Overcoming School Refusal Joanne Garfi,2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Public Integrity J. Patrick Dobel,2002-01-01 In this groundbreaking book, J. Patrick Dobel describes and analyzes the elements that constitute integrity in public office. Drawing on case studies, memoirs, interviews, and fiction (e.g., John Le Carré), Dobel addresses such issues as when to resign and when to stay in office. He examines the temptations of power, the relation between private and public life, and the role of honor and prudence in making personal decisions. He applies not only moral theory but also the insights of history, organizational theory, and psychology. Unlike most political ethics books, Public Integrity puts personal responsibility at the center of public morality, examining not just the responsibilities of office but also the role of personal moral commitments and promises. This timely book reminds us of the importance of public integrity as well as the demands and challenges that often threaten that integrity, especially in a liberal democracy such as the United States.

Angels and Demons in Art Rosa Giorgi,2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

Figurative Language and Thought Albert N. Katz,Cristina Cacciari,Raymond W. Gibbs Jr.,Mark Turner,1998-09-10 Our understanding of the nature and processing of figurative language is central to several important issues in cognitive science, including the relationship of language and thought, how we process language, and how we comprehend abstract meaning. Over the past fifteen years, traditional approaches to these issues have been challenged by experimental psychologists, linguists, and other cognitive scientists interested in the structures of the mind and the processes that operate on them. In Figurative Language and Thought, internationally recognized experts in the field of figurative language, Albert Katz, Mark Turner, Raymond W. Gibbs Jr., and Cristina Cacciari, provide a coherent and focused debate on the subject. The book's authors discuss a variety of fundamental questions, including: What can figures of speech tell us about the structure of the conceptual system? If and how should we distinguish the literal from the nonliteral in our theories of language and thought? Are we primarily figurative thinkers and consequently figurative language users or the other way around? Why do we prefer to speak metaphorically in everyday conversation, when literal options may be available for use? Is metaphor the only vehicle through which we can understand abstract concepts? What role do cultural and social factors play in our comprehension of figurative language? These and related questions are raised and argued in an integrative look at the role of nonliteral language in cognition. This volume, a part of Counterpoints series, will be thought-provoking reading for a wide range of cognitive psychologists, linguists, and philosophers.

Researching and Applying Metaphor in the Real World Graham Low,Alice Deignan,Lynne Cameron,Zazie Todd,2010 It has become increasingly clear that metaphor needs to be explored in terms of the social and discourse context in which it is used, especially where the aim is to address real-world problems. The notion of 'real world' metaphor research has been developed to describe this important area of investigation. This book starts by describing the nature and scope of real world metaphor research and then illustrates, through 17 detailed, mainly empirically-based studies, the different areas it can apply to, and different methodologies that can be employed. Research problems are explored in areas such as artificial intelligence, language teaching and learning, reconciliation dialogue, university lecture discourse, poetry and wine description. Methods include corpus analysis, experimentation, discourse analysis, cross-cultural analysis and genre analysis. In each case the empirical studies refer back to Gibbs's opening overview of real-world research. The result is an invaluable and cross-referenced collection of papers addressing real-world problems.

A Pack of Lies John Arundel Barnes,1994-06-09 Defining lies as statements that are intended to deceive, this book considers the contexts in which people

tell lies, how they are detected and sometimes exposed, and the consequences for the liars themselves, their dupes, and the wider society. The author provides examples from a number of cultures with distinctive religious and ethical traditions, and delineates domains where lying is the norm, domains that are ambiguous and the one domain (science) that requires truth-telling. He refers to experimental studies on children that show how, at an early age, they acquire the capacity to lie and learn when it is appropriate to do so. He reviews how lying has been evaluated by moralists, examines why we do not regard novels as lies and relates the human capacity to lie to deceit among other animal species. He concludes that although there are, in all societies, good pragmatic reasons for not lying all the time, there are also strong reasons for lying some of the time.

Sensuous Cognition Rosario Caballero, Javier E. Díaz Vera, 2013-03-22 This book provides an interdisciplinary, unified view of sensual cognition and its cultural manifestations. The contributors favour an ecological perspective and revisit and problematize some of the core assumptions in Cognitive Linguistics. One of the original tenets of CL states that human thinking is grounded in experiential gestalts as well as in interaction between peoples' embodied minds and their various environments or cultures. In addition to looking in detail at this tenet, the volume provides major insights into the methodological and theoretical dimensions of Cognitive Linguistics research and describes applications of the paradigm in diverse contexts and cultures.

Wine and Conversation Adrienne Lehrer, 2009-04-08 The vocabulary of wine is large and exceptionally vibrant -- from straight-forward descriptive words like sweet and fragrant, colorful metaphors like ostentatious and brash, to the more technical lexicon of biochemistry. The world of wine vocabulary is growing alongside the current popularity of wine itself, particularly as new words are employed by professional wine writers, who not only want to write interesting prose, but avoid repetition and cliché. The question is, what do these words mean? Can they actually reflect the objective characteristics of wine, and can two drinkers really use and understand these words in the same way? In this second edition of *Wine and Conversation*, linguist Adrienne Lehrer explores whether or not wine drinkers (both novices and experts) can in fact understand wine words in the same way. Her conclusion, based on experimental results, is no. Even though experts do somewhat better than novices in some experiments, they tend to do well only on wines on which they are carefully trained and/or with which they are very familiar. Does this mean that the elaborate language we use to describe wine is essentially a charade? Lehrer shows that although scientific wine writing requires a precise and shared use of language, drinking wine and talking about it in casual, informal setting with friends is different, and the conversational goals include social bonding as well as communicating information about the wine. Lehrer also shows how language innovation and language play, clearly seen in the names of new wines and wineries, as well as wine descriptors, is yet another influence on the burgeoning and sometimes whimsical world of wine vocabulary.

Cognitive Linguistics: Basic Readings Dirk Geeraerts, 2008-08-22 Over the past decade, Cognitive Linguistics has grown to be one of the most broadly appealing and dynamic frameworks for the study of natural language. Essentially, this new school of linguistics focuses on the meaning side of language: linguistic form is analysed as an expression of meaning. And meaning itself is not something that exists in isolation, but it is integrated with the full spectrum of human experience: the fact that we are embodied beings just as much as the fact that we are cultural beings. *Cognitive Linguistics: Basic Readings* brings together twelve foundational articles, each of which introduces one of the basic concepts of Cognitive Linguistics, like conceptual metaphor, image schemas, mental spaces, construction grammar, prototypicality and radial sets. The collection features the founding fathers of Cognitive Linguistics: George Lakoff, Ron Langacker, Len Talmy, Gilles Fauconnier, and Charles Fillmore, together with some of the most influential younger scholars. By its choice of seminal papers and leading authors, *Basic Readings* is specifically suited for an introductory course in Cognitive Linguistics. This is further supported by a general introduction to the theory and, specifically, the practice of Cognitive Linguistics and by trajectories for further reading that start out from the individual chapters.

Pakistan Country Gender Assessment, Volume 1 Asian Development Bank, 2016-12-30 The situation of women in Pakistan has improved over the last 2 decades. Human capital investments resulted in narrowing gender disparities in health and education access, as well as economic and political participation. Still, wide gender gaps remain within the context of persistent poverty and gender-biased cultural norms. This publication gives a broad analysis of the women's situation, describes the institutional efforts made toward closing gender gaps, and identifies enhancements to development programming assistance that could usher in gender equality.

Sensual Relations David Howes, 2010-02-22 With audacious dexterity, David Howes weaves together topics ranging from love and beauty magic in Papua New Guinea to nasal repression in Freudian psychology and from the erasure and recovery of the senses in contemporary ethnography to the specter of the body in Marx. Through this eclectic and penetrating exploration of the relationship between sensory experience and cultural expression, *Sensual Relations* contests the conventional exclusion of sensuality from intellectual inquiry and reclaims sensation as a fundamental domain of social theory. David Howes is Professor of Anthropology, Concordia University, Montreal, Quebec.

Cognitive Linguistic Approaches to Teaching Vocabulary and Phraseology Frank Boers,Seth Lindstromberg,2008 Mastering the vocabulary of a foreign language is one of the most daunting tasks that language learners face. The immensity of the task is underscored by the realisation that it is not only single words but also numerous standardised phrases (idioms, collocations, etc.) that need to be acquired. There is thus a clear need for instructional methods that help learners tackle this task, and yet few proposals for vocabulary instruction have so far gone beyond techniques for rote-learning and familiar means of promoting of noticing. The reason for this is that vocabulary and phraseology have long been assumed arbitrary. The volumeoffers a long-overdue alternative by exploring and exploiting the presence of linguistic 'motivation' - or, systematic non-arbitrariness - in the lexicon. The first half of the volume reports ample empirical evidence of the pedagogical effectiveness of presenting vocabulary to learners as non-arbitrary. The data reported indicate that the proposed instructional methods can benefit when both the nature of the target lexis and the basic cognitive orientations of particular learners are taken into account. The first half of the book mostly targets lexis that has already attracted a fair amount of attention from Cognitive Linguists in the past (e.g. phrasal verbs and figurative idioms). The second half broadens the scope considerably by revealing the non-arbitrariness of diverse other lexical patterns, including collocations and word partnerships generally. This is achieved by recognising some long-neglected dimensions of linguistic motivation - etymological and phonological motivation, in particular. Concrete suggestions are made for putting the non-arbitrary nature of words and phrases to good use in instructed language learning. The volumeis therefore of interest not only to applied linguists and researchers in Second Language Acquisition/Foreign Language Teaching, but also to second and foreign language teaching professionals.
