Topical Communication Uncertainties Stefan Vladutescu, Florentin Smarandache, Daniela Gifu, Alina Tenescu, 2014 Communication is the main way of defusing uncertainties. Unfortunately, communication discipline itself is mined by uncertainties. We can talk about onto-epistemological uncertainties and pragmatic uncertainties of communication, about theoretical and practical uncertainties, and about primary and secondary uncertainties of communication. Uncertainties regarding the object of communication as autonomous discipline, the research methods of communication, the sources, paradigms and models of communication represent theoretical, onto-epistemological uncertainties. Pragmatic uncertainties include uncertainties in communication processes; they have a practical character. Pragmatic uncertainties are those that lead to communication failure and they consist in minor obstacles or insurmountable barriers in concrete communication. (Florentin Smarandache & Stefan Vladutescu) *** The book has 16 chapters written by the following authors and co-authors from USA, England, Poland, Slovakia, and Romania: Florentin Smarandache, Stefan Vladutescu, Mirela Teodorescu, Dan S. Stoica, Daniela Gifu, Calin Andrei, Ioan Constantin Dima, Mariana Man, Janusz Grabara, Paula Bajdor, Jim O'Brien, Andrzej Rabsztyń, Anabella-Maria Tarnovan, Adrian Nicolescu, Alina Tenescu, Nicusor Minculete, Vladimir Modrak, Sorin Mihai Radu, Alice Ionescu, Anca Diana Bibiri, Lucian Sacalean, Mircea Munteanu, Roxana Criu, Bogdan Constantin Neculau, Marin Dramnescu, Mihaela Gabriela Paun, and Loredana Speriatu.

First Language Attrition Monika S. Schmid, Barbara Köpke, 2013-05-22 This volume consists of a collection of papers that focus on structural/grammatical aspects of the process of first language attrition. It presents an overview of current research, methodological issues and important questions regarding first language attrition. In particular, it addresses the two most prominent issues in current L1 attrition research: Can attrition effects impact on features of core syntax, or are they limited to interface phenomena?, and; What is the role of age at onset (pre-/post-puberty) in this regard? By investigating attrition in a variety of settings, from a case study of a Spanish-speaking adoptee in the US to an empirical investigation of more than 50 long-term attriters of Turkish in the Netherlands, the investigations presented take a new perspective on these issues. The Florida Manatee Roger L. Reep, Robert K., 2021-04-14 From two scientists who have been at the forefront of manatee research for over three decades, *The Florida Manatee* offers an engaging, accessible introduction to manatee biology, including communication, diet, long-distance migration, and much more. This second edition is updated with new scientific research, as well as discussions of recent conservation efforts—largely driven by manatee injuries and deaths resulting from boat collisions—that have contributed to the robust growth of manatee numbers in Florida. It also includes the latest predictions for manatee populations and health in the future, both in Florida and worldwide. This is the perfect book for anyone seeking the most comprehensive, current information on this fascinating marine mammal.

Names and Naming Oliviu Felecan, Alina Bugheșiu, 2021-08-19 This edited book examines names and naming policies, trends and practices in a variety of multicultural contexts across America, Europe, Africa and Asia. In the first part of the book, the authors take theoretical and practical approaches to the study of names and naming in these settings, exploring legal, societal, political and other factors. In the second part of the book, the authors explore ways in which names mirror and contribute to the construction of identity in areas defined by multiculturalism. The book takes an interdisciplinary approach to onomastics, and it will be of interest to scholars working across a number of fields, including linguistics, sociology,

anthropology, politics, geography, history, religion and cultural studies.

Recovery of Gray Wolves in the Great Lakes Region of the United States Adrian P. Wydeven, Timothy R. van Deelen, Edward Heske, 2009-02-27 In this book, we document and evaluate the recovery of gray wolves (*Canis lupus*) in the Great Lakes region of the United States. The Great Lakes region is unique in that it was the only portion of the lower 48 states where wolves were never completely extirpated. This region also contains the area where many of the first modern concepts of wolf conservation and research were developed. Early proponents of wolf conservation such as Aldo Leopold, Sigurd Olson, and Durward Allen lived and worked in the region. The longest ongoing research on wolf-prey relations (see Vucetich and Peterson, Chap. 3) and the first use of radio telemetry for studying wolves (see Mech, Chap. 2) occurred in the Great Lakes region. The Great Lakes region is the first place in the United States where "Endangered" wolf populations recovered. All three states (Minnesota, Wisconsin, and Michigan) developed ecologically and socially sound wolf conservation plans, and the federal government delisted the population of wolves in these states from the United States list of endangered and threatened species on March 12, 2007 (see Refsnider, Chap. 21). Wolf management reverted to the individual states at that time. Although this delisting has since been challenged, we believe that biological recovery of wolves has occurred and anticipate the delisting will be restored. This will be the first case of wolf conservation reverting from the federal government to the state conservation agencies in the United States.

Holocaust Representation Berel Lang, 2003-05-01 Since Theodor Adorno's attack on the writing of poetry after Auschwitz, artists and theorists have faced the problem of reconciling the moral enormity of the Nazi genocide with the artist's search for creative freedom. In *Holocaust Representation*, Berel Lang addresses the relation between ethics and art in the context of contemporary discussions of the Holocaust. Are certain aesthetic means or genres out of bounds for the Holocaust? To what extent should artists be constrained by the actuality of history—and is the Holocaust unique in raising these problems of representation? The dynamics between artistic form and content generally hold even more intensely, Lang argues, when art's subject has the moral weight of an event like the Holocaust. As authors reach beyond the standard conventions for more adequate means of representation, Holocaust writings frequently display a blurring of genres. The same impulse manifests itself in repeated claims of historical as well as artistic authenticity. Informing Lang's discussion are the recent conflicts about the truth-status of Benjamin Wilkomirski's memoir *Fragments* and the comic fantasy of Roberto Benigni's film *Life Is Beautiful*. Lang views Holocaust representation as limited by a combination of ethical and historical constraints. As art that violates such constraints often lapses into sentimentality or melodrama, cliché or kitsch, this becomes all the more objectionable when its subject is moral enormity. At an extreme, all Holocaust representation must face the test of whether its referent would not be more authentically expressed by silence—that is, by the absence of representation.

Farm Prices Willard W. Cochrane, 1958-01-01 *Farm Prices* was first published in 1958. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. Few domestic questions are so controversial as the farm problem, yet the average city man finds it difficult to understand the basic issues involved. In this book Professor Cochrane describes for the layman the nature and causes of the commercial farm problem and the rural poverty problem and provides the basis for making informed judgments about these problems and their possible solutions. He analyzes the economic and political forces which are at work in the farm economy, explains the organization of modern agriculture, showing the unique structure of farming, and draws a vivid picture of the revolutionary developments which have taken place in agriculture. He discusses behavior patterns of farmers and consumers as they

relate to the farm economy, and the role of government in the farm industry and in the lives of farmers. Farm prices are constantly fluctuating, and out of this price variability emerge such serious and continuing farm problems as variable incomes, low incomes over extended periods, and uncertainty in production planning. In this study Professor Cochrane seeks to get at the root of the trouble by, first, exploring and exposing what he considers a basic fallacy in our present day thinking and approach to the farm problem. This is the widely held myth of an automatically adjusting agriculture, an agriculture that is always out of balance because of an emergency. This myth, he points out, beclouds the issues involved in the whole farm problem. The farm price myth splits two ways in the public mind, Mr. Cochrane explains, but these divergent attitudes represent differences only in mechanics, not in principle, and they are equally effective in obscuring the real picture. One segment of the public believes that agriculture, if left alone for a while, would gravitate toward and stabilize at some desirable level and pattern of prices, production, and incomes. The other segment believes that the same result would occur if agriculture were given a temporary, helping hand by the government. Mr. Cochrane shows the fallacies inherent in both of these convictions by presenting an integrated, overall picture of farm price behavior as it really exists. On a basis of this realistic view, he presents the two alternatives or hard policy choices that he believes the American farmer faces today. Willard W. Cochrane is Professor Emeritus of Agricultural and Applied Economics at the University of Minnesota. He is the author of a number of books, including *The City Man's Guide to the Farm Problem* and *Farm Prices: Myth and Reality*. He previously served as an economist with the Food and Agriculture Organization of the United Nations and with the U.S. Department of Agriculture. He is the co-author of *Economics of American Agriculture* and *Economics of Consumption*.

Reconsidering Informality Karen Tranberg Hansen, Mariken Vaa, 2004 This book brings together two bodies of research on urban Africa that have tended to be separate, studies of urban land use and housing and studies of work and livelihoods. Africa's future will be increasingly urban, and the inherited legal, institutional and financial arrangements for managing urban development are inadequate. Access to employment, shelter and services is precarious for most urban residents. The result is the phenomenal growth of the informal city. Extra-legal housing and unregistered economic activities proliferate and basic urban services are increasingly provided informally. Recent decades of neo-liberal political and economic reforms have increased social inequality across urban space. After an introductory chapter by the editors, the contributions are grouped into the following sections: - LOCALITY, PLACE, AND SPACE - ECONOMY, WORK, AND LIVELIHOODS - LAND, HOUSING, AND PLANNING The case studies are drawn from a diverse set of cities on the African continent. A central theme is how practices that from an official standpoint are illegal or extra-legal do not only work but are considered legitimate by the actors concerned. Another is how the informal city is not exclusively the domain of the poor, but also provides shelter and livelihoods for better-off segments of the urban population.

Analytical Chemistry for Technicians John Kenkel, 2002-10-29 Surpassing its bestselling predecessors, this thoroughly updated third edition is designed to be a powerful training tool for entry-level chemistry technicians. *Analytical Chemistry for Technicians, Third Edition* explains analytical chemistry and instrumental analysis principles and how to apply them in the real world. A unique feature of this edition is that it brings the workplace of the chemical technician into the classroom. With over 50 workplace scene sidebars, it offers stories and photographs of technicians and chemists working with the equipment or performing the techniques discussed in the text. It includes a supplemental CD that enhances training activities. The author incorporates knowledge gained from a number of American Chemical Society and PITTCON short courses and from personal visits to several laboratories at major chemical plants, where he determined firsthand what is important in the modern analytical laboratory. The

book includes more than sixty experiments specifically relevant to the laboratory technician, along with a Questions and Problems section in each chapter. Analytical Chemistry for Technicians, Third Edition continues to offer the nuts and bolts of analytical chemistry while focusing on the practical aspects of training.

Uncertain Transition Michael Burawoy, 2000-01-01 The ethnographies collected here offer a surprising and compelling picture of change in Russia and Eastern Europe found in no other book to date. The collection brings together a wide-ranging group of authors from sociology, anthropology, and political science to reveal the complex relationships that still exist between the former socialist world and the world today.

Wood Modification in Europe Dennis Jones, Dick Sandberg, Giacomo Goli, Luigi Todaro, 2019-01-01 This report is a result of a questionnaire and subsequent collation of data, which outlines the current status of wood modification across Europe in terms of national inventories and groups that have reported current activity in the respective research areas covered in this report.
