Overcoming School Refusal Joanne Garfi,2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers •

why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Angels and Demons in Art Rosa Giorgi,2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns,

and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

Vehicle-bridge Interaction Dynamics Yeong-Bin Yang, J. D. Yau, Zhongda Yao, Y. S. Wu, 2004 The commercial operation of the bullet train in 1964 in Japan marked the beginning of a new era for high-speed railways. Because of the huge amount of kinetic energy carried at high speeds, a train may interact significantly with the bridge and even resonate with it under certain circumstances. Equally important is the riding comfort of the train cars, which relates closely to the maneuverability of the train during its passage over the bridge at high speeds. This book is unique in that it is devoted entirely to the interaction between the supporting bridges and moving trains, the so-called vehicle-bridge interaction (VBI). Finite element procedures have been developed to treat interaction problems of various complexities, while the analytical solutions established for some typical problems are helpful for identifying the key parameters involved. Besides, some field tests were conducted to verify the theories established. This book provides an up-to-date coverage of research conducted on various aspects of the VBI problems. Using the series of VBI elements derived, the authors study a number of frontier problems, including the impact response of bridges with elastic bearings, the dynamic response of curved beam to moving centrifugal forces, the stability and derailment of trains moving over bridges shaken by earthquakes, the impact response of two trains crossing on a bridge, the steady-state response of trains moving over elevated bridges, and so on.

Matter in the Universe Ph. Jetzer, Klaus Pretzl, Rudolf von Steiger, 2002-07-31 This volume, the

fourteenth in the Space Sciences Series of ISS/, is dedicated to the matter in the universe, which was the topic of a workshop organized by ISSI from 19 to 22 March 2001 in Bern. The aim of the meeting was to gather active researchers from various fields (cosmology, astrophysics, nuclear and particle physics as well as space science) to assess the exciting new developments in the search for abundant and yet unknown forms of matter in the universe. Due to the importance of the field and the rapid developments which are taking place ISSI decided to organize a workshop on matter in the universe and invited nine convenors, John Ellis, Johannes Geiss, Philippe Jetzer, Heinrich Leutwyler, Klaus Pretzl, Rafael Rebolo, Norbert Straumann, Gustav Andreas Tammann and Rudolf von Steiger, who formulated the aims and goals of the meeting. The workshop was organized such as to have only plenary sessions with typically half hour presentations and ample time for discussions. The last day was devoted to conclusions and future objectives. The knowledge of the amount and nature of matter present in the universe is undoubtedly one of the most relevant topics of today's astrophysics and cosmology.

New Views of the Moon Bradley L. Jolliff, Mark A. Wieczorek, Charles K. Shearer, Clive R. Neal, 2018-12-17 Volume 60 of *Reviews in Mineralogy and Geochemistry* assesses the current state of knowledge of lunar geoscience, given the data sets provided by missions of the 1990's, and lists remaining key questions as well as new ones for future exploration to address. It documents how a planet or moon other than the world on which we live can be studied and understood in light of integrated suites of specific kinds of information. The Moon is the only body other than Earth for which we have material samples of known geologic context for study. This volume seeks to show how the different kinds of information gained about the Moon relate to each other and also to learn from this experience, thus allowing more efficient planning for the exploration of other worlds.

Something Else Than Signs Passionaria Stoicescu, 2016-09-05 Passionaria Stoicescu is a major Romanian poet and writer, author of more than 60 books. Important literary critics have praised the qualities of her work. Here are just a very few excerpts of their writings: Passionaria Stoicescu is obviously a daring

poetess. If one notices the numerous accents that can be found in the passion she offers, in her steadfastness, ardor, amazement, confession, risk, aspiration, mental transformations, infiltrations in the immaculate, a sort of disappointment, interrogation, absolutism of innocence, and consumption of incorruptibility, then she is even more obstinate than any other dialectics of the metamorphoses she burns in without knowing how to pretend. /Ion Caraion/ As once in Miss Amherst's case, or as in our autochthonous environment in Constanța Buzea's case, in *Passionaria* Stoicescu's poetry the erotic feeling includes something bigger: a poetess's feeling. Hence, maybe a certain intellectual tension of the former and a certain sensuality of the latter. /Laurențiu Ulici/ Writing down her own secrets, fears and hopes with that clear and thin thread that can lead to the invisible, being accompanied by that soft melody which is sung by a fiancée's voice, or by that of a tormented mother, tired as that of a wife, the poetess presents herself in what she sings, suffers and offers to life with the naturalness of a permanent simplicity. [...] She will remain the same consistent person to herself, to the formula of a poetry characterized not only by an energetic femininity, but aspiring through the eloquence of her speech, through the profoundness of her poetic thought, to what we call poetry of reflection, perfectly outlined and always of an exemplary feeling of purity. /Radu Cârneli/ *Passionaria* Stoicescu's poetry can exist without any typological principles, residing not only in the feminine-masculine, but also in the modernism-traditionalism or in the innovation-experiment. The author does not feel or continue with the distinctions that are characteristic to her chronological generation, nor does she take into consideration the spatial original concept. This means she ought to be taken over like a priceless trophy. /Aureliu Goci/ An effigy for the coat of arms of our contemporary Romanian poetry,

Passionaria Stoicescu's creation is an emblematic one as far as the significance of the postmodernist lyrics is concerned. As a predestination of a fulfillment in a sign, her poetry surrounds her name with nimbus, the poetess being born out of an ardent passion for all that life can give to us. Fascinating and threatening at the same time, like the vastness of a sea, she embodies the life where the temptation of the swimming goes beyond the risk of a shipwreck in Nothing. Aware of her mission, the author wanders in poetry looking for the 'code' of her freedom to plunge in disillusion, with the entire assuming of her greatness and tragic. As a unique certitude opposed to frivolousness, the word is the divine gift of the saving sacrifice in the dramatic and permanent confronting with her own limits. The author's poetic universe can be defined according to the directions of a new aesthetics, of a lucid and responsible consciousness that takes the daily occurrence into consideration, revealing its dramatic character just in that lack of meaning which is assumed in a self-referential manner. Biography becomes the element which rules the imaginary. However it is emphasized from an abysmal point of view, as a reiteration of certain mythical or Biblical message. According to the same order of the artistic act of consciousness, the poetess assumes Christ's passion in the dissipation of an existence she offers to herself, begging for the body, the Word i.e. the mind, and all this in the name of such a love and detested life which is fulfilled only through poetry. /Antonia Bodea/

The Book of the Moon Rick Stroud, 2009-06-23 On July 20, 1969, in one of the iconic moments of the twentieth century, Neil Armstrong took his first steps on the moon, and the distant object that had fascinated mankind for millennia suddenly got much closer. Rick Stroud has been obsessed with the moon since childhood, and here provides the culmination of that passion--an original and absorbing account of all

things lunar, a book that celebrates the physics that created the moon and the technology that took us there as much as its magic and mystery. Opening with the debatable story of how the moon was formed (scientists still don't agree on this), Stroud then turns to the stories of mankind's fascination with Earth's satellite, delving into the mythology and astrology that have inspired civilizations and cultures the world over, alongside the scientific and medicinal advances that have come from our lunar connection.--From publisher description.
