The Internet Literacy Handbook Betsy Burdick,Chris Coakley,Janice Patricia Richardson,2006-01-01 Over the past decade, Internet technology, now merging into that of mobile technology, has transformed the multiple facets of life in society across the world, changing work and leisure patterns, and placing greater demands on us as active, democratic citizens. The Internet literacy handbook, intended for parents, teachers and young people throughout Europe, is a guide to exploiting to the fullest this complex network of information and communication. The handbook is comprised of 21 fact sheets, each covering a particular topic on Internet use, from searching for information to setting up blogs through to e-shopping and e-citizenship. These fact sheets offer teachers and parents sufficient technical know-how to allow them to share young people's and children's voyages through communication technology. They highlight ethical and safety considerations, give insight into added value in education, provide ideas for constructive activities in class or at home, share best practice in Internet use, and provide a wealth of definitions and links to sites that give practical examples and further in-depth information.

A PRACTICAL COURSE IN EFFECTIVE ENGLISH SPEAKING SKILLS J. K. GANGAL,2012-05-16 A sequel

to the author's well received book *A Practical Course in Spoken English*, this comprehensive yet compact book provides a practical course for enhancing one's English speaking skills. Divided into six parts and 44 chapters, the book in Part I—The Knowledge Paradigm: The What and Why of Effective Speaking—discusses, among others, about phonetics and phonology, the phonemes, and stress and intonation. Part II—The Skill Paradigm A—Public Speaking Skills—covers such areas as using the 4Rs for effective speaking, combating stage fear, using audio-visual aids, and non-verbal communication. Part III—The Skill Paradigm B—Communicating with People—deals with such topics as making effective telephone calls, celebrating teacher's day, expressing gratitude, participating in group discussions, and participating in TV/radio debate. Part IV—Further Strengthening Your Communication Skills—is devoted to a study of rein-forcing the reader's vocabulary through such means as using phrasal verbs, linking words, consulting the Ready Reference Wordbook, and frequently used foreign words and phrases. The final two parts—Part V, The Desire to Achieve: Getting Motivated, and Part VI, Effective English Speaking Skills in Action—provide the meaning and techniques of self-motivation, evaluating daily progress, besides giving some memorable speeches delivered by great speakers like Pandit Jawaharlal Nehru, US Presidents Kennedy and Lincoln, and the civil rights activist, Martin Luther King. The book, written in an accessible and student-friendly manner, is meant for anyone who possesses a fair amount of English speaking skills but wishes to further enhance those skills. Undergraduate students of different disciplines and even plus two students should find the book quite useful and interesting. As acquiring communication skills is a must in today's extremely competitive world, this book would do wonders to the student as well as the lay reader.

Text, Extratext, Metatext and Paratext in Translation Valerie Pellatt, 2014-01-08 This volume brings together research on a variety of paratextual and peritextual elements of translation of German, Chinese and Czech source texts. The explication seen as necessary to translated texts is a part of this growing field, as researchers investigate the influence of writing which purports to help the reader's understanding of a text. The articles included here demonstrate the impact of paratextual and peritextual elements on the way a text is produced and received. Publishers, both consciously and unconsciously, may manipulate the presentation of a text to appeal to a certain readership, while writers of prefatorial, explanatory and critical material base their paratextual interpretation on their own perceptions and political leanings. The articles in the volume focus on significant literary texts, by writers such as Christa Wolf and Mao Zedong. Regional novels of Taiwan, modern and traditional poetry, and children's stories are not exempt from the power of paratext, and some genres, such as the literary mystification texts published in the Czech Republic, are purposefully designed to mislead the reader. The articles in the volume help to dispel the notion that translation and the paratext which surrounds it, and of which it is a part, are innocent.

Profiling Machines Greg Elmer, 2003-12-23 The cultural and media studies perspectives on the technology of electronic consumer profiling. In this book Greg Elmer brings the perspectives of cultural and media studies to the subject of consumer profiling and feedback technology in the digital economy. He examines the multiplicity of processes that monitor consumers and automatically collect, store, and cross-reference personal information. When we buy a book at Amazon.com or a kayak from L.L. Bean, our transactions are recorded, stored, and deployed to forecast our future behavior—thus we may receive solicitations to buy another book by the same author or the latest in kayaking gear. Elmer charts this process, explaining the technologies that make it possible and examining the social and political implications. Elmer begins by establishing a theoretical framework for his discussion, proposing a diagrammatic approach that draws on but questions Foucault's theory of surveillance. In the second part of the book, he presents the historical background of the technology of consumer profiling, including such pre-electronic tools as the census and the warranty card, and describes the software and technology in use today for demographic mapping. In the third part, he looks at two case studies—a marketing event sponsored by Molson that was held in the

Canadian Arctic (contrasting the attendees and the indigenous inhabitants) and the use of cookies to collect personal information on the World Wide Web, which (along with other similar technologies) automate the process of information collection and cross-referencing. Elmer concludes by considering the politics of profiling, arguing that we must begin to question our everyday electronic routines.

New Directions in Human Information Behavior Amanda Spink, Charles Cole, 2006-01-31 New Directions in Human Information Behavior, co-edited by Drs. Amanda Spink and Charles Cole provides an understanding of the new directions, leading edge theories and models in human information behavior. Information behavior is conceptualized as complex human information related processes that are embedded within an individual's everyday social and life processes. The book presents chapters by an interdisciplinary range of scholars who show new directions that often challenge the established views and paradigms of information behavior studies. Beginning with an evolutionary framework, the book examines information behaviors over various epochs of human existence from the Palaeolithic Era and within pre-literate societies, to contemporary behaviors by 21st century humans. Drawing upon social and psychological science theories the book presents a more integrated and holistic approach to the understanding of information behaviors that include multitasking and non-linear longitudinal processes, individuals' information ground, information practices and information sharing, digital behaviors and human information organizing behaviors. The final chapter of the book integrates these new approaches and presents an overview of the key trends, theories and models for further research. This book is directly relevant to information scientists, librarians, social and evolutionary psychologists. Undergraduate and graduate students, academics and information professionals interested in human information behavior will find this book of particular benefit.

Electronic Commerce 2018 Efraim Turban,Jon Outland,David King,Jae Kyu Lee,Ting-Peng Liang,Deborah C. Turban,2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

Angels and Demons in Art Rosa Giorgi,2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to

Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

Public Integrity J. Patrick Dobel, 2002-01-01 In this groundbreaking book, J. Patrick Dobel describes and analyzes the elements that constitute integrity in public office. Drawing on case studies, memoirs, interviews, and fiction (e.g., John Le Carré), Dobel addresses such issues as when to resign and when to stay in office. He examines the temptations of power, the relation between private and public life, and the role of honor and prudence in making personal decisions. He applies not only moral theory but also the insights of history, organizational theory, and psychology. Unlike most political ethics books, *Public Integrity* puts personal responsibility at the center of public morality, examining not just the responsibilities of office but also the role of personal moral commitments and promises. This timely book reminds us of the importance of public integrity as well as the demands and challenges that often threaten that integrity, especially in a liberal democracy such as the United States.
