Walk Humbly" James Mallory, 2013-09-06 A detailed journal of local, national, and foreign news, agricultural activities, the weather, and family events, from an uncommon Southerner Most inhabitants of the Old South, especially the plain folk, devoted more time to leisurely activities—drinking, gambling, hunting, fishing, and just loafing—than did James Mallory, a workaholic agriculturalist, who experimented with new plants, orchards, and manures, as well as the latest farming equipment and techniques. A Whig and a Unionist, a temperance man and a peace lover, ambitious yet caring, business-minded and progressive, he supported railroad construction as well as formal education, even for girls. His cotton production—four bales per field hand in 1850, nearly twice the average for the best cotton lands

in southern Alabama and Georgia--tells more about Mallory's steady work habits than about his class status. But his most obvious eccentricity--what gave him reason to be remembered--was that nearly every day from 1843 until his death in 1877, Mallory kept a detailed journal of local, national, and often foreign news, agricultural activities, the weather, and especially events involving his family, relatives, slaves, and neighbors in Talladega County, Alabama. Mallory's journal spans three major periods of the South's history--the boom years before the Civil War, the rise and collapse of the Confederacy, and the period of Reconstruction after the Civil War. He owned slaves and raised cotton, but Mallory was never more than a hardworking farmer, who described agriculture in poetical language as "the greatest [interest] of all."
