The Widower's Son Alan Sillitoe,2016-05-17 Raised
by a career soldier, a working class Englishman tries to
find his place—both in and out of uniform—in this
compelling novel of love and war Charlie Scorton sees his
best friend killed beside him in the mine, and resolves to
join the army. His father throws him out for deserting the
coal miner's life, but Charlie never looks back. For twenty-
four years, he roams the empire, a king's soldier who is
finally left with no choice but to come home. He has a
child, his wife dies, and the old soldier dedicates himself to
raising his boy. Charlie trains his son, William, to be an
artilleryman from birth. William finds a home in the army,
the sort he has always longed for, and makes his mark
during World War II, performing heroically during the
retreat at Dunkirk, risking his life to save thousands. But

soon, he will be forced to answer the question his father never could: What does a soldier do when war is over? Alan Sillitoe, the bestselling author of *The Loneliness of the Long-Distance Runner*, examines where the fight ends and life begins for a soldier in this story of love and war, and the blurred lines between them.

The Discursive Construction of European Identities Michał Krzyżanowski, 2010 This book looks at the discursive construction of European identities in a variety of institutional and non-institutional contexts and through a variety of social and political actors. Its multilevel and interdisciplinary approach - rooted in the Discourse-Historical tradition of Critical Discourse Analysis - allows for a comparison of identity constructions at different levels of Europe's social and political organisation and in different modes of communication. The book analyses discourses as diverse as those of the EU politicians, of Europe's national media as well as of migrants living in Europe. It offers a set of integrated models and analytical procedures which bring to the fore the inherent dynamism and complexity of both 'bottom-up' and 'top-down' European identity constructions.

Inventing the Universe Luc Brisson, F. Walter Meyerstein, 1995-07-20 A parallel investigation of both Plato's *Timaeus* and the contemporary standard Big Bang model of the universe shows that any possible scientific knowledge of the universe is ultimately grounded in irreducible and undemonstrable propositions. These are inventions of the human mind. The scientific knowledge of the universe is entirely composed in a series of axioms and rules of inference underlying a formalized system. There is no logical relationship between the sensible perception of a world of becoming and the formalized system of axioms known as a scientific explanation. The irrational gap

between perception and explanation can be appraised historically and identified in three stages: Plato's *Timaeus* furnishes the first example of a scientific theory dealing with a realm of ideality that cannot be derived from immediate sensible perception; the Big Bang model is constituted on the basis of the purely geometrical notion of symmetry; and in the more recent Algorithmic Theory of Information, the analysis of the purely symbolic language expressing physical reality reveals the level of complexity of any given theory formulated in this language. The result is that the probability of the universe actually conforming with simple mathematics is zero. In a formal system, a theorem contains more information than can be found in the set of axioms of this system, and it remains undecidable. In Aristotle's language, the theorems that can be proved within a theoretical model are already potentially contained in the system of axioms underlying these theorems.

Overcoming School Refusal Joanne Garfi, 2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more

difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Teaching and Learning Geography Daniella

Tilbury, Michael Williams, 2002-11-01 This book provides a clear overview of current thinking on the teaching and learning of geography. It is an ideal companion to all students beginning a career in teaching the subject in secondary schools. The chapters are written by experienced teacher educators and bridge both theory and practice. The writers focus on the continuities, whilst setting them in the context of the changing curriculum. The book is divided into four parts. Part One examines the historical context of geography teaching. Part Two looks at issues of course planning, design, syllabuses and programmes of study. Underlying this section is the assumption that geography should not be considered in isolation from other subjects, but rather as part of a whole curriculum. Part Three concentrates on teaching and

learning, and includes chapters on the use of maps, field work, IT and first hand experience within a community. The final section covers the issues associated with assessment, across the whole school age range.

Language and Diplomacy Jovan Kurbalija, Hannah Slavik, 2001

The Book of Tells Peter Collett, 2003 A TELL IS AN ACTION THAT TELLS YOU WHAT SOMEONE IS THINKING, EVEN IF THAT PERSON DOESN'T KNOW IT THEMSELVES. AND TELLS ARE HIGHLY INFORMATIVEa The way you stand when you're talking to others, how you move your feet, your hands, your eyes - even your eyebrows - says a lot about your commitment to a conversation and your underlying attitude. Your actions and stance can also affect how long you get to talk and how often you get interrupted. Even when you're seated, the position of your arms and legs provides a wealth of information about your mood and intentions, showing whether you feel dominant or submissive, preoccupied or bored. But Tells aren't confined merely to conversations; when you are alone you are constantly shifting your body - and each movement, each gesture provides clues about your state of mind. In this illuminating book, Peter Collett, social psychologist, former Oxford don and Big Brother's resident psychologist, introduces us to the fascinating concept of Tells, showing how they work, where they come from and how to identify and interpret them. Whilst sensitizing readers to the motives and actions of other people, this invaluable guide also focuses on the messages that we unwittingly send, and the impact that these might have on those around us. Comprehensive and accessible in its approach, and written in the tradition of the international bestseller, *Manwatching*, **THE BOOK OF TELLS** offers a new, unifying vocabulary for understanding

human communication and social influence - and a unique opportunity to read yourself, and others.

Rural Tourism in Europe World Tourism

Organization,2004 With an expected growth rate of around 6 per cent rural tourism is developing faster than the overall growth rate for international tourism arrivals. Due to its special importance for the European region, three seminars were held in Belgrade (Serbia), Kielce (Poland) and Yaremcha (Ukraine) to focus on three major issues: to contribute to a better understanding of rural tourism and to offer additional tools for planning and execution of initiatives; to enhance the importance of rural tourism in the agendas of governments and international organizations; to generate political and financial support for the development of rural tourism. The German Refugees Johann Wolfgang von

Goethe,2006 A new translation by an award winning translator rescues Goethe's collection of stories, modelled on the Decameron, from being out of print in English. A family of German nobles have been forced from their home on the left bank of the Rhine by the French Revolution. Their peace is further disrupted by the arguments between the young Karl, a supporter of the ideals of the revolution, and the other men. The Baroness saves the family situation by suggesting they amuse each other by telling stories. There are seven in all: two short ghost stories, two amorous anecdotes and two more substantial moral tales, the whole being concluded with Goethe's richly worked, fantastic, symbolic, allegorical 'Fairy Tale'. The German Refugees was first published in 1795.--BOOK JACKET.
