Ecological Engineering for Pest Management Geoff M Gurr, Steve D Wratten, Miguel A Altieri, 2004-08-03 Ecological engineering is about manipulating farm habitats, making them less favourable for pests and more attractive to beneficial insects. Though they have received far less research attention and funding, ecological approaches may be safer and more sustainable than their controversial cousin, genetic engineering. This book brings together contributions from international workers leading the fast moving field of habitat manipulation, reviewing the field and paving the way towards the development and application of new pest management approaches. Chapters explore the frontiers of ecological engineering methods including molecular approaches, high tech marking and remote sensing. They also review the theoretical aspects of this field and how ecological engineering may interact with genetic engineering. The technologies presented offer opportunities to reduce crop losses to insects while reducing the use of pesticides and providing potentially valuable habitat for wildlife conservation. With contributions from the USA, UK, Germany, Switzerland, Australia, New Zealand, Kenya and Israel, this book provides comprehensive coverage of international progress towards sustainable pest management.

Momma And The Meaning Of Life Irvin D. Yalom, 2014-03-25 As the public grows disillusioned with therapeutic quick fixes, people are looking for a deeper psychotherapeutic experience to make life more meaningful and satisfying. What really happens in therapy? What promises and perils

does it hold for them? No one writes about therapy - or indeed the dilemmas of the human condition - with more acuity, style, and heart than Irvin Yalom. Here he combines the storytelling skills so widely praised in *Love's Executioner* with the wisdom of the compassionate and fully engaged psychotherapist. In these six compelling tales of therapy, Yalom introduces us to an unforgettable cast of characters: Paula, who faces death and stares it down; Magnolia, into whose ample lap Yalom longs to pour his own sorrows; Irene, who learns to seek out anger and plunge into it. And there's Momma, old-fashioned, ill-tempered, who drifts into Yalom's dreams and tramples through his thoughts. At once wildly entertaining and deeply thoughtful, *Momma and the Meaning of Life* is a work of rare insight and imagination.

A Victorian Flower Dictionary Mandy Kirkby, 2011-09-20 "A flower is not a flower alone; a thousand thoughts invest it." Daffodils signal new beginnings, daisies innocence. Lilacs mean the first emotions of love, periwinkles tender recollection. Early Victorians used flowers as a way to express their feelings—love or grief, jealousy or devotion. Now, modern-day romantics are enjoying a resurgence of this bygone custom, and this book will share the historical, literary, and cultural significance of flowers with a whole new generation. With lavish illustrations, a dual dictionary of flora and meanings, and suggestions for creating expressive arrangements, this keepsake is the perfect compendium for everyone who has ever given or received a bouquet.

Ethnoecology Virginia D. Nazarea, 1999-01-01 The re-emerging field of ethnoecology offers a promising way to document and analyze human-environment interactions. This collection brings the discipline into sharp focus, conveying local understandings of environments and proposing a way of looking at the relationship between humans and the natural world that emphasizes the importance of cognition in shaping behavior. Case studies by international experts explore the varied views of scholars on the human dimension of conversation and the different views of local peoples regarding their own environments. Filled with peoples' voices from North and South America, Africa, and Asia, these cases cover a range of issues: natural resource conservation and sustainable development, the relationship between local knowledge and biodiversity, the role of the commons in development, and the importance of diversity and equity in environmental management. As the only volume to address the status of this increasingly multidisciplinary field—especially as it relates to the differential power of multiple stakeholders—*Ethnoecology: Situated Knowledge/Located Lives* is intended for a wide range of specialists not only in social and natural sciences but also in agricultural studies. Slow Heat in Heaven Sandra Brown, 2013-02-26 Grappling with hidden family secrets, forbidden passions, and a business in peril, the adopted daughter of a Louisiana mogul must confront the past to bring peace back to her hometown. The adopted daughter of the most powerful man in town, Schyler Crandall was a brokenhearted girl when she left Heaven, Louisiana. Now a crisis has brought her home to a family in conflict, a logging empire on the brink of disaster, and seething secrets that make Heaven hotter than hell. Everyone in Heaven has a secret: Schyler's beautiful younger sister, Tricia, with her cruel lies; Ken, Tricia's handsome husband, who married the wrong sister; Jigger, the pimp and ruffian with plans of his own; and Cash, a proud, mysterious, and complex bad boy with a wild reputation. This Soil Biology volume covers the various facets of soil enzymes, such as their functions, biochemical and microbiological properties and the factors affecting their activities. Enzymes in the rhizosphere, in forest soils, and in volcanic ash-derived soils are described. Soil enzymes covered include phosphohydrolases, lignocellulose-degrading enzymes, phenol oxidases, fungal oxidoreductases, keratinases, pectinases, xylanases, lipases and pectinases. Flora of Alaska and Neighboring Territories Eric Hultén, 1968 This monumental work by the world's preeminent authority on Arctic floras--the first comprehensive, up-to-date botanic manual for this region--is the product of the author's more than forty years of study of circumpolar floras. The book describes and illustrates all flowering plants and vascular cryptograms known to occur in Alaska, the Yukon, the Mackenzie District, and the eastern extremity of Siberia. Some 1,974 taxa, belonging to 1,559 species, occur in this region; all are described. For 1,735 of these, the book provides detailed description, nomenclature, plant drawing, and range maps. In each case, one map gives distribution in the Alaskan region; a second, on circumpolar projection, gives worldwide range. This volume is the first major flora to assemble such comprehensive range data and to provide such maps. An analytic key to all species described is provided for each genus, and there is an artificial key to families. An Introduction describes the past and present climatic, geologic, and ecologic character of the regions covered, the history of botanical collection in these regions, and the book's treatment of botanical and taxonomic details; and lists the plants of neighboring regions likely to occur. Glossary, plant authors' list, bibliography, and indexes are provided. The superb drawings were prepared by Dagny Tande-Lid, and eight pages of illustration in color are included.
