Betty & Veronica: Prom Princesses Dan Parent,2014-01-07 The prettiest girls, the prettiest dresses, and plenty of fun at the prom--sparks fly as Betty & Veronica work to protect their friendship despite their rivalry over their mutual boyfriend Archie! This graphic novel collection contains all the ingredients of Archie's perennial bestselling comic stories. This fun full-color graphic novel anthology of favorite comic stories captures the magic of the high school prom and celebrates the powerful and constantly-tested friendship between Betty, everybody's favorite girl next door, and Veronica, Riverdale High's richest and classiest student.

Overcoming School Refusal Joanne Garfi,2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Angels and Demons in Art Rosa Giorgi, 2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

Boas and Pythons of the World Mark O'Shea, 2011 Renowned snake expert Mark O'Shea takes readers on an exciting continent-by-continent journey to look at these snakes in their native habitats. Stunning color photographs and intriguing stories from O'Shea's encounters with these snakes in the wild bring these reptiles to life -- from cover.

Timpul Căutărilor: Oameni lângă noi Ambrozie Lucaci, 2021-08-12 *Timpul Căutărilor* este în egală măsură o dramă, o poveste de dragoste, un roman social, un roman polițist și un roman liric. *Timpul Căutărilor* este o dramă despre viețile intersectate a două pesonaje, o fată de șaisprezece ani

și un bărbat de treizeci și cinci de ani. Bărbatul suferă într-o căsnicie nefericită, cu o soție plictisită; fata suferă, de asemenea, în legătură cu școala, cu părinții și cu misterul unui comunicator de pe internet, care participă la o petrecere pivot la ea acasă. Ce se întâmplă cu ei? Timpul Căutărilor explorează cu mare pasiune misterele bogate în trăiri adânci ale relațiilor dintre oameni. Printr-o serie de „lentile”, inclusiv religioase și filozofice, această carte extrem de originală, de eseuri și poezie, țese o narațiune convingătoare pentru a contempla aceste subiecte.

Magnetometry for Archaeologists Arnold Aspinall, Chris Gaffney, Armin Schmidt, 2009

Magnetometry for Archaeologists covers the most widely used method for archaeological surveying. Arnold Aspinall, Chris Gaffney, and Armin Schmidt recount the history of magnetometers from their inception through today's state-of-the-art detectors, explain the physics behind the different types of sensors, and describe the most fruitful ways in which the technology can be employed. They also consider the theoretical and practical uses of magnetometry for many archaeological periods and regions. The reader learns what magnetometry measures, how knowledge gained from it influences the ways in which surveys are undertaken, and the potential problems associated with the use, display, and interpretation of buried remains. Classic Experiments in Psychology Douglas G. Mook, 2004-12-30 The typical survey course in psychology has time for only limited presentation of the research on which our knowledge is based. As a result, many students come away with a limited understanding of the role of experiments in psychological science. Where do experiments come from and how are they conducted? What are the pitfalls and how can we avoid them? What advantages do they have over intuition, authority, and common sense as guides to knowing and acting? What distinguishes research-based psychology from

psychobabble? What have we learned from experimentation in psychology? This book presents, in more depth than textbook treatment permits, the background, conduct, and implications of a selection of classic experiments in psychology. The selection is designed to be diverse, showing that even for research in vastly different areas of study, the logic of research remains the same—as do its traps and pitfalls. This book will broaden and deepen the understanding of experimental methods in psychological research, examining where the research questions come from, how questions can be turned into experiments, and how researchers have faced the problems presented by research in psychology.

A History of Irish Autobiography Liam Harte, 2018-03-01 A History of Irish Autobiography is the first ever critical survey of autobiographical self-representation in Ireland from its recoverable beginnings to the twenty-first century. The book draws on a wealth of original scholarship by leading experts to provide an authoritative examination of autobiographical writing in the English and Irish languages. Beginning with a comprehensive overview of autobiography theory and criticism in Ireland, the History guides the reader through seventeen centuries of Irish achievement in autobiography, a category that incorporates diverse literary forms, from religious tracts and travelogues to letters, diaries, and online journals. This ambitious book is rich in insight. Chapters are structured around key subgenres, themes, texts, and practitioners, each featuring a guide to recommended further reading. The volume's extensive coverage is complemented by a detailed chronology of Irish autobiography from the fifth century to the contemporary era, the first of its kind to be published.

Modernism and Autobiography Maria DiBattista, Emily O. Wittman, 2014-09-15 This is the first book of its kind to address modernist autobiography in a comprehensive manner.

Sensory Circuits Jane Horwood,2009-03-01 This book is a new programme of physical activities that provide regular and controlled input to specific sensory-motor systems enabling children to be energised or calmed so that they can get the most out their day. It provides a practical guide to setting up your own daily Sensory Circuits programme.

Multiculturalism in Higher Education C. Spencer Platt,Adriel A. Hilton,Christopher Newman,Brandi Hinnant-Crawford,2020-03-01 As the educational landscape of America continues to evolve and diversify, college faculty and administrators must be cutting edge in their approaches to create a variety of educational experiences with a greater level of multicultural cognizance. Unlike in previous generations, higher education in the 21st Century is no longer a luxury reserved for the elite and wealthy, but is an increasing necessity for access to labor markets. Community colleges and universities are working hard to respond to the demands of the labor market, by attempting to provide skills for jobs that may not yet exist. Colleges and universities should aim to make all of their students feel welcome and a part of the campus being committed to celebrating differences. Additionally, filling faculty seats with varied races, cultures, perspectives and identities will aid in providing mentors and role models everyone can relate to. These are some of the vital steps toward building a campus community that helps students develop a sense of belonging that allows them to persist and thrive in college. The scholarship in this volume illustrates the state of multicultural education on college and university campuses. The authors bridge foundational knowledge with contemporary understandings; making the work both accessible for novices and beneficial for the authorities on multicultural education. This volume provides thoughtful discourse on issues ranging from the racial and ethnic diversity of the student and faculty bodies, and important topics like disability issues, to different educational contexts such as community colleges, HBCUs and HSI

institutions.

The Origins of the University Stephen C. Ferruolo, 1985-06 The University of Paris is generally regarded as the first true university, the model for others not only in France but throughout Europe, including Oxford and Cambridge. This book challenges two prevailing myths about the university's origins: first, that the university naturally developed to meet the utilitarian and professional needs of European society in the late Middle Ages, and second, that it was the product of the struggle by scholars to gain freedom and autonomy from external authorities, most notably church officials. In the twelfth century, Paris was the educational center of Europe, with a large number of schools and masters attracting and competing for students. Over the decades, the schools of Paris had many critics--monastic reformers, humanists, satirists, and moralists--and the focus of this book is the role such critics played in developing the schools into a university. Ferruolo argues that it was the educational values and ideas promoted by the critics--ideas of the unity of knowledge, the need to share learning freely and willingly, and the higher purposes and social importance of education--that first inspired the scholars of Paris to join together to form a single guild. Their programs for educational reforms can be seen in the first set of statutes promulgated for the nascent University of Paris in 1215.
