We Are the Weather Jonathan Safran Foer, 2019-09-17 In *We Are the Weather*, Jonathan Safran Foer explores the central global dilemma of our time in a surprising, deeply personal, and urgent new way. Some people reject the fact, overwhelmingly supported by scientists, that our planet is warming because of human activity. But do those of us who accept the reality of human-caused climate change truly believe it? If we did, surely we would be roused to act on what we know. Will future generations distinguish between those who didn't believe in the science of global warming and those who said they accepted the science but failed to change their lives in response? The task of saving the planet will involve a great reckoning with ourselves—with our all-too-human reluctance to sacrifice immediate comfort for the sake of the future. We have, he reveals, turned our planet into a farm for growing animal products, and the consequences are catastrophic. Only collective action will save our home and way of life. And it all starts with what we eat—and don't eat—for breakfast.

The Love Con Seressia Glass, 2021-12-14 A LibraryReads Pick! One of... Popsugar's Best New Romances Bustle and Bookish's Most Anticipated Books of December Library Journal's Best Romances of 2021 He's cosplaying as her boyfriend but their feelings for each other are real in this romantic comedy from Seressia Glass. Sometimes Kenya Davenport believes she was switched at the hospital—how else could a lover of anime, gaming, and cosplay come from STEM parents? Still, Kenya dreams of being able to turn her creative hobby into a career. She finally has a chance to make it big when she joins the reality show competition *Cosplay or No Way*. There's just one catch: the challenge for the final round is all about iconic pairs, and the judges want the contestants' significant others to participate. Unfortunately, Kenya is as single as can be at the moment. Luckily her best friend, Cameron Lassiter, agrees to be her fake boyfriend for the show. Roleplaying a couple in love will force them to explore what they're hiding under the mask of friendship. Can Kenya and Cam fake it until she makes it, or will she be real about her feelings, knowing it could cost her the best friend she's ever had?

Water Resources Management in Romania Abdelazim M. Negm, Gheorghe Romanescu, Martina Zeleňáková, 2019-11-02 This book discusses water resources management in Romania from a hydrological perspective, presenting the latest research developments and state-of-the-art knowledge that can be applied to efficiently solve a variety of problems in integrated water resources management. It focuses on a wide range of water resources issues – from hydrology and water quantity, quality and supply to flood protection, hydrological hazards and ecosystems, and includes case studies from various watersheds in Romania. As such, the book appeals to researchers, practitioners and graduates as well as to anybody interested in water resources management.

Topical Communication Uncertainties Stefan Vladutescu, Florentin Smarandache, Daniela Gifu, Alina Tenescu, 2014 Communication is the main way of defusing uncertainties. Unfortunately, communication discipline itself is mined by uncertainties. We can talk about onto-epistemological uncertainties and pragmatic uncertainties of communication, about theoretical and practical uncertainties, and about primary and secondary uncertainties of communication. Uncertainties regarding the object of communication as autonomous discipline, the research methods of communication, the sources,

paradigms and models of communication represent theoretical, onto-epistemological uncertainties. Pragmatic uncertainties include uncertainties in communication processes; they have a practical character. Pragmatic uncertainties are those that lead to communication failure and they consist in minor obstacles or insurmountable barriers in concrete communication. (Florentin Smarandache & Stefan Vladutescu) *** The book has 16 chapters written by the following authors and co-authors from USA, England, Poland, Slovakia, and Romania: Florentin Smarandache, Stefan Vladutescu, Mirela Teodorescu, Dan S. Stoica, Daniela Gifu, Calin Andrei, Ioan Constantin Dima, Mariana Man, Janusz Grabara, Paula Bajdor, Jim O'Brien, Andrzej Rabsztyn, Anabella-Maria Tarnovan, Adrian Nicolescu, Alina Tenescu, Nicusor Minculete, Vladimir Modrak, Sorin Mihai Radu, Alice Ionescu, Anca Diana Bibiri, Lucian Sacalean, Mircea Munteanu, Roxana Criu, Bogdan Constantin Neculau, Marin Dramnescu, MihaelaGabriela Paun, and Loredana Speriatu.

First Language Attrition Monika S. Schmid,Barbara Köpke,2013-05-22 This volume consists of a collection of papers that focus on structural/grammatical aspects of the process of first language attrition. It presents an overview of current research, methodological issues and important questions regarding first language attrition. In particular, it addresses the two most prominent issues in current L1 attrition research: Can attrition effects impact on features of core syntax, or are they limited to interface phenomena?, and; What is the role of age at onset (pre-/post-puberty) in this regard? By investigating attrition in a variety of settings, from a case study of a Spanish-speaking adoptee in the US to an empirical investigation of more than 50 long-term attriters of Turkish in the Netherlands, the investigations presented take a new perspective on these issues. Recovery of Gray Wolves in the Great Lakes Region of the United States Adrian P. Wydeven,Timothy R. van Deelen,Edward Heske,2009-02-27 In this book, we document and evaluate the recovery of gray wolves (*Canis lupus*) in the Great Lakes region of the United States. The Great Lakes region is unique in that it was the only portion of the lower 48 states where wolves were never completely extirpated. This region also contains the area where many of the first modern concepts of wolf conservation and research were developed. Early proponents of wolf conservation such as Aldo Leopold, Sigurd Olson, and Durward Allen lived and worked in the region. The longest ongoing research on wolf-prey relations (see Vucetich and Peterson, Chap. 3) and the first use of radio telemetry for studying wolves (see Mech, Chap. 2) occurred in the Great Lakes region. The Great Lakes region is the first place in the United States where "Endangered" wolf populations recovered. All three states (Minnesota, Wisconsin, and Michigan) developed ecologically and socially sound wolf

conservation plans, and the federal government delisted the population of wolves in these states from the United States list of endangered and threatened species on March 12, 2007 (see Refsnider, Chap. 21). Wolf management reverted to the individual states at that time. Although this delisting has since been challenged, we believe that biological recovery of wolves has occurred and anticipate the delisting will be restored. This will be the first case of wolf conservation reverting from the federal government to the state conservation agencies in the United States.

Organic and Physical Chemistry of Polymers Yves Gnanou, Michel Fontanille, 2008-03-03 Organic and Physical Chemistry of Polymers provides a thorough introduction to the fundamentals of polymers, including their structure and synthesis as well as their chemical and physical properties. This accessible guide illuminates the increasingly important role of polymers in modern chemistry, beginning with the essentials, then covering thermodynamics, conformation, morphology, and measurements of molar masses; polymerization mechanisms, reaction of polymers, synthesis of block and graft polymers, and complex topologies; and the mechanical properties, rheology, polymer processing, and fabrication of fibers and films.

Vulvar Disease Jacob Bornstein, 2019-04-13 This book offers comprehensive information on modern approaches to vulvar lesions, taking into account recent management recommendations and employing the consensus terminology of the International Society for the Study of Vulvovaginal Disease (ISSVD). Further, it breaks with past misconceptions and myths, and explains in detail the modern approach. The aim is to help clinicians perform the differential diagnosis of vulvar conditions and implement the new recommended treatments. The core chapters of the book are arranged in accordance with lesion presentation: red lesions, white lesions, patches and plaques, papules and nodules, erosions and ulcers, blisters, etc. For each lesion, the multidisciplinary management is fully explained, including clarifications of the role of gynecologists, dermatologists, physical therapists, pain specialists, sex therapists, and others. Clinical case presentations and numerous illustrations of treatment procedures are included, supplemented by informative online videos. A separate chapter is devoted to vulvar pain, which is increasingly becoming recognized as a growing problem. Here, again the past approaches are replaced with new paradigms. All of the authors are acknowledged experts in the field and the editor is a past president of the ISSVD. The book will be of value for all vulvar specialists and a wide range of other clinicians.

Remote Sensing of Geomorphology , 2020-05-04 Remote Sensing of Geomorphology, Volume 23, discusses the new range of remote-sensing techniques (lidar, structure from motion photogrammetry, advanced satellite platforms) that has led to a dramatic increase in terrain information, and as such provided new opportunities for a better understanding of surface morphology and related Earth surface processes. As several papers have been published (including paper reviews and special issues) on this topic, this book summarizes the major advances in remote sensing techniques for the analysis of Earth surface morphology and processes, also highlighting future challenges. Useful for MSc and PhD students, this book is also ideal for any

scientists that want to have a single volume guideline to help them develop new ideas. In addition, technicians and private and public sectors working on remote sensing will find the information useful to their initiatives. Provides a useful guideline for MSc and PhD students, scientists, technicians, and land planners on the use of remote sensing in geomorphology Includes applications on specific case studies that highlight issues and benefits of one technique compared to others Presents future trends in remote sensing and geomorphology

Technologies of Enchantment? Duncan Garrow, Chris Gosden, 2012 While Celtic art includes some of the most famous archaeological artefacts in the British Isles, such as the Battersea shield or the gold torcs from Snettisham, it has often been considered from an art historical point of view. *Technologies of Enchantment? Exploring Celtic Art* attempts to connect Celtic art to its archaeological context, looking at how it was made, used, and deposited. Based on the first comprehensive database of Celtic art, it brings together current theories concerning the links between people and artefacts found in many areas of the social sciences. The authors argue that Celtic art was deliberately complex and ambiguous so that it could be used to negotiate social position and relations in an inherently unstable Iron Age world, especially in developing new forms of identity with the coming of the Romans. Placing the decorated metalwork of the later Iron Age in a long-term perspective of metal objects from the Bronze Age onwards, the volume pays special attention to the nature of deposition and focuses on settlements, hoards, and burials -- including Celtic art objects' links with other artefact classes, such as iron objects and coins. A unique feature of the book is that it pursues trends beyond the Roman invasion, highlighting stylistic continuities and differences in the nature and use of fine metalwork.

Speculators and Slaves Michael Tadman, 1996 Drawing heavily on primary sources, Tadman (economic and social history, U. of Liverpool) reconstructs the scale and organization of the interregional slave trade, and interprets the significance of slave sales and forced family separations for the values and cultures of masters and slaves. He suggests not a smooth process of accommodation, but a situation of essentially conflicting worlds. Annotation copyrighted by Book News, Inc., Portland, OR
