Medieval Saints and Modern Screens Alicia Spencer-Hall,2018-01-23 This ground-breaking book brings theoretical perspectives from twenty-first century media, film, and cultural studies to medieval hagiography. *Medieval Saints and Modern Screens* stakes the claim for a provocative new methodological intervention: consideration of hagiography as media. More precisely, hagiography is most productively understood as cinematic media. Medieval mystical episodes are made intelligible to modern audiences through reference to the filmic - the language, form, and lived experience of cinema. Similarly, reference to the realm of the mystical affords a means to express the disconcerting physical and emotional effects of watching cinema. Moreover, cinematic spectatorship affords, at times, a (more or less) secular experience of visionary transcendence: an 'agape-ic encounter'. The medieval saint's visions of God are but one pole of a spectrum of visual experience which extends into our present multi-media moment. We too conjure godly visions: on our smartphones, on the silver screen, and on our TVs and laptops. This book places contemporary pop-culture media - such as blockbuster movie *The Dark Knight*, Kim Kardashian West's social media feeds, and the outputs of online role-players in *Second Life* - in dialogue with a corpus of thirteenth-century Latin biographies, '*Holy Women of Liège*'. In these texts, holy women see God, and see God often. Their experiences fundamentally orient their life, and offer the women new routes to knowledge, agency, and belonging. For the holy visionaries of Liège, as with us modern 'seers', visions are physically intimate, ideologically overloaded spaces. Through theoretically informed close readings, *Medieval Saints and Modern Screens* reveals the interconnection of decidedly 'old' media - medieval textualities - and artefacts of our 'new media' ecology, which all serve as spaces in which altogether human concerns are brought before the contemporary culture's eyes.

Early Earth Systems Hugh R. Rollinson,2009-03-12 *Early Earth Systems* provides a complete history of the Earth from its beginnings to the end of the Archaean. This journey through the Earth's early history begins with the Earth's origin, then examines the evolution of the mantle, the origin of the continental crust, the origin and evolution of the Earth's atmosphere and oceans, and ends with the origin of life. Looks at the evidence for the Earth's very early differentiation into core, mantle, crust, atmosphere and oceans and how this differentiation saw extreme interactions within the Earth system. Discusses Archaean Earth processes within the framework of the Earth System Science paradigm, providing a qualitative assessment of the principal reservoirs and fluxes in the early Earth. "The book would be perfect for a graduate-level or upper level undergraduate course on the early Earth. It will also serve as a great starting point for researchers in solid-Earth geochemistry who want to know more about the Earth's early atmosphere and biosphere, and vice versa for low temperature geochemists who want to get a modern overview of the Earth's interior." *Geological Magazine*, 2008

Changes in the Sheep Industry in the United States National Research Council,Division on Earth and Life Studies,Board on Agriculture and Natural Resources,Committee on the Economic Development and Current Status of the Sheep Industry in the United States,2008-09-26 The U.S. sheep industry is complex, multifaceted, and rooted in history and tradition. The dominant feature of sheep production in the United States, and, thus, the focus of much producer and policy concern, has been the steady decline in sheep and lamb inventories since the mid-1940s. Although often described as an industry in decline, this report concludes that a better description of the current U.S. sheep industry is an industry in transition.

A Manual for Planning and Implementing the Living Standards Measurement Study Survey Margaret E. Grosh, Juan Muñoz, 1996 This manual explains the planning process, technical procedures, and standards used in Living Standard Measurement Study (LSMS) household surveys, including what these procedures entail, why they are used, and how they can be implemented. It provides a factual description of different procedures and standards as well as their purpose and an explanation of their distinctions. The report offers explicit instructions, along with examples of ways LSMS survey procedures have been implemented in different countries. Although the lessons presented here are derived from LSMS surveys, many of them are applicable to surveys in general, and especially to those that are complex or especially concerned with quality control. Topics covered in this manual include technical aspects of questionnaire formatting and testing, methods of implementing sample design, and fieldwork and data management procedures that have been successful. The report sketches ideas about which directions to pursue in analyzing data, presents a brief description of how to assess local statistical capacity, and includes sample work plans and budgets to give surveyors estimates of how long each process will take.

First Language Attrition Monika S. Schmid, Barbara Köpcke, 2013-05-22 This volume consists of a collection of papers that focus on structural/grammatical aspects of the process of first language attrition. It presents an overview of current research, methodological issues and important questions regarding first language attrition. In particular, it addresses the two most prominent issues in current L1 attrition research: Can attrition effects impact on features of core syntax, or are they limited to interface phenomena?, and; What is the role of age at onset (pre-/post-puberty) in this regard? By investigating attrition in a variety of settings, from a case study of a Spanish-speaking adoptee in the US to an empirical investigation of more than 50 long-term attriters of Turkish in the Netherlands, the investigations presented take a new perspective on these issues. Originally published in Language, Interaction and Acquisition - Language, Interaction et Acquisition 2:2 (2011).

Solar Energy Arno Smets,Klaus Jäger,Olindo Isabella,René van Swaaij,Miro Zeman,2016-01-28 This book provides a broad overview on the different aspects of solar energy, with a focus on photovoltaics, which is the technology that allows light energy to be converted into electric energy. Renewable energy sources have become increasingly popular in recent years, and solar is one of the most adaptable and attractive types – from solar farms to support the National Grid to roof panels/tiles used for solar thermal heating systems, and small solar garden lights. Written by Delft University researchers, Solar Energy uniquely covers both the physics of photovoltaic (PV) cells and the design of PV systems for real-life applications, from a concise history of solar cells components and location issues of current systems. The book is designed to make this complicated subject accessible to all, and is packed with fascinating graphs and charts, as well as useful exercises to cement the topics covered in each chapter. Solar Energy outlines the fundamental principles of semiconductor solar cells, as well as PV technology: crystalline silicon solar cells, thin-film cells, PV modules, and third-generation concepts. There is also background on PV systems, from simple stand-alone to complex systems connected to the grid. This is an invaluable reference for physics students, researchers, industrial engineers and designers working in solar energy generation, as well those with a general interest in renewable energy.

The Golden Hoof Winifred Kupper,1945 The sheep industry of the Southwest has involved as much color and picturesque lore as the cattle industry ever did, and over a longer period. By bringing together the discoverable facts into a chronicle at once systematic and lively, Mrs. Kupper has made a real contribution to American history. Her chronicle goes back to the sheepwalks of medieval Spain. An early chapter records the massacre of Coronado's men by Indians who carefully saved the Spanish sheep. Later chapters reproduce the life of the open range. Its characters were men of variegated breeds whose existence was guerrilla warfare, first with the Plains Indians, then with cattlemen, always with blizzard and drought, prairie wolf and prairie fire. This book tells the whole story down to its latterday phases of wool growers' associations and scientific crossbreeding. It is a story dominated from first to last by the lonely and enigmatic figure of the pastor, with or without his trained sheep-dog. Mrs. Kupper, daughter of a sheepman and holder of a degree from the University of Texas, learned the management of flocks in youth under the tutelage of an old-timer whose experience reached well back into the era of the range war, the long drive, and the lobo wolf. This practical background plus later research results in a book engaging to the casual reader and invaluable to the student of history -- Book jacket.
