Overcoming School Refusal Joanne Garfi,2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Angels and Demons in Art Rosa Giorgi,2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

A History of Irish Autobiography Liam Harte,2018-03-01 A History of Irish Autobiography is the first ever critical survey of autobiographical self-representation in Ireland from its recoverable beginnings to the twenty-first century. The book draws on a wealth of original scholarship by leading experts to provide an authoritative examination of autobiographical writing in the English and Irish languages. Beginning with a comprehensive overview of autobiography theory and criticism in Ireland, the History guides the reader through seventeen centuries of Irish achievement in autobiography, a category that incorporates diverse literary forms, from religious tracts and travelogues to letters, diaries, and online journals. This ambitious book is rich in insight. Chapters are structured around key subgenres, themes, texts, and practitioners, each featuring a guide to recommended further reading. The volume's extensive coverage is complemented by a detailed chronology of Irish autobiography from the fifth century to the contemporary era, the first of its kind to be published.

Classic Experiments in Psychology Douglas G. Mook,2004-12-30 The typical survey course in psychology has time for only limited presentation of the research on which our knowledge is based. As a result, many students come away with a limited understanding of the role of experiments in psychological science. Where do experiments come from and how are they conducted? What are the pitfalls and how can we avoid them? What advantages do they have over intuition, authority, and common sense as guides to knowing and acting? What distinguishes research-based psychology from psychobabble? What have we learned from experimentation in psychology? This book presents, in more depth than textbook treatment permits, the background, conduct, and implications of a selection of classic experiments in psychology. The selection is designed to be diverse, showing that even for research in vastly different areas of study, the logic of research remains the same—as do its traps and pitfalls. This book will broaden and deepen the understanding of experimental methods in psychological research, examining where the research questions come from, how questions can be turned into experiments, and how researchers have faced the problems presented by research in psychology.

The Origins of the University Stephen C. Ferruolo,1985-06 The University of Paris is generally regarded as the first true university, the model for others not only in France but throughout Europe, including Oxford and Cambridge. This book challenges two prevailing myths about the university's origins: first, that the university naturally developed to meet the utilitarian and professional needs of European society in the late Middle Ages, and second, that it was the product of the struggle by scholars to gain freedom and autonomy from external authorities, most notably church officials. In the twelfth century, Paris was the educational center of Europe, with a large number of schools and masters attracting and competing for students. Over the decades, the schools of Paris had many critics--monastic reformers, humanists, satirists, and moralists--and the focus of this book is the role such critics played in developing the schools into a university. Ferruolo argues that it was the educational values and ideas promoted by the critics--ideas of the unity of knowledge, the need to share learning freely and willingly, and the higher purposes and social importance of education--that first inspired the scholars of Paris to join together to form a single guild. Their programs for educational reforms can be seen in the first set of statues promulgated for the nascent University of Paris in 1215.

Artistic Research Annette W. Balkema,Henk Slager,2004 Advanced art education is in the process of developing research programs throughout Europe. What is the relation to the scientific methods of alpha, beta or gamma sciences, directed toward knowledge production and the development of a certain scientific

domaine? What will be the influence of scientific research on the art forms?

Furta Sacra Patrick J. Geary,2011-06-27 To obtain sacred relics, medieval monks plundered tombs, avaricious merchants raided churches, and relic-mongers scoured the Roman catacombs. In a revised edition of Furta Sacra, Patrick Geary considers the social and cultural context for these acts, asking how the relics were perceived and why the thefts met with the approval of medieval Christians.

Along the Enchanted Way William Blacker,2010-10-28 Chosen for the Duchess of Cornwall's online book club The Reading Room by HRH The Prince of Wales When William Blacker first crossed the snow-bound passes of northern Romania, he stumbled upon an almost medieval world. There, for many years he lived side by side with the country people, a life ruled by the slow cycle of the seasons, far away from the frantic rush of the modern world. In spring as the pear trees blossomed he ploughed with horses, in summer he scythed the hay meadows and in the freezing winters gathered wood by sleigh from the forest. From sheepfolds harried by wolves, to courting expeditions in the snow, he experienced the traditional way of life to the full, and became accepted into a community who treated him as one of their own. But Blacker was also intrigued by the Gypsies, those dark, foot-loose strangers of spell-binding allure who he saw passing through the village. Locals warned him to stay clear but he fell in love and there followed a bitter struggle. Change is now coming to rural Romania, and William Blacker's adventures will soon be part of its history. From his early carefree days tramping the hills of Transylvania, to the book's poignant ending, Along the Enchanted Way transports us back to a magical country world most of us thought had vanished long ago.

Universities, Academics and the Great Schism R. N. Swanson,1979-05-03 The election of both Urban VI and Clement VII to the papacy in 1378, by the same body of cardinals, presented the church with an apparently insoluble constitutional difficulty. Dr Swanson examines the reaction to this situation from a hitherto unconsidered perspective: that of the universities to whom Europe turned to formulate the theories which would solve the problem. He examines the attempts by the academics to gain support for their various schemes and shows how these produced conflict at various levels: locally, between factions within individual universities; nationally, between rival universities, and between universities and their ecclesiastical and secular superiors; and internationally, as the universities adopted mutually exclusive attitudes and sometimnes clashed with their own popes. The concluding chapters show how the academics finally devised the conciliarist formula which led to the convocation of the Council of Pisa in 1409.
