**Management 3.0** Jurgen Appelo, 2011 In many organizations, management is the biggest obstacle to successful Agile development. Unfortunately, reliable guidance on Agile management has been scarce indeed. Now, leading Agile manager Jurgen Appelo fills that gap, introducing a realistic approach to leading, managing, and growing your Agile team or organization. Writing for current managers and developers moving into management, Appelo shares insights that are grounded in modern complex systems theory, reflecting the intense complexity of modern software development. Appelo's Management 3.0 model recognizes that today's organizations are living, networked systems; and that management is primarily about people and relationships. Management 3.0 doesn't offer mere checklists or prescriptions to follow slavishly; rather, it deepens your understanding of how organizations and Agile teams work and gives you tools to solve your own problems. Drawing on his extensive experience as an Agile manager, the author identifies the most important practices of Agile management and helps you improve each of them. Coverage includes • Getting beyond "Management 1.0" control and "Management 2.0" fads • Understanding how complexity affects your organization • Keeping your people active, creative, innovative, and motivated • Giving teams the care and authority they need to grow on their own • Defining boundaries so teams can succeed in alignment with business goals • Sowing the seeds for a culture of software craftsmanship • Crafting an organizational network that promotes success • Implementing continuous improvement that actually works Thoroughly pragmatic--and never trendy--Jurgen Appelo's Management 3.0 helps you bring greater agility to any software organization, team, or project.

*Pragmatics of Social Media* Christian Hoffmann, Wolfram Bublitz, 2017-09-11 This handbook provides a comprehensive overview of the pragmatics of social media, i.e. of digitally mediated and Internet-based platforms which are interactively used to share and edit self- and other-generated textual and audio-visual messages. Its five parts offer state-of-the-art reviews and critical evaluations in the light of on-going developments: Part I The Nature

of Social Media sets up the conceptual groundwork as it explores key concept such as social media, participation, privacy/publicness. Part II Social Media Platforms focuses on the pragmatics of single platforms such as YouTube, Facebook. Part III Social Media and Discourse covers the micro-and macro-level organization of social media discourse, while Part IV Social Media and Identity reveals the multifarious ways in which users collectively (re-)construct aspects of their identities. Part V Social Media and Functions/Speech Acts surveys pragmatic studies on speech act functions such as disagreeing, complimenting, requesting. Each contribution provides a state-of-the-art review together with a critical evaluation of the existing research.

**Mobile Cultures** Chris Berry, Fran Martin, Audrey Yue, 2003-04-18 Mobile Cultures provides much-needed, empirically grounded studies of the connections between new media technologies, the globalization of sexual cultures, and the rise of queer Asia. The availability and use of new media—fax machines, mobile phones, the Internet, electronic message boards, pagers, and global television—have grown exponentially in Asia over the past decade. This explosion of information technology has sparked a revolution, transforming lives and lifestyles, enabling the creation of communities and the expression of sexual identities in a region notorious for the regulation of both information and sexual conduct. Whether looking at the hanging of toy cartoon characters like “Hello Kitty” from mobile phones to signify queer identity in Japan or at the development of queer identities in Indonesia or Singapore, the essays collected here emphasize the enormous variance in the appeal and uses of new media from one locale to another. Scholars, artists, and activists from a range of countries, the contributors chronicle the different ways new media galvanize Asian queer communities in Taiwan, South Korea, Japan, Indonesia, Thailand, Malaysia, India, and around the world. They consider phenomena such as the uses of the Internet among gay, lesbian, or queer individuals in Taiwan and South Korea; the international popularization of Japanese queer pop culture products such as Yaoi manga; and a Thai website’s reading of a scientific tract on gay genetics in light of Buddhist beliefs. Essays also explore the politically subversive possibilities opened up by the proliferation of media technologies, examining, for instance, the use of Cyberjaya—Malaysia’s government-backed online portal—to form online communities in the face of strict antigay laws. Contributors. Chris Berry, Tom Boellstorff, Larissa Hjorth, Katrien Jacobs, Olivia Khoo, Fran Martin, Mark McLelland, David Mullaly, Baden Offord, Sandip Roy, Veruska Sabucco, Audrey Yue

**The Language of Gaming** Astrid Ensslin, 2017-09-16 This innovative text examines videogames and gaming from the point of view of discourse analysis. In particular, it studies two major aspects of videogame-related communication: the ways in which videogames and their makers convey meanings to their audiences, and the ways in which gamers, industry professionals, journalists and other stakeholders talk about games. In doing so, the book offers systematic analyses of games as artefacts and activities, and the discourses surrounding them. Focal areas explored in this book include: - Aspects of videogame textuality and how games relate to other texts - the formation of lexical terms and use of metaphor in the language of gaming - Gamer slang and 'buddylects' - The construction of game worlds and their rules, of gamer identities and communities - Dominant discourse patterns among gamers and how they relate to the nature of gaming - The multimodal language of games and gaming - The ways in which ideologies of race, gender, media effects and language are constructed Informed by the very latest scholarship and illustrated with topical examples throughout, The Language of Gaming is ideal for students of applied linguistics, videogame studies and media studies who are seeking a wide-ranging introduction to the field.

**Dispensational Truth, Or God's Plan and Purpose in the Ages** Clarence Larkin, 2010-07-01 The Reverend Clarence Larkin was one of the most widely influential pop theologians of the early twentieth century: his works are the

source of many of the prophecies and truths end-times Christians hold to even today. This stupendous 1918 book- perhaps his greatest work- is the result of more than 30 years' worth of, the author informs us, careful and patient study of the Prophetic Scriptures. Fully illustrated by charts describing God's plan for humanity, Dispensational Truth covers: Pre-Millennialism the Second Coming of Christ the present evil world the Satanic trinity the world's seven great crises prophetic chronology the threefold nature of man the Book of Revelation five fingers pointing to Christ the False Prophet and much more. American Baptist pastor and author CLARENCE LARKIN (1850-1924) was born in Pennsylvania, and later set up his ministry there. He wrote extensively and popularly on a wide range of Biblical and theological matters.

**Fortran 90/95 for Scientists and Engineers** Stephen J. Chapman, 2004 Chapman's Fortran for Scientists and Engineers is intended for both first year engineering students and practicing engineers. It simultaneously teaches the Fortran 90/95 programming language, structured programming techniques, and good programming practice. Among its strengths are its concise, clear explanations of Fortran syntax and programming procedures, the inclusion of a wealth of examples and exercises to help students grasp difficult concepts, and its explanations about how to understand code written for older versions of Fortran.

*Self-regulated Learning in Technology Enhanced Learning Environments* Roberto Carneiro, Paul Lefrere, Karl Steffens, Jean Underwood, 2011 The book provides an overview of recent studies on SRL in TELEs in Europe--a perspective which is new and has not been articulated hitherto. It addresses conceptual and methodological questions as well as practices in technology enhanced learning. While the focus is on European studies, we are aware that much of the groundwork in the field of SRL has emanated from the United States.

*Achtung-Panzer!* Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Interfaces of the Word Walter J. Ong,2013-02-14 Drawing on a wide range of disciplines—linguistics, phenomenological analysis, cultural anthropology, media studies, and intellectual history—Walter J. Ong offers a reasoned and sophisticated view of human consciousness different in many respects from that of structuralism. The essays in *Interfaces of the Word* are grouped around the dialectically related themes of change or alienation and growth or integration. Among the subjects Ong covers are the origins of speech in mother tongues; the rise and final erosion of nonvernacular learned languages; and the fictionalizing of audiences that is enforced by writing. Other essays treat the idiom of African talking drums, the ways new media interface with the old, and the various connections between specific literary forms and shifts in media that register in the work of Shakespeare and Milton and in movements such as the New Criticism. Ong also discusses the paradoxically nonliterary character of the Bible and the concerted blurring of fiction and actuality that marked much drama and narrative toward the close of the twentieth century.
