**Recommendations on the Transport of Dangerous Goods** United Nations,2020-01-06 The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the Recommendations on the Transport of Dangerous Goods in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled Manual of Tests and Criteria.

**Great Powers and Geopolitical Change** Jakub J. Grygiel, 2007-02-01 Named by Foreign Affairs as a book to read on geopolitics. In an era of high technology and instant communication, the role of geography in the formation of strategy and politics in international relations can be undervalued. But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns. Here, political scientist Jakub J. Grygiel brings to light the importance of incorporating geography into grand strategy. He argues that states can increase and maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication. Grygiel examines case studies of Venice, the Ottoman Empire, and China in the global fifteenth century—all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered. The location of resources, the layout of trade networks, and the stability of state boundaries played a large role in the success or failure of these three powers. Grygiel asserts that, though many other aspects of foreign policy have changed throughout history, strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena.

**Inventory of New York City Greenhouse Gas Emissions** Jonathan Dickinson, 2007-09 This report is a comprehensive greenhouse gas inventory for both New York City as a whole & for City gov't. operations. While there is no substitute for fed. action, all levels of gov't. have a role to play in confronting climate change & its potential impacts, & this report will help N.Y. begin doing that more aggressively. Mayor Bloomberg created the Mayor's Office of Long-term Planning & Sustainability & charged it with developing a comprehensive sustainability plan for the City's future. The result is PlaNYC, which has set a goal of reducing missions by 30% below 2005 levels by 2030,

an ambitious but achievable goal. This greenhouse gas inventory is a critical first step in reducing N.Y.'s contribution to global carbon dioxide levels. Illustrations.

Time for Life John Robinson, Geoffrey Godbey, 2010-11 Is it possible that Americans have more free time than they did thirty years ago? While few may believe it, research based on careful records of how we actually spend our time shows that we average more than an hour more free time per day than in the 1960s. Time-use experts John P. Robinson and Geoffrey Godbey received national attention when their controversial findings were first published in 1997. Now the book is updated, with a new chapter that includes results of the 1995&-1997 data from the Americans' Use of Time Project. &"Time for Life, an outstanding work of scholarship that manages to be highly readable, demands the attention of everyone interested in what&'s happening in today&'s society.&" &—Edward Cornish, *The Futurist* &"Time for Life . . . is excellent fodder for lively classroom discussions, not only about family time use, but about the ontological and epistemological assumptions in the prevailing post-positivist paradigm of family science.&" &—Alan J. Hawkins and Jeffrey Hill, *Journal of Marriage and the Family* &"Regardless of where you stand on this issue, Robinson and Godbey's arguments and data make for very interesting reading and open a cultural window on American society. . . . This is a piece of scholarship that should be read and its conclusions contemplated by people well outside the readership of this journal. . . . Time for Life is good social science research that should appeal to a broad audience.&" &—*Journal of Communication*

**Intangible Assets** Jeffrey A. Cohen, 2011-07-20 Praise for Intangible Assets In Intangible Assets, Jeffrey Cohen presents an informative, thought-provoking and practical look at an increasingly important component of every business's worth. He describes the art and science of identifying assets that have clear economic benefit, but are typically not found on the balance sheet, and he provides an invaluable framework within which the reader can value these assets, despite their elusive nature. --Rick Westervelt, President, Skylist, Inc. Jeffrey Cohen's integrative approach to conceptual issues of intangible assets is creative and a refreshing contribution. He brings law, economics, finance, and accounting to the same table, which results in a comprehensive framework for understanding how value is created and sustained. His construct of 'proto-assets' and 'portfolio of intangible economic benefits' is key. Written in an easy-to-read style with many practical examples, this book will be useful for both novice and experienced professionals. --W. Dana Northcut, PhD, Adjunct Associate Professor of Accounting Graduate School of Business, University of Chicago Principal, Chicago Partners, LLC This volume is the perfect resource for newcomers to IP valuation. Through lucid explanations and well-chosen illustrations, it does for the reader exactly what a valuation expert should do for a client--it makes the abstract concrete. But this volume is not just for the novice; it holds insights that will be useful to IP experts in law, accounting, and economics. --Edward F. Malone, Partner, Jenner & Block LLP

**Local Enterprises in the Global Economy** Hubert Schmitz, 2004 This book opens a fresh chapter in the debate on local enterprise clusters and their strategies for upgrading in the global

economy. The authors employ a novel conceptual framework in their research on industrial clusters in Europe, Latin America and Asia and provide new perspectives and insights for researchers and policymakers alike. The debate on local upgrading capacity is torn between two lines of thinking: those who believe that local relationships between enterprises and institutions are key to upgrading, and those who argue that the spaces for upgrading are defined by the sourcing strategies of global buyers. From this debate a number of important questions arise: how feasible is it to develop local upgrading strategies? Can local policy networks make a difference, or do global forces undermine them? Do global quality and labour standards marginalise developing country producers or do they help them to upgrade? To answer these questions, the book brings together theoretical and empirical research on local and regional clusters, global value chains and global standards, using case studies from developed and developing countries. The authors provide a new understanding of how global and local governance interact, highlighting power and inequality in global chains but also identifying scope for local action. By showing how and why insertion in global value chains can accelerate or inhibit local upgrading, this book represents a significant contribution to the academic and political debate on globalization. It will be essential reading for all students, academics and researchers interested in global political economy, global and local governance structures, economic geography and innovation studies.
