*Medieval Saints and Modern Screens* Alicia Spencer-Hall, 2018-01-23 This ground-breaking book brings theoretical perspectives from twenty-first century media, film, and cultural studies to medieval hagiography. *Medieval Saints and Modern Screens* stakes the claim for a provocative new methodological intervention: consideration of hagiography as media. More precisely, hagiography is most productively understood as cinematic media. Medieval mystical episodes are made intelligible to modern audiences through reference to the filmic - the language, form, and lived experience of cinema. Similarly, reference to the realm of the mystical affords a means to express the disconcerting physical and emotional effects of watching cinema. Moreover, cinematic spectatorship affords, at times, a (more or less) secular experience of visionary transcendence: an 'agape-ic encounter'. The medieval saint's visions of God are but one pole of a spectrum of visual experience which extends into our present multi-media moment. We too conjure godly visions: on our smartphones, on the silver screen, and on our TVs and laptops. This book places contemporary pop-culture media - such as blockbuster movie *The Dark Knight*, Kim Kardashian West's social media feeds, and the outputs of online role-players in *Second Life* - in dialogue with a corpus of thirteenth-century Latin biographies, 'Holy Women of Liège'. In these texts, holy women see God, and see God often. Their experiences fundamentally orient their life, and offer the women new routes to knowledge, agency, and belonging. For the holy visionaries of Liège, as with us modern 'seers', visions are physically intimate, ideologically overloaded spaces. Through theoretically informed close readings, *Medieval Saints and Modern Screens* reveals the interconnection of decidedly 'old' media - medieval textualities - and artefacts of our 'new media' ecology, which all serve as spaces in which altogether human concerns are brought before the contemporary culture's eyes.

**We Are the Weather** Jonathan Safran Foer, 2019-09-17 In *We Are the Weather*, Jonathan Safran Foer explores the central global dilemma of our time in a surprising, deeply personal, and urgent new way. Some people reject the fact, overwhelmingly supported by scientists, that our planet is warming because of human activity. But do those of us who accept the reality of human-caused climate change truly believe it? If we did, surely we would be roused to act on what we know. Will future generations distinguish between those who didn't believe in the science of global warming and those who said they accepted the science but failed to change their lives in response? The task of saving the planet will involve a great reckoning with ourselves—with our all-too-human reluctance to sacrifice immediate comfort for the sake of the future. We have, he reveals, turned our planet into a farm for growing animal products, and the consequences are catastrophic. Only collective action will save our home and way of life. And it all starts with what we eat—and don't eat—for breakfast.

The Law of Green and Social Procurement in Europe Roberto Caranta, Martin Trybus, 2010 The main objective of public procurement regulation is to provide a government with the supplies and works it needs to operate. This primary objective is connected to the principle of value for money, and for the European Union, with the aim of ensuring the functioning of the internal market in public procurement. However, other objectives related to environmental and social concerns have always played a role as well. These range from the award of contracts, to workshops for the disabled, to strict environmental specifications. These 'secondary' or 'horizontal' objectives, also referred to as 'green procurement' or 'social procurement', are the subject of this book. The analysis covers the EU internal market law of green and social procurement, with emphasis on the interpretation, implementation, and practice, in a range of Member States of the EU, and includes a comparative study

**The Gameful World** Steffen P. Walz, Sebastian Deterding, 2015-01-16 What if every part of our everyday life was turned into a game? The implications of "gamification." What if our whole life were turned into a game? What sounds like the premise of a science fiction novel is today becoming reality as "gamification." As more and more organizations, practices, products, and services are infused with elements from games and play to make them more engaging, we are witnessing a veritable ludification of culture. Yet while some celebrate gamification as a possible answer to mankind's toughest challenges and others condemn it as a marketing ruse, the question remains: what are the ramifications of this "gameful world"? Can game design energize society and individuals, or will algorithmic incentive systems become our new robot overlords? In this book, more than fifty luminaries from academia and industry examine the key challenges of gamification and the ludification of culture—including Ian Bogost, John M. Carroll, Bernie DeKoven, Bill Gaver, Jane McGonigal, Frank Lantz, Jesse Schell, Kevin Slavin, McKenzie Wark, and Eric Zimmerman. They outline major disciplinary approaches, including rhetorics, economics, psychology, and aesthetics; tackle issues like exploitation or privacy; and survey main application domains such as health, education, design, sustainability, or social media.

Advanced Language Practice Michael Vince, Peter Sunderland, 2003 This text is designed to revise and consolidate grammar points at the level of CAE and Proficiency exams, and this edition has been revised to include proficiency material in the format of the 2002 exam. **Talon of God** Wesley Snipes, Ray Norman, 2017-07-25 The acclaimed actor makes his fiction debut with this enthralling urban fantasy in which a holy warrior must convince a doctor with no faith to help stop a powerful demon and his minions from succeeding in creating hell on earth—a thrilling adventure of science and faith, good and evil, damnation and salvation. Imagine that everyone you have ever known or loved was forced against their will into a state of demonic possession and spiritual slavery. Imagine an unholy cabal of the world's richest and most powerful men directing this sinister plan in order to cement their unbridled control of the planet. Imagine two heroes emerging from that dark-ness to do battle with the forces of evil. Set in the mean streets of Chicago, Talon of God is the action-packed adventure centered around Lauryn Jefferson, a beautiful young doctor who is dragged into a seemingly impossible battle against the invisible forces of Satan's army and their human agents that are bent on enslaving humanity in a mission to establish the kingdom of hell on Earth. But Lauryn is a skeptic, and it's only as she sees a diabolical drug sweep her city and begins to train in the ways of a spirit warrior with Talon Hunter, the legendary man of God, that she discovers her true nature and inner strength. Facing dangerous trials and tests, it's a true baptism by fire. And if she and Hunter fail, millions could die. And rivers of blood would flow throughout the land. Imagine such horror. Such pain. And imagine what it would take to fight against it. For only the strongest and most faithful will survive . . . Get ready. Armageddon approaches quickly.

**ISO 26000 - A Standardized View on Corporate Social Responsibility** Samuel O. Idowu, Catalina Sitnikov, Lars Moratis, 2018-08-03 This book provides a comprehensive and detailed introduction to the ISO 26000 standard for social responsibility (SR) in businesses and corporations. In addition to discussing the standard's focus on various stakeholders and seven core topics, the book underscores its key aspects and most debatable issues, with a focus on its connection to sustainable business practices. It presents numerous cases and practical examples of the ISO 26000's implementation and discusses the outcomes and lessons learned, in terms of the extent to which organizations can envision practicing CSR in ways that fit their activities, stakeholders and environment. Lately, the ISO 26000 has proved to offer an interesting and important approach to the standardization of (corporate) social responsibility. Approached and perceived as a voluntary standard that does not include any specific requirements, determining the best way to implement and work with it involved a considerable amount of experimentation. This book showcases the current state of application and discusses how different countries have developed their own specific versions of the standard, which organizations can use to certify their SR processes.

*European Socialist Regimes' Fateful Engagement with the West* Angela Romano, Federico Romero, 2022-08 This edited volume analyses European socialist countries' strategy of engagement with the West and the European Economic Community in the long 1970s. The book focuses on a time when the socialist regimes of Central and Eastern Europe banked their hopes for prosperity and stability on enhanced relations with the West. Crossing the traditional differences among diverse fields of historiography, it assesses the complex influence of European and global processes of transformation on the socialist elites' reading of the international political and economic environment and their consequent decision-making. The volume also explores the debate in each country among and within the elites involved in policymaking as they elaborated this strategic view and coped with shortcomings and unexpected turns. A comparative analysis of national cases shows a shared logic and common patterns, together with national variations and a plurality of views on the desirability of exchanges with their capitalist neighbours and on the ways to promote them. The multinational coverage of seven countries makes this volume a starting point for anyone interested in each socialist state's foreign policy, intra-bloc relations, economic strategy, transformation and collapse, relations with the European Community and access to the EU. This book will be of much interest to students and researchers of Cold War Studies, European history, and International Relations. The Open Access version of this book, available at <https://www.routledge.com/European-Socialist-Regimes-Fateful-Engagement-with-the-West-National-Strategies/Romano-Romero/p/book/9780367356170>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

*The News Gap* Pablo J. Boczkowski, Eugenia Mitchelstein, 2013-11-08 An analysis of divergent online news preferences of journalists and consumers and what this means for media and democracy in the digital age. The websites of major media organizations--CNN, USA Today, the Guardian, and others--provide the public with much of the online news they consume. But although a large proportion of the top stories these sites disseminate cover politics, international relations, and economics, users of these sites show a preference (as evidenced by the most viewed stories) for news about sports, crime, entertainment, and weather. In this book, Pablo Boczkowski and Eugenia Mitchelstein examine the divergence in preferences and consider its implications for the media industry and democratic life in the digital age. Drawing on analyses of more than 50,000 stories posted on twenty news sites in seven countries in North and South America and Western Europe, Boczkowski and Mitchelstein find that the gap in news preferences exists regardless of ideological orientation or national media culture, and that it is not affected by innovations in forms of storytelling, such as blogs and user-generated content on mainstream news sites. Drawing upon these findings, they explore the news gap's troubling consequences for the matrix that connects communication, technology, and politics in the digital age.
