**Betty & Veronica: Prom Princesses** Dan Parent,2014-01-07 The prettiest girls, the prettiest dresses, and plenty of fun at the prom-- sparks fly as Betty & Veronica work to protect their friendship despite their rivalry over their mutual boyfriend Archie! This graphic novel collection contains all the ingredients of Archie's perennial bestselling comic stories. This fun full-color graphic novel anthology of favorite comic stories captures the magic of the high school prom and celebrates the powerful and constantly-tested friendship between Betty, everybody's favorite girl next door, and Veronica, Riverdale High's richest and classiest student.

**The European Commission of the Danube, 1856-1948** Constantin Ardeleanu,2020-02-25 The history of the world's second international organisation, an innovative techno-political institution established by Europe's Concert of Powers to remove insecurity from the Lower Danube.

**Speculators and Slaves** Michael Tadman,1996 Drawing heavily on primary sources, Tadman (economic and social history, U. of Liverpool) reconstructs the scale and organization of the interregional slave trade, and interprets the significance of slave sales and forced family separations for the values and cultures of masters and slaves. He suggests not a smooth process of accommodation, but a situation of essentially conflicting worlds. Annotation copyrighted by Book News, Inc., Portland, OR

*The Romanian Revolution of December 1989* Peter Siani-Davies,2007 The Romanian Revolution of 1989 was the most spectacularly violent and remains today the most controversial of all the East European upheavals of that year. Despite (or perhaps because of) the media attention the revolution received, it remains shrouded

in mystery. How did the seemingly impregnable Ceausescu regime come to be toppled so swiftly and how did Ion Iliescu and the National Salvation Front come to power? Was it by coup d'état? Who were the mysterious terrorists who wreaked such havoc on the streets of Bucharest and the other major cities of Romania? Were they members of the notorious securitate? What was the role of the Soviet Union? Blending narrative with analysis, Peter Siani-Davies seeks to answer these and other questions while placing the events and their immediate aftermath within a wider context. Based on fieldwork conducted in Romania and drawing heavily on Romanian sources, including television and radio transcripts, official documents, newspaper reports, and interviews, this book is the most thorough study of the Romanian Revolution that has appeared in English or any other major European language. Recognizing that a definitive history of these events may be impossible, Siani-Davies focuses on the ways in which participants interpreted the events according to particular scripts and myths of revolution rooted in the Romanian historical experience. In the process the author sheds light on the ways in which history and the conflicting retellings of the 1989 events are put to political use in the transitional societies of Eastern Europe.

Overcoming School Refusal Joanne Garfi, 2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school

life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book.

Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

**Environmental Hazards** Keith Smith, 2001 Topics include : risk assessment, disaster management, adjustment to the hazard (accepting, sharing, reducing loss), earthquakes, volcanoes, landslides, snow avalanches, storms, biophysical hazards (extreme temperatures, epidemics, frost, wildfires), floods, droughts, technological hazards (i.e. Bhopal and Chernobyl), etc.

The Story of Inventions Shobhit Mahajan, 2013 The Story of Inventions provides concise and reliable information on key cultural and historical topics. Highlights: Chronological presentation of the most important themes More than 150 illustrations with detailed explanations Supplementary cards on special related themes and the history of the events Time lines, illustrations, and maps Index of subjects and names

**Public Integrity** J. Patrick Dobel, 2002-01-01 In this groundbreaking book, J. Patrick Dobel describes and analyzes the

elements that constitute integrity in public office. Drawing on case studies, memoirs, interviews, and fiction (e.g., John Le Carré), Dobel addresses such issues as when to resign and when to stay in office. He examines the temptations of power, the relation between private and public life, and the role of honor and prudence in making personal decisions. He applies not only moral theory but also the insights of history, organizational theory, and psychology. Unlike most political ethics books, *Public Integrity* puts personal responsibility at the center of public morality, examining not just the responsibilities of office but also the role of personal moral commitments and promises. This timely book reminds us of the importance of public integrity as well as the demands and challenges that often threaten that integrity, especially in a liberal democracy such as the United States.

**3D QSAR in Drug Design** Hugo Kubinyi, Gerd Folkers, Yvonne C. Martin, 2006-04-11 Significant progress has been made in the study of three-dimensional quantitative structure-activity relationships (3D QSAR) since the first publication by Richard Cramer in 1988 and the first volume in the series. *3D QSAR in Drug Design. Theory, Methods and Applications*, published in 1993. The aim of that early book was to contribute to the understanding and the further application of CoMFA and related approaches and to facilitate the appropriate use of these methods. Since then, hundreds of papers have appeared using the quickly developing techniques of both 3D QSAR and computational sciences to study a broad variety of biological problems. Again the editor(s) felt that the time had come to solicit reviews on published and new viewpoints to document the state of the art of 3D QSAR in its broadest definition and to provide visions of where new techniques will emerge or new applications may be found. The intention is not only to highlight new ideas but also to show the shortcomings,

inaccuracies, and abuses of the methods. We hope this book will enable others to separate trivial from visionary approaches and me-too methodology from innovative techniques. These concerns guided our choice of contributors. To our delight, our call for papers elicited a great many manuscripts.

**Gender Inequality** Judith Lorber, 2001

**Multiculturalism in Higher Education** C. Spencer Platt, Adriel A. Hilton, Christopher Newman, Brandi Hinnant-Crawford, 2020-03-01 As the educational landscape of America continues to evolve and diversify, college faculty and administrators must be cutting edge in their approaches to create a variety of educational experiences with a greater level of multicultural cognizance. Unlike in previous generations, higher education in the 21st Century is no longer a luxury reserved for the elite and wealthy, but is an increasing necessity for access to labor markets. Community colleges and universities are working hard to respond to the demands of the labor market, by attempting to provide skills for jobs that may not yet exist. Colleges and universities should aim to make all of their students feel welcome and a part of the campus being committed to celebrating differences. Additionally, filling faculty seats with varied races, cultures, perspectives and identities will aid in providing mentors and role models everyone can relate to. These are some of the vital steps toward building a campus community that helps students develop a sense of belonging that allows them to persist and thrive in college. The scholarship in this volume illustrates the state of multicultural education on college and university campuses. The authors bridge foundational knowledge with contemporary understandings; making the work both accessible for novices and beneficial for the authorities on multicultural education. This volume provides thoughtful discourse

on issues ranging from the racial and ethnic diversity of the student and faculty bodies, and important topics like disability issues, to different educational contexts such as community colleges, HBCUs and HSI institutions.

*Learning to Program with Alice* Wanda Dann, Stephen Cooper, Randy Pausch, 2008 Alice was designed to make programming concepts easier to teach and learn. In the Second Edition of *Learning to Program with Alice*, Alice's creators offer a complete full-color introduction to the interactive Alice 2.2 programming environment. The authors make extensive use of program visualization to establish an easy, intuitive relationship between program constructs and the 3D graphics animation action in Alice. Students discover how Alice blends traditional problem-solving techniques with Hollywood-style storyboarding. Fundamental object-oriented programming concepts and language syntax are taught independently. Programming concepts can be taught from either an objects-first or an objects-early approach, with an optional early introduction to events. The book's Java-like syntax allows students to view their program code, simplifying their transitions to Java, C++, C#, or other object-oriented languages.
