Fresnel Lens Blind Area Viewers for Improved Mine Equipment Safety and Productivity Guy A. Johnson,1983

Remote Viewers Jim Schnabel,2011-04-20 Remote Viewers is a tale of the Pentagon's attempts to develop the perfect tool for espionage: psychic spies. These psychic spies, or remote viewers, were able to infiltrate any target, elude any form of security, and never risk scratch. For twenty years, the government selected civilian and military personnel for psychic ability, trained them, and put them to work, full-time, at taxpayers' expense, against real intelligence targets. The results were so astonishing that the program soon involved more than a dozen separate agencies, including the CIA, the Defense Intelligence Agency, the National Security Council, the FBI, the National Security Agency, the Secret Service, the Navy, the Army, the Air Force, the Joint Chiefs of Staff, the Drug Enforcement Agency, the US Customs Service, the US Special Forces Command, and at least one Pentagon drug-interaction task force. Most of this material is still officially classified. After three years of research, with access to numerous sources in the intelligence community--including the remote viewers themselves--science writer Jim Schnabel reveals the secret details of the strangest chapter in the history of espionage.

Patrons and Viewers in Late Antiquity Stine Birk,Birte Poulsen,2012-12-12 Antiquity was a multi-cultural and multi-religious world. Meetings and interactions between cultures in East and West, and the consequent widespread exchange of ideas had an enormous impact on cultural practices and the creation of identities. These cultural diversities are reflected by both the archaeological material and the written sources. Patrons of luxurious buildings, elaborate grave monuments, and churches used architecture and images to demonstrate political, social and religious power. These buildings and their embellishment with sculpture, mosaics and paintings were strong factors in communicating identity and attitudes both in the public and

private spheres. The continuous production of mythological sculpture and mosaics coexisted, sometimes peacefully other times with violent consequences, with an increasing influence from new philosophical mind sets originating in the East, such as Christianity. In this period of rapid social and religious change new patrons appeared, such as bishops, who were responsible for the construction of churches commemorating the Christian triumph. The seminar focuses on the way patrons, pagan as well as Christian, conveyed messages through material culture and the responses of the viewers.

Television and Its Viewers James Shanahan, Michael Morgan, 1999-09-09 Television and its Viewers reviews 'cultivation' research, which investigates the relationship between exposure to television and beliefs about the world. James Shanahan and Michael Morgan, both distinguished researchers in this field, scrutinize cultivation through detailed theoretical and historical explication, critical assessments of methodology, and a comprehensive 'meta-analysis' of twenty years of empirical results. They present a sweeping historical view of television as a technology and as an institution. Shanahan and Morgan's study looks forward as well as back, to the development of cultivation research in a new media environment. They argue that cultivation theory offers a unique and valuable perspective on the role of television in twentieth-century social life. Television and its Viewers, the first book-length study of its type, will be of interest to students and scholars in communication, sociology, political science and psychology and contains an introduction by the seminal figure in this field, George Gerbner.

Viewers Like You Laurie Oullette, 2012-07-24 How public is public television if only a small percentage of the American people tune in on a regular basis? When public television addresses viewers like you, just who are you? Despite the current of frustration with commercial television that runs through American life, most TV viewers bypass the redemptive oasis of the

wasteland represented by PBS and turn to the sitcoms, soap operas, music videos, game shows, weekly dramas, and popular news programs produced by the culture industries. *Viewers Like You?* traces the history of public broadcasting in the United States, questions its priorities, and argues that public TV's tendency to reject popular culture has undermined its capacity to serve the people it claims to represent. Drawing from archival research and cultural theory, the book shows that public television's perception of what the public needs is constrained by unquestioned cultural assumptions rooted in the politics of class, gender, and race.

Moving Viewers Carl Plantinga, 2009-04-08 Everyone knows the thrill of being transported by a film, but what is it that makes movie watching such a compelling emotional experience? In *Moving Viewers*, Carl Plantinga explores this question and the implications of its answer for aesthetics, the psychology of spectatorship, and the place of movies in culture. Through an in-depth discussion of mainstream Hollywood films, Plantinga investigates what he terms the paradox of negative emotion and the function of mainstream narratives as ritualistic fantasies. He describes the sensual nature of the movies and shows how film emotions are often elicited for rhetorical purposes. He uses cognitive science and philosophical aesthetics to demonstrate why cinema may deliver a similar emotional charge for diverse audiences.

The Story of Viewers For Quality Television Dorothy Collins Swanson, 2000-10-01 Viewers for Quality Television (VQT) emerged from the successful grassroots campaign of founder Dorothy Swanson to save the series *Cagney & Lacey*. Eight months after the drama returned to the air-with the help of the show's producer Barney Rosenzweig-Swanson's group gained significant media attention and popular support. In 1984 she founded VQT and galvanized over 1500 advocates for innovative and enriching television programming. For the past 12 years, VQT has been the recognized and credible forum for discerning viewers. Prior to the

formation of this group, there was no system in place where viewers could voice their opinions collectively to those responsible for the fate of programs. The organization, whose endorsements continue to be an important part of many programs' bids for survival, has succeeded in convincing network executives to reconsider shows such as *Designing Women*, *Homefront*, *China Beach*, *I'll Fly Away*, and most recently, *The Practice*, which were scheduled to be canceled. Documenting the efforts of one grassroots organization that made a difference, Swanson's story extends beyond the realm of television to demonstrate the rewards of making the voice of public opinion heard.

Creating the Viewer Justin Wyatt, 2024-04-23 A study of the largely hidden world of primary media market research and the different methods used to understand how the viewer is pictured in the industry. The first book on the intersection between market research and media, *Creating the Viewer* takes a critical look at media companies' studies of television viewers, the assumptions behind these studies, and the images of the viewer that are constructed through them. Justin Wyatt examines various types of market research, including talent testing, pilot testing, series maintenance, brand studies, and new show "ideation," providing examples from a range of programming including news, sitcoms, reality shows, and dramas. He looks at brand studies for networks such as E!, and examines how the brands of individuals such as showrunner Ryan Murphy can be tested. Both an analytical and practical work, the book includes sample questionnaires and paths for study moderators and research analysts to follow. Drawn from over fifteen years of experience in research departments at various media companies, *Creating the Viewer* looks toward the future of media viewership, discussing how the concept of the viewer has changed in the age of streaming, how services such as Netflix view market research, and how viewers themselves can shift the industry through their media choices, behaviors, and activities.

IPL Viewership Dr Shalini Sharma,2022-02-07 The success of the Indian Premier League in a country where cricket and Bollywood cover a major pie of the entertainment landscape was a forgone conclusion. But what keeps the viewers hooked up to this festival of stars, cricket, sportsmanship, cheerleaders, sponsor and brands is a million-dollar question. This book is an attempt to find answers to the same. Understanding viewers motivation and enthusiasm to keep the league relevant and successful, factors that play a major role in increasing the viewership and help sustain the interest make it an interesting read.

Why Viewers Watch Jib Fowles,1992-01-14 Television corrupts our children, induces us to spend needlessly, and stimulates hostility and violence. Or does it? Jib Fowles sees television as a grandly therapeutic force, that television is indeed good for you. He examines why nearly every American regularly watches television and why viewing is beneficial. Updated and jargon-free, *Why Viewers Watch* describes the overall effect of programming on the population. What do viewers get from television? What does it do for them? Why do academics negatively judge television? Using recent research reports, overlooked past studies, and fresh

survey data to substantiate this positive role, Fowles first reviews the history of television and programming. After discussing what people expect from television, he explores how different types of programs satisfy different needs. Fowles also debunks many of the myths propagated by media scholars and television prigs. With an easy-to-read style that is both entertaining and informative, *Why Viewers Watch* suits both the scholar and the student, the specialist and nonspecialist alike. As such, it is the perfect companion volume for courses in communication, journalism, sociology, and psychology. The author does present another side to the complex effects debate--a side of which we should all be aware.--Et cetera from the First Edition: An interesting--and challenging--book about television. So good it is surprising it has not received more attention. ... There aren't many really good books about television, and [this] is one of the best.--Peter Farrell, *The Sunday Oregonian* I would recommend this book to interested television viewers, media scholars, and professionals. Fowles' arguments are thought-provoking and sometimes compelling. The book is very readable and easily accessible to lower-division students. For those of us who spent our childhoods glued to the screen and believe we still turned out all right, this book will help alleviate our nagging guilt when we watch television. The book should help scholars reexamine our views on the impact of television's content and our suggested changes. Media professionals should find the book a testament to the positive aspects of their medium. --The Southern Speech Communication Journal.

The Viewer as Poet: The Renaissance Response to Art

, 1994 In *The Viewer as Poet*, Norman Land provides the first comprehensive survey of ekphrasis in literature and art criticism from antiquity through the Renaissance. Land demonstrates, more fully than anyone has so far, that Renaissance art criticism assimilated the poetic tradition of ekphrasis while maintaining its function of analyzing works of art. Broadly speaking, the book shows that purely literary descriptions of art in poetry and prose contain a response like that found in art-critical ekphrasis. This is true in both antiquity and the Renaissance. The response to art in the elder Philostratus's *Imagines*, for example, is like that found in the descriptions of Apuleius and Lucian. Later Dante, Boccaccio, and Poliziano, among others, respond to imaginary works of art in their poetry in much the same way that Lorenzo Ghiberti, Aretino, and Vasari respond to real works in their writings. Land offers for the first time a synthetic description of the Renaissance response to, or experience of, art as embodied in literature, including art criticism. This book will form the basis for a deeper understanding

of Renaissance art than we have now, for it provides not only a tool for viewing works of art as they were originally seen and experienced--that is, from a historical perspective--but also an outline of the tradition out of which modern writings about art grew.

Constructing the Child Viewer Carmen Luke, 1990-12-11
Beginning from a poststructuralist position, *Constructing the Child Viewer* examines three decades of U.S. research on television and children. The book concludes that historical concepts of the child television viewer are products of discourse and cannot be taken to reflect objective, scientific truths about the child viewer. Widely disseminated constructs of the passive viewer, the active viewer, the interactive viewer, and the media literate viewer are seen as problematic. Nearly all academic studies published from 1948 to 1979 on the subject are included in this volume. Each receives close textual analysis, making this a useful bibliographic resource and reference book. Methodologically and theoretically, this is the first text of its kind to read the history of research on television and children as an archaeology of knowledge. *Constructing the Child Viewer* is an extensive bibliographical resource, a preliminary introduction to Foucault's discourse theory, and an experimental application of that theory to one major strand of the discourse of mass communications research. Students of educational psychology, sociology, and communications/media will find this work invaluable.
