Names and Naming Oliviu Felecan, Alina Bugheșiu, 2021-08-19 This edited book examines names and naming policies, trends and practices in a variety of multicultural contexts across America, Europe, Africa and Asia. In the first part of the book, the authors take theoretical and practical approaches to the study of names and naming in these settings, exploring legal, societal, political and other factors. In the second part of the book, the authors explore ways in which names mirror and contribute to the construction of identity in areas defined by multiculturalism. The book takes an interdisciplinary approach to onomastics, and it will be of interest to scholars working across a number of fields, including linguistics, sociology, anthropology, politics, geography, history, religion and cultural studies.

Europe 2030 Daniel Benjamin, 2010-04-01 The European Union is the most successful supranational organization in history. It has reconciled former enemies, established a single market and a common currency, and reintegrated Central and Eastern Europe into the West. Yet the EU remains unsatisfying to its members and its partners. An economic giant but a political pygmy, it seems hamstrung by bureaucracy and a lack of connection to European publics. In Europe 2030, distinguished authors predict what the European Union will look like twenty years from now. A range of views is presented, foreseeing everything from slower growth and diminished power to actions that would make the EU a more vigorous, influential world player. Contributors include Oksana Antonenko (International Institute for Strategic Studies), José Manuel Durão Barroso (European Commission), José Cutileiro (former secretary general, Western European Union), Joschka Fischer (former minister of foreign affairs, Germany), Charles Grant (Center for European Reform), Andrew Hilton (Centre for the Study of Financial Innovation), Jonathan Laurence (German Marshall Fund, Boston College and Brookings Institution), Rui Chancelle de Machete (constitutional and administrative attorney), Hubert Védrine (former minister of foreign affairs, France), and Joseph H.H. Weiler (New York University).

Overcoming School Refusal Joanne Garfi, 2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

A Dictionary of European Anglicisms Manfred Górlach, 2005-06-16 A Dictionary of European Anglicisms documents the spread of English in Europe. It provides the first exhaustive and up-to-date account of British and American English words that have been imported into the main languages of Europe. English, which imported thousands of words from French and Latin (mainly after 1066), is now by far the world's biggest lexical exporter, and the trade is growing as English continues to dominate various fields ranging from pop music to electronic communication. Several countries have monitored the inflow of anglicisms and some have tried to block it. But language, as lexicographers have always found and as this book demonstrates once more, respects neither boundary nor law. The dictionary not only shows which words have been exported where, but how the process of importation can change a word's form and function, sometimes subtly, at others remarkably as in the transformation of painkiller to Bulgarian 'jack of all trades'. The book provides a systematic description of the lexical input of English into Icelandic, Norwegian, Dutch, German, Russian, Polish, Croatian, Bulgarian, French, Spanish, Italian, Romanian, Finnish, Hungarian, Albanian, and Greek. Each entry has a brief definition of the loan word, followed by information on its history and distribution; variations in its spelling, meaning, and pronunciation; its route of transmission if not direct from English; its degree of acceptance and usage restrictions; and its native equivalents and derivatives. Grids showing distribution patterns across Europe accompany many of the entries. The

Dictionary of European Anglicisms is a scholarly tour de force [French: imported early nineteenth century] and the result of a prodigious research effort across Europe masterminded and directed by Manfred Gorlach. It is a unique resource for comparative analysis and the study of linguistic variation and change. It will fascinate linguists and word-watchers of all persuasions.

The Discourse of Advertising Guy Cook, 2001 This second edition considers advertising in the context of current changes in communication. All chapters have been fully revised and updated, and substantial new material has been added. The social functions and aesthetic effects of advertisements are comprehensively analysed across a wide range of media, from billboards to email and the Internet. Controversially, advertisements are contrasted and compared with literary texts throughout. The book clearly explains relevant concepts from semiotics, poetics, and linguistics, and can serve as an introduction to all of these disciplines. Practical exercises to stimulate further discussion are included at the end of each chapter.

Physiology of Cotton James McD. Stewart, Derrick Oosterhuis, James J. Heitholt, Jack R. Mauney, 2009-11-04 Cotton production today is not to be undertaken frivolously if one expects to profit by its production. If cotton production is to be sustainable and produced profitably, it is essential to be knowledgeable about the growth and development of the cotton plant and in the adaptation of cultivars to the region as well as the technology available. In addition, those individuals involved in growing cotton should be familiar with the use of management aids to know the most profitable time to irrigate, apply plant growth regulators, herbicides, foliar fertilizers, insecticides, defoliants, etc. The chapters in this book were assembled to provide those dealing with the production of cotton with the basic knowledge of the physiology of the plant required to manage the cotton crop in a profitable manner.

Narrative Factuality Monika Fludernik, Marie-Laure Ryan, 2019-12-16 The study of narrative—the object of the rapidly growing discipline of narratology—has been traditionally concerned with the fictional narratives of literature, such as novels or short stories. But narrative is a transdisciplinary and transmedial concept whose manifestations encompass both the fictional and the factual. In this volume, which provides a companion piece to Tobias Klauk and Tilmann Köppe's *Fiktionalität: Ein interdisziplinäres Handbuch*, the use of narrative to convey true and reliable information is systematically explored across media, cultures and disciplines, as well as in its narratological, stylistic, philosophical, and rhetorical dimensions. At a time when the notion of truth has come under attack, it is imperative to reaffirm the commitment to facts of certain types of narrative, and to examine critically the foundations of this commitment. But because it takes a background for a figure to emerge clearly, this book will also explore nonfactual types of narratives, thereby providing insights into the nature of narrative fiction that could not be reached from the narrowly literary perspective of early narratology.

Encountering the Other(s) Gisela Brinker-Gabler, 1995-01-01 Europe and the United States now confront many of the same unresolved issues of nationalist, religious, racial, and ethnic intolerance. The book addresses the question: How can the humanistic disciplines and social sciences play a role in a political transformation or address cultural difference? This difference, the other, may be a racial, ethnic, gendered, religious, or colonial Other. Contributors to this book focus on the serious political questions posed by the problems of strangeness, the other, in the present climate of accelerating social change and global shifts in political power.

Handbook of Narrative Analysis Luc Herman, Bart Vervaeck, 2019-12 Stories are everywhere, from fiction across media to politics and personal identity. Handbook of Narrative Analysis sorts out both traditional and recent narrative theories, providing the necessary skills to interpret any story. In addition to discussing classical theorists, such as Gérard Genette, Mieke Bal, and Seymour Chatman, Handbook of Narrative Analysis presents precursors (such as E. M. Forster), related theorists (Franz Stanzel, Dorrit Cohn), and a large variety of postclassical critics. Among the latter particular attention is paid to rhetorical, cognitive, and cultural approaches; intermediality; storyworlds; gender theory; and natural and unnatural narratology. Not content to consider theory as an end in itself, Luc Herman and Bart Vervaeck use two short stories and a graphic narrative by contemporary authors as touchstones to illustrate each approach to narrative. In doing so they illuminate the practical implications of theoretical preferences and the ideological leanings underlying them. Marginal glosses guide the reader through discussions of theoretical issues, and an extensive bibliography points readers to the most current publications in the field. Written in an accessible style, this handbook combines a comprehensive treatment of its subject with a user-friendly format appropriate for specialists and nonspecialists alike. Handbook of Narrative Analysis is the go-to book for understanding and interpreting narrative. This new edition revises and extends the first edition to describe and apply the last fifteen years of cutting-edge scholarship in the field of narrative theory.

Angels and Demons in Art Rosa Giorgi, 2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious

symbolism.

Biology of Aging Alvaro Macieira-Coelho, 2012-12-06 The survival of the human species has improved significantly in modern times. During the last century, the mean survival of human populations in developed countries has increased more than during the preceding 5000 years. This improvement in survival was accompanied by an increase in the number of active years. In other words, the increase in mean life span was accompanied by an increase in health span. This is now accentuated by progress in medicine reducing the impact of physiologic events such as menopause and of pathological processes such as atherosclerosis. Up to now, research on aging, whether theoretical or experimental, has not contributed to improvement in human survival. Actually, there is a striking contrast between these significant modifications in survival and the present knowledge of the mechanisms of human aging. Revealed by this state of affairs are the profound disagreements between gerontologists in regard to the way of looking at the aging process. The definition of aging itself is difficult to begin with because of the variability of how it occurs in different organisms.

Communicative Action Axel Honneth, Hans Joas, 1991 These critical essays on Jürgen Habermas's major contribution to sociological theory, *The Theory of Communicative Action*, provide an indispensable guide for anyone trying to grasp that large, difficult, and important work. The editors' introduction traces the history of the reception of the work and identifies the main themes on which discussion has focused: a concept of communicative rationality; a theory of action based on distinguishing communicative from instrumental reason; a two-level concept of society that integrates lifeworld and system paradigms; and a critical theory of modernity meant to diagnose the sociopathologies of contemporary society. Contributors Jeffrey Alexander, Johann P. Arnason, Johannes Berger, Günter Dux, Jürgen Habermas, Hans Joas, Hans-Peter Krüger, Thomas McCarthy, Herbert Schnädelbach, Martin Seel, Charles Taylor
