Chemical Evolution Stephen Finney Mason,1991 This remarkable new book is for everyone interested in the origin and evolution of the universe. It relates the history of chemicals, from the earliest generation of the light elements in the Big Bang, to their transformation into heavier atoms and their subsequent molecular evolution into myriad forms, including life on Earth. Spanning both organic and inorganic chemical combinations, the survey thus covers billions of years and involves evidence coming from the analysis of long-extinct as well as ongoing processes. The techniques used in this fascinating study are also described. They include the analysis of many sources: isotopes from ancient nuclear reactions and still-active radionuclides; molecules from space--frozen in meteorites or continuously generated in vast interstellar clouds; and the detritus of volcanic and geochemical activity. This is also the story of the origin of life, which can be biochemically detected through the modern descendants of early microbial life-forms and from laboratory experiments in prebiotic chemistry. The author also describes the history of ideas in the study of chemistry and the development of modern theories on chemical evolution. This is a highly readable account of central issues and ideas in modern science that will be read with absorbing interest by a wide range of students, researchers, and general readers.

Global Development Finance 2006 World Bank,2006-01-01 International private capital flows to developing countries reached a record net level of \$491 billion in 2005. This surge in private capital flows offers national and international policy makers a major opportunity to bolster development efforts if they can successfully meet three challenges. The first is to ensure that more countries, especially poorer ones, enhance their access to developmentally beneficial international capital through improvements in their macroeconomic performance, investment climate, and use of aid. The second is to avoid sudden capital flow reversals by redressing global imbalances through policies that recognize the growing interdependencies between developed and developing countries' financial and exchange rate relations in the determination of global financial liquidity and asset price movements. And the third is to ensure that development finance, both official and private, is managed judiciously to meet the development goals of recipient countries while promoting greater engagement with global financial markets. These are the themes and concerns of this year's edition of Global Development Finance. Vol I. Analysis and Statistical Appendix reviews recent trends in financial flows to developing countries. Vol II.

Summary and Country Tables* includes comprehensive data for 138 countries, as well as summary data for regions and income groups.

Global Development Finance 2007 World Bank, 2007-01-01 Global Development Finance (GDF), is the World Bank's annual review of recent trends in and prospects for financial flows to developing countries. It is an indispensable resource for governments, economists, investors, financial consultants, academics, bankers, and the entire development community. Vol I: Analysis and Outlook reviews recent trends in financial flows to developing countries. Vol II. Summary and Country Tables* includes comprehensive data for 138 countries, as well as summary data for regions and income groups. Also available on CD-ROM, with more than 200 historical time series from 1970 to 2005, and country group estimates for 2006. * Vol II. Summary and Country Tables

Coal Industry Annual 1997 ,2002 Coal Industry Annual 1997 provides comprehensive information about US coal production, number of mines, prices, productivity, employment, productive capacity, and recoverable reserves. US Coal production for 1997 and previous years is based on the annual survey EIA-7A, Coal Production Report. This report presents data on coal consumption, coal distribution, coal stocks, coal prices, and coal quality for Congress, Federal and State agencies, the coal industry, and the general public. Appendix A contains a compilation of coal statistics for the major coal-producing States. This report includes a national total coal consumption for nonutility power producers that are not in the manufacturing, agriculture, mining, construction, or commercial sectors. 14 figs., 145 tabs.
