Human Pharmaceuticals, Hormones and Fragrances Thomas Ternes, Adriano Joss, 2007-01-30 The observed concentrations of pharmaceuticals and personal care products (PPCPs) in raw wastewater confirm that municipal wastewater represents the main disposal pathway for the PPCPs consumed in households, hospitals and industry. In sewage treatment plant effluents most PPCPs are still present, since many of these polar and persistent compounds are being removed only partially or, in some cases, not at all. Treated wastewater therefore represents an important point source for PPCPs into the environment. After passing a sewage treatment plant the treated wastewater is mostly discharged into rivers and streams or sometimes used to irrigate fields. If drinking water is produced using resources containing a substantial proportion of treated wastewater (e.g. from river water downstream of communities) the water cycle is closed and indirect potable reuse occurs. Human Pharmaceuticals, Hormones and Fragrances provides an overview of the occurrence, analytics, removal and environmental risk of pharmaceuticals and personal care products in wastewater, surface water and drinking water. The book covers all aspects of the fate and removal of PPCPs in the whole water cycle: consumption and occurrence, analytical methods, the legal background, environmental risk assessment, human and animal toxicology, source control options, wastewater and drinking water treatment as well as indirect reuse. The book presents a summary of the results obtained during

the EU project Poseidon, combined with further expert knowledge on the field, and is written at a level appropriate for professionals involved in management of water resource quality. Professionals in the field including decision makers, engineers and scientists, as well as students entering the field, will find this an invaluable source of information. First comprehensive study on the assessment, fate and removal of pharmaceuticals and personal care products in wastewater and drinking water treatment. Emphasises the importance of micropollutants in the water cycle, provides methods for quantifying their fate and technologies for their removal.

Water Resources Management in Romania Abdelazim M. Negm, Gheorghe Romanescu, Martina Zeleňáková, 2019-11-02 This book discusses water resources management in Romania from a hydrological perspective, presenting the latest research developments and state-of-the-art knowledge that can be applied to efficiently solve a variety of problems in integrated water resources management. It focuses on a wide range of water resources issues – from hydrology and water quantity, quality and supply to flood protection, hydrological hazards and ecosystems, and includes case studies from various watersheds in Romania. As such, the book appeals to researchers, practitioners and graduates as well as to anybody interested in water resources management.

Identity Technologies Anna Poletti, Julie Rak, 2014-01-31 Identity Technologies is a substantial contribution to the fields of autobiography

studies, digital studies, and new media studies, exploring the many new modes of self-expression and self-fashioning that have arisen in conjunction with Web 2.0, social networking, and the increasing saturation of wireless communication devices in everyday life. This volume explores the various ways that individuals construct their identities on the Internet and offers historical perspectives on ways that technologies intersect with identity creation. Bringing together scholarship about the construction of the self by new and established authors from the fields of digital media and auto/biography studies, *Identity Technologies* presents new case studies and fresh theoretical questions emphasizing the methodological challenges inherent in scholarly attempts to account for and analyze the rise of identity technologies. The collection also includes an interview with Lauren Berlant on her use of blogs as research and writing tools.

The Deadline Tom DeMarco, 1997 From prolific and influential consultant and author Tom DeMarco comes a project management novel that vividly illustrates the principles--and the outright absurdities--that affect the productivity of a software development team. With his trademark wit set free in the novel format, DeMarco centers the plot around the development of six software products. Mr. Tompkins, a manager downsized from a giant telecommunications company, divides the huge staff of developers at his disposal into eighteen teams--three for each of the software products. The teams are different sizes and use different methods, and they compete against each other and against an

impossible deadline. With these teams--and with the help of numerous fictionalized consultants who come to his aid--Tompkins tests the project management principles he has gathered over a lifetime. Each chapter closes with journal entries that form the core of the eye-opening approaches to management illustrated in this entertaining novel.

The 1940 Vrancea Earthquake. Issues, Insights and Lessons Learnt Radu Vacareanu,Constantin Ionescu,2016-03-02 These proceedings include most of the available information on this major seismic event and its consequences. With

an estimated moment magnitude of 7.7 and a heavy toll in terms of human and economic losses, it ranks as the largest intermediate-depth earthquake in Europe in the twentieth century. Nevertheless, because of the difficult conditions in the 1940s, the lessons learnt after the Vrancea earthquake were not extensively shared with the international scientific community and thus, this book fills a gap in the literature discussing the knowledge acquired after major disasters. Past experience together with current understanding of the 1940 Vrancea earthquake are presented along with the latest information on Romanian seismicity, seismic hazard and risk assessment, and seismic evaluation and rehabilitation of buildings and structures. Moreover, it includes excerpts from Romanian post-disaster reports and textbooks concerning the earthquake.

Medieval Saints and Modern Screens Alicia Spencer-Hall, 2018-01-23 This ground-breaking book brings theoretical perspectives from twenty-first century media, film, and cultural studies to medieval hagiography. *Medieval Saints and Modern Screens* stakes the claim for a provocative new methodological intervention: consideration of hagiography as media. More precisely, hagiography is most productively understood as cinematic media. Medieval mystical episodes are made intelligible to modern audiences through reference to the filmic - the language, form, and lived experience of cinema. Similarly, reference to the realm of the mystical affords a means to express the disconcerting physical and emotional effects of watching cinema.

Moreover, cinematic spectatorship affords, at times, a (more or less) secular experience of visionary transcendence: an 'agape-ic encounter'. The medieval saint's visions of God are but one pole of a spectrum of visual experience which extends into our present multi-media moment. We too conjure godly visions: on our smartphones, on the silver screen, and on our TVs and laptops. This book places contemporary pop-culture media - such as blockbuster movie *The Dark Knight*, Kim Kardashian West's social media feeds, and the outputs of online role-players in *Second Life* - in dialogue with a corpus of thirteenth-century Latin biographies, '*Holy Women of Liège*'. In these texts, holy women see God, and see God often. Their experiences fundamentally orient their life, and offer the women new routes to knowledge, agency, and belonging. For the holy visionaries of Liège, as with us modern 'seers', visions are physically intimate, ideologically overloaded spaces. Through theoretically informed close readings, *Medieval Saints and Modern Screens* reveals the interconnection of decidedly 'old' media - medieval textualities - and artefacts of our 'new media' ecology, which all serve as spaces in which altogether human concerns are brought before the contemporary culture's eyes.

Topical Communication Uncertainties Stefan Vladutescu, Florentin

Smarandache, Daniela Gifu, Alina Tenescu, 2014 Communication is the main way of defusing uncertainties. Unfortunately, communication discipline itself is mined by uncertainties. We can talk about onto-epistemological uncertainties and pragmatic uncertainties of communication, about theoretical and practical uncertainties, and about primary and secondary uncertainties of communication. Uncertainties regarding the object of communication as autonomous discipline, the research methods of communication, the sources, paradigms and models of communication represent theoretical, onto-epistemological uncertainties. Pragmatic uncertainties include uncertainties in communication processes; they have a practical character. Pragmatic uncertainties are those that lead to communication failure and they consist in minor obstacles or insurmountable barriers in concrete communication. (Florentin Smarandache & Stefan Vladutescu) *** The book has 16 chapters written by the following authors and co-authors from USA, England, Poland, Slovakia, and Romania: Florentin Smarandache, Stefan Vladutescu, Mirela Teodorescu, Dan S. Stoica, Daniela Gifu, Calin Andrei, Ioan Constantin Dima, Mariana Man, Janusz Grabara, Paula Bajdor, Jim O'Brien, Andrzej Rabsztyn, Anabella-Maria Tarnovan, Adrian Nicolescu, Alina Tenescu, Nicusor Minculete, Vladimir Modrak, Sorin Mihai Radu, Alice Ionescu, Anca Diana Bibiri, Lucian Sacalean, Mircea Munteanu, Roxana Criu, Bogdan Constantin Neculau, Marin

Friedrich Engels and the Dialectics of Nature Kaan Kangal,2020-01-27

Reading different or controversial intentions into Marx and Engels' works has been a common but somewhat unquestioned practice in the history of Marxist scholarship. Engels' *Dialectics of Nature*, a torso for some and a great book for others, is a case in point. The entire Engels debate separates into two opposite views: Engels the contaminator of Marx's "new materialism" vs. Engels the self-educated genius of dialectical materialism. What Engels, unlike Marx, has not enjoyed so far is a critical reading that considers the relationship between different layers of this standard text: authorial, textual, editorial, and interpretational. Informed by a historical hermeneutic, this book questions the elements that structure the debate on the *Dialectics of Nature*. It analyzes different political and philosophical functions attached to Engels' text, and relocates the meaning of the term "dialectics" into a more precise context. Arguing that Engels' dialectics is less complete than we usually think it is but that he achieved more than most scholars would like to admit, this book fully documents and critically analyzes Engels' intentions and concerns in the *Dialectics of Nature*, the process of writing, and its reception and edition history in order to reconstruct the solved and unsolved philosophical problems in this unfinished work.

Saproxylic Beetles Jörn Buse,2009 The group of saproxylic beetles consists

of thousands of different species exhibiting a rich variety of form as well as varied life-cycle strategies. They play an important role in decomposition processes and thus for nutrient-cycling in natural ecosystems. Based on contributions given at the conference this book contains contributions about research on conservation ecology of saproxylic beetles as well as results from recent faunistic surveys in different European regions. It comprises aspects of saproxylic beetle ecology, faunistics, diversity and conservation issues. International experts report on their activity, management strategies and new approaches in saproxylic insect conservation. There are a lot of people doing research on saproxylic beetles in different countries of the world, but this seems to be a little bit disorganized. Hopefully, these European conferences will lead to a better, more international network. The contributions included in this volume cover a broad spectrum of research on saproxylic beetles, organized in three main chapters: Saproxylic beetle assemblages and regional surveys include Oaks in Norway, showing the abundance and composition of red-listed species of beetles in hollow oaks. Further reports on regional surveys deals with a spruce primeval forest in Romania, a hardwood floodplain forest in the Czech Republic, and the Gartow region of Lower Saxony, a hotspot of saproxylic beetle diversity in north-western Germany. Saproxylic beetle ecology and implications for their conservation deals with ecological studies of single species, e.g. *Limoniscus violaceus*, *Lucanus cervus*, *Osmoderma eremita* and the worldwide distribution

of the genus Cucujus. Advances in methodology and databases discusses new techniques in trapping and the development of databases. This volume gives a nice overview of the actual research on saproxylic beetles in Europe and I wish the next conference in 2010 a successful meeting; maybe some people from the UK or even overseas should be invited.

From Bondage to Freedom Michael LeBuffe, 2010-01-21 Spinoza rejects fundamental tenets of received morality, including the notions of Providence and free will. Yet he retains rich theories of good and evil, virtue, perfection, and freedom. Building interconnected readings of Spinoza's accounts of imagination, error, and desire, Michael LeBuffe defends a comprehensive interpretation of Spinoza's enlightened vision of human excellence. Spinoza holds that what is fundamental to human morality is the fact that we find things to be good or evil, not what we take those designations to mean. When we come to understand the conditions under which we act—that is, when we come to understand the sorts of beings that we are and the ways in which we interact with things in the world—then we can recast traditional moral notions in ways that help us to attain more of what we find to be valuable. For Spinoza, we find value in greater activity. Two hazards impede the search for value. First, we need to know and acquire the means to be good. In this respect, Spinoza's theory is a great deal like Hobbes's: we strive to be active, and in order to do so we need food, security, health,

and other necessary components of a decent life. There is another hazard, however, that is more subtle. On Spinoza's theory of the passions, we can misjudge our own natures and fail to understand the sorts of beings that we really are. So we can misjudge what is good and might even seek ends that are evil. Spinoza's account of human nature is thus much deeper and darker than Hobbes's: we are not well known to ourselves, and the self-knowledge that is the foundation of virtue and freedom is elusive and fragile.

Private Security, Public Order Simon Chesterman, Angelina Fisher, 2009-11-05
Private actors are increasingly taking on roles traditionally arrogated to the state. Both in the industrialized North and the developing South, functions essential to external and internal security and to the satisfaction of basic human needs are routinely contracted out to non-state agents. In the area of privatization of security functions, attention by academics and policy makers tends to focus on the activities of private military and security companies, especially in the context of armed conflicts, and their impact on human rights and post-conflict stability and reconstruction. The first edited volume emerging from New York University School of Law's Institute for International Justice project on private military and security companies, *From Mercenaries to Market: The Rise and Regulation of Private Military Companies* broadened this debate to situate the private military phenomenon in the context of moves towards the regulation of activities through market and non-market mechanisms. Where that first volume looked at

the emerging market for use of force, this second volume looks at the transformations in the nature of state authority. Drawing on insights from work on privatization, regulation, and accountability in the emerging field of global administrative law, the book examines private military and security companies through the wider lens of private actors performing public functions. In the past two decades, the responsibilities delegated to such actors - especially but not only in the United States - have grown exponentially. The central question of this volume is whether there should be any limits on government capacity to outsource traditionally public functions. Can and should a government put out to private tender the fulfilment of military, intelligence, and prison services? Can and should it transfer control of utilities essential to life, such as the supply of water? This discussion incorporates numerous perspectives on regulatory and governance issues in the private provision of public functions, but focuses primarily on private actors offering services that impact the fundamental rights of the affected population.

Organic and Physical Chemistry of Polymers Yves Gnanou, Michel Fontanille, 2008-03-03 Organic and Physical Chemistry of Polymers provides a thorough introduction to the fundamentals of polymers, including their structure and synthesis as well as their chemical and physical properties. This accessible guide illuminates the increasingly important role of polymers in modern chemistry, beginning with the essentials, then covering

thermodynamics, conformation, morphology, and measurements of molar masses; polymerization mechanisms, reaction of polymers, synthesis of block and graft polymers, and complex topologies; and the mechanical properties, rheology, polymer processing, and fabrication of fibers and films.

Give Me Everything You Have James Lasdun, 2013-02-12 A true story of obsessive love turning to obsessive hate, Give Me Everything You Have chronicles the author's strange and harrowing ordeal at the hands of a former student, a self-styled verbal terrorist, who began trying, in her words, to ruin him. Hate mail, online postings, and public accusations of plagiarism and sexual misconduct were her weapons of choice and, as with more conventional terrorist weapons, proved remarkably difficult to combat. James Lasdun's account, while terrifying, is told with compassion and humor, and brilliantly succeeds in turning a highly personal story into a profound meditation on subjects as varied as madness, race, Middle East politics, and the meaning of honor and reputation in the Internet age.

Additive Manufacturing Technologies Ian Gibson, David Rosen, Brent Stucker, Mahyar Khorasani, 2020-11-10 This textbook covers in detail digitally-driven methods for adding materials together to form parts. A conceptual overview of additive manufacturing is given, beginning with the fundamentals so that readers can get up to speed quickly. Well-established and emerging applications such as rapid prototyping, micro-scale manufacturing, medical applications, aerospace manufacturing, rapid tooling and direct digital

manufacturing are also discussed. This book provides a comprehensive overview of additive manufacturing technologies as well as relevant supporting technologies such as software systems, vacuum casting, investment casting, plating, infiltration and other systems. Reflects recent developments and trends and adheres to the ASTM, SI and other standards; Includes chapters on topics that span the entire AM value chain, including process selection, software, post-processing, industrial drivers for AM, and more; Provides a broad range of technical questions to ensure comprehensive understanding of the concepts covered.
