## Topical Communication Uncertainties Stefan Vladutescu,

Florentin Smarandache, Daniela Gifu, Alina Tenescu, 2014

Communication is the main way of defusing uncertainties.

Unfortunately, communication discipline itself is mined by uncertainties. We can talk about onto-epistemological uncertainties and pragmatic uncertainties of communication, about theoretical and practical uncertainties, and about primary and secondary uncertainties of communication. Uncertainties regarding the object of communication as autonomous discipline, the research methods of communication, the sources, paradigms and models of communication represent theoretical, onto-epistemological uncertainties. Pragmatic uncertainties include uncertainties in communication processes; they have a practical character.

Pragmatic uncertainties are those that lead to communication failure and they consist in minor obstacles or insurmountable barriers in concrete communication. (Florentin Smarandache & Stefan Vladutescu) \*\*\* The book has 16 chapters written by the following authors and co-authors from USA, England, Poland, Slovakia, and Romania: Florentin Smarandache, Stefan Vladutescu, Mirela Teodorescu, Dan S. Stoica, Daniela Gifu, Calin

Andrei, Ioan Constantin Dima, Mariana Man, Janusz Grabara, Paula Bajdor, Jim O'Brien, Andrzej Rabsztyn, Anabella-Maria Tarnovan, Adrian Nicolescu, Alina Tenescu, Nicusor Minculete, Vladimir Modrak, Sorin Mihai Radu, Alice Ionescu, Anca Diana Bibiri, Lucian Sacalean, Mircea Munteanu, Roxana Criu, Bogdan Constantin Neculau, Marin Dramnescu, MihaelaGabriela Paun, and Loredana Speriatu.

**The Intercultural City** Charles Landry,Phil Wood,2012-05-16 In a world of increasing mobility, how people of different cultures live together is a key issue of our age, especially for those responsible for planning and running cities. New thinking is needed on how diverse communities can cooperate in productive harmony instead of leading parallel or antagonistic lives. Policy is often dominated by mitigating the perceived negative effects of diversity, and little thought is given to how adiversity dividend or increased innovative capacity might be achieved. The Intercultural City, based on numerous case studies worldwide, analyses the links between urban change and cultural diversity. It draws on original research in the US, Europe, Australasia and the UK. It critiques past and current policy and introduces new conceptual frameworks. It provides significant and practical advice for readers, with new insights and tools for practitioners such as theintercultural lensindicators of opennessurban cultural literacy andten steps to an Intercultural City. **Overcoming School Refusal** Joanne Garfi,2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is

away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

**Angels and Demons in Art** Rosa Giorgi, 2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

**The Widower's Son** Alan Sillitoe,2016-05-17 Raised by a career soldier, a working class Englishman tries to find his place—both in and out of uniform—in this compelling novel of love and war Charlie Scorton sees his best friend killed beside him in the mine, and resolves to join the army. His father throws him out for deserting the coal miner's life, but Charlie never looks back. For twenty-four years, he roams the empire, a king's soldier who is finally left with no choice but to come home. He has a child, his wife dies, and the old soldier dedicates himself to raising his boy. Charlie trains his son, William, to be an artilleryman from birth. William finds a home in the army, the sort he has always longed for, and makes his mark during World War II, performing heroically during the retreat at Dunkirk, risking his life to save thousands. But soon, he will be forced to answer the question his father never could: What does a soldier do when war is over? Alan Sillitoe, the bestselling author of *The Loneliness of the Long-Distance Runner*, examines where the fight ends and life begins for a soldier in this story of love and war, and the blurred lines between them.

**The Taste of Ashes** Marci Shore,2013-01-15 An inventive,

wholly original look at the complex psyche of Eastern Europe in the wake of the revolutions of 1989 and the opening of the communist archives. In the tradition of Timothy Garton Ash's *The File*, Yale historian and prize-winning author Marci Shore draws upon intimate understanding to illuminate the afterlife of totalitarianism. *The Taste of Ashes* spans from Berlin to Moscow, moving from Vienna in Europe's west through Prague, Bratislava, Warsaw and Bucharest to Vilnius and Kiev in the post-communist east. The result is a shimmering literary examination of the ghost of communism – no longer Marx's "specter to come" but a haunting presence of the past. Marci Shore builds her history around people she came to know over the course of the two decades since communism came to an end in Eastern Europe: her colleagues and friends, once-communists and once-dissidents, the accusers and the accused, the interrogators and the interrogated, Zionists, Bundists, Stalinists and their children and grandchildren. For them, the post-communist moment has not closed but rather has summoned up the past: revolution in 1968, Stalinism, the Second World War, the Holocaust. The end of communism had a dark side. As Shore pulls the reader into her journey of discovery, reading the archival records of people who are themselves confronting the traumas of

former lives, she reveals the intertwining of the personal and the political, of love and cruelty, of intimacy and betrayal. The result is a lyrical, touching, and sometimes heartbreaking, portrayal of how history moves and what history means.

*Economics in Urban Conservation* Nathaniel

Lichfield, 2009-01-09 The role of economics in urban conservation is relatively underdeveloped. Professor Lichfield has added to his other pioneering studies in this innovative and important exposition of approach, method and techniques for the systematic application of economics in the conservation of urban areas. In order to establish an appropriate base for the economic analysis and application in parts III, IV and V of the book, the opening sections provide essential background information about the management and planning for conservation in the urban system in general and examine the special place of the cultural built heritage: those

building and objects chosen by society for particular protection. Written in a highly accessible style, *Economics in Urban Conservation* makes a major contribution to an understanding of how economics in conservation can help in achieving a sensible balance between continuity and change in the built environment.
